INVESTMENT ADVISORY COUNCIL

MINUTES

November 18, 2019

This page intentionally left blank.

**Minutes
Investment Advisory Council
August 12, 2019**

MEMBERS PRESENT: Denise Anderson, Doug Anderson, Dennis Duerst, Kim Faust, Susanna Gibbons, Morris Goodwin Jr., Jennifer Hassemer (for Myron Frans), Peggy Ingison, Erin Leonard, Gary Martin, Malcolm McDonald, Nancy Orr, Carol Peterfeso, Jay Stoffel and Shawn Wischmeier.

MEMBERS ABSENT: Kerry Brick and Dan McConnell.

SBI STAFF: Mansco Perry, Patricia Ammann, Paul Anderson, Shirley Baribeau, Nate Blumenshine, Cassie Boll, Tammy Brusehaver, Stephanie Gleeson, Aaron Griga, Andrew Krech, Steve Kuettel, John Mulé, Iryna Shafir, Erol Sonderegger, Jonathan Stacy, Jeff Weber, Charlene Olson and Melissa Mader.

OTHERS ATTENDING: Kristen Doyle and Katie Comstock, AON Hewitt Investment Consulting, Inc.; Allan Emkin, Meketa Investment Group, Inc.; Christie Eller and J. Adam Sorenson, Attorney General's Office; Karl Procaccini, Governor's Office; Bibi Black, Secretary of State's Office; Ramona Advani, State Auditor's Office; Edgar Hernandez, SEIU; Emily Moore, Divest-Invest Minnesota; Steve Smith, MN350; Patrick Malone, private citizen; and Philip McDonald, private citizen.

The minutes of May 20, 2019 meeting were approved.

Executive Director's Report

Mr. Perry referred members to Tab A of the meeting materials and stated that as of June 30, 2019, the SBI was responsible for managing \$101 billion of assets. Mr. Perry reported that the Combined Funds had outperformed its Composite Index over the ten-year period ending June 30, 2019 (Combined Funds 10.9% vs. Combined Funds-Composite Index 10.5%) and had provided a real rate of return of 4.4% above inflation over the latest 20 year period (Combined Funds 6.5% vs. CPI 2.2%).

Mr. Perry noted that the Combined Fund is within the ranges set for the traditional asset allocation, the official asset allocation, as opposed to the Strategic Allocation Category Framework.

Mr. Perry stated that assets increased over the quarter (Combined Funds ending value of \$70.7 versus a beginning value of \$68.8 billion), due primarily to investment returns. The Combined Funds matched the benchmark for the quarter (Combined Funds 3.6% vs. Combined Funds-Composite Index 3.6%) and underperformed for the year (Combined Funds 7.3% vs. Combined

Funds-Composite Index 7.6%). The Combined Funds matched the five year period return and outperformed the benchmark in all other time periods reported.

Mr. Perry stated that the combined public equity performance outperformed the benchmark during the quarter (Public Equity 3.8% vs. Public Equity Benchmark 3.7%) and underperformed for the year (Public Equity 6.1% vs. Public Equity Benchmark 6.4%). Breaking it down between domestic and international equities, the domestic equity manager group outperformed its benchmark for the quarter (Domestic Equity 4.1% vs. Domestic Equity Benchmark 4.0%), underperformed for the year (Domestic Equity 8.5% vs. Domestic Equity Benchmark 8.9%), outperformed for the three-year, underperformed for the five-year, and matched the ten-year period. The international equity manager group outperformed its target for the quarter (International Equity 3.2% vs. International Equity Benchmark 3.0%), underperformed for the year (International Equity 1.1% vs. International Equity Benchmark 1.3%), underperformed the three-year period, and outperformed for the five and ten year periods. Mr. Perry indicated that the fixed income segment outperformed its benchmark for the quarter (Fixed Income 3.2% vs. Fixed Income Benchmark 3.1%), for the year (Fixed Income 8.2% vs. Fixed Income Benchmark 7.9%), and outperformed over all other time periods reported. He reported that the Treasury Portfolio slightly underperformed its target for the quarter (Treasuries 4.5% vs. Treasuries Benchmark 4.6%). Mr. Perry stated that next to private markets, treasuries was the best performing asset class for the fiscal year. He also stated that the private market investments had strong performance for the fiscal year (Total Private Markets 2.8% and 10.4%, for the quarter and the year, respectively).

Mr. Perry referred members to the Strategic Allocation Category Framework, which shows the fund is under its range in the Growth Income - oriented category and slightly over in the Growth - Appreciation category. These ranges should be back in line once the Return-Seeking Fixed Income allocation is funded. Mr. Perry also stated that the volatility equivalent benchmark shows that, from a risk adjusted return basis, the Combined Funds return is accretive to a passive 60/40 weighted benchmark.

Mr. Perry referred members to Tab B, for the Administrative Report. Similar to previous years, expenses for the last fiscal year were under budget. The second item of the Administrative Report was a recap of the transition that occurred in the Participant Directed Investment Program at the end of the fiscal year. Three plans, the Hennepin County Supplemental Retirement Fund, Health Care Savings Plan, and Unclassified Retirement Plan, transferred their assets from the Supplemental Investment platform to the mutual fund line-up similar to the Minnesota Deferred Compensation Plan. The Administrative report also provides the Iran and Sudan summary. There was no litigation during the quarter.

In response to a question from Mr. Wischmeier and others, Mr. Perry and Mr. Blumenshine answered questions regarding the Wilshire Trust Universe Comparison Service (TUCS) data that is used to compare the Combined Funds asset allocation and returns. Staff is currently using the universe of public and corporate plans with assets over \$1 billion but will review the data set for next quarter of public and corporate plans over \$20 billion to see if it has statistical relevance. As is the case for most self-reporting universes, the validity of the information will depend on the accuracy of the data that is inputted, consistency of how asset classes are categorized, and using the most appropriate peer universe for comparison.

Mr. Perry referred members to Tab C for the Private Markets Report. Mr. Krech and his team appeared before the members. There were six proposed investments listed in the report, of which three are with existing managers: Lexington Partners Fund CIP V (Private Equity), BlackRock Fund GRP III (Real Assets), Angelo Gordon Europe Realty III (Real Estate); and three with new managers: Wind Point Partners Fund WPP IX (Private Equity), Whitehorse Liquidity Partners Fund III (Private Equity), and Marathon Asset Management MSPS II (Private Credit). Mr. Krech and his team responded to questions from the committee members. After discussion, Ms. Faust moved approval of the six recommendations and Mr. McDonald seconded the motion. The motion passed.

Mr. Perry referred members to Tab D for Discussions Regarding SBI Investment Programs. He stated that over the next couple of quarters, he would like to have more granular discussions on the composition of the Combined Funds in preparation of the asset allocation study which will likely occur in a couple of years. To start, Mr. Perry asked IAC members to share what their organizations are doing and identify areas where the SBI is not investing that could be beneficial. Next, Mr. Perry asked the consultants to do the same and provide their thoughts on the Combined Funds portfolio and share their insights. To finish, staff will take a deeper analysis into the asset classes to provide the IAC with a better look at the composition of the Combined Funds. For this meeting, staff will start with a high level overview of the various investment platforms that the SBI has for both pension and non-pension assets.

Each IAC committee member was asked to provide their thoughts on the SBI's investment portfolio in addition to things that they are doing that the SBI does not do. Some of the items discussed are listed below:

- As part of the manager due diligence and monitoring process, staff should have a good understanding of a manager's Environmental, Social, and Governance (ESG) initiatives and have them identify their Diversity profile and what their intentions are in the future.
- Consider diversifying the large weight to public equities in the portfolio. A large allocation to equities is expected with the long-term time horizon and return objective for asset growth. However, identify ways to protect the portfolio's equity return incorporating investment vehicles that protect from downside risk during market dislocations. These investment structures may require a change in statute. Also, have conviction in the active managers by investing with fewer managers so that the aggregate doesn't replicate a passive portfolio.
- Review the Bloomberg Barclays Aggregate mandate within fixed income and identify how it meets the objectives of the portfolio. Consider investment structures that offer diversification, including bank loans, which are currently not allowed under statute.
- Take advantage of investment structures within Private Markets that offer higher return potential and lower fee schedules. These structures would require a change in statute. When prudent, and if applicable, take advantage of the SBI's scale when sizing investments in limited partnerships for fee breaks.
- Increase global footprint across asset classes, both public and private. This would require staff to travel more and to adjust the budget accordingly.

Ms. Doyle, the SBI's Consultant with AON Hewitt Investment, Inc. commented on the SBI's long-term time horizon which allows for more illiquid assets and provides more opportunity for additional diversification, either by asset class or by economic exposure. A higher allocation in private markets can be diversified holistically by taking advantage of market dislocations, like the use of shorter lock-up structures. Ms. Doyle sees a lot of SBI's peers doing more in Asia, particularly in private markets. In the public markets, AON feels strongly that if you are going to include active risk in the portfolio, look for managers that are more unconstrained and give them broader leeway. They have seen more success in terms of earning alpha in public markets with allocations to higher octane managers. With the fixed income allocation, take a deeper analysis into the exposures and expectations of each mandate. AON recommends a sizable allocation to an all-weather protection portfolio. Ms. Doyle noted that AON has been working with staff on the multi-asset credit space, or return seeking fixed income, which would provide some additional diversification.

Mr. Emkin, the SBI's Consultant with Meketa Investment Group, Inc. commented on the challenges for the SBI to be competitive given the constraints it has as a governmental entity. Whether it be transparency, governance, or compensation, the SBI invests under different rules and procedures than others that can be more nimble. Mr. Emkin stated that it is more important today than ever for organizations to focus on having a culture that is positive re-enforcing, sustainable, and replicating. Mr. Emkin stated that the Bloomberg Barclays Aggregate mandate has no place in a large institutional portfolio since, ultimately, if you want credit exposure you can just buy credit exposure and should not be used as a way to get duration. Mr. Emkin sees value in spending resources to hire staff to find ways to lower fees. Lastly, he believes the best diversifier to reduce risk, other than long treasuries, are illiquid assets that are not priced daily and provide a smooth return pattern.

Mr. Perry introduced staff who provided a high level overview of the investment program. Patricia Ammann, Director of Investment Services and Operations provided an overview of the Participant Directed Investment Program and the Non-Retirement Fund Program managed by the SBI. Erol Sonderegger, Director of Public Markets, Cash Management and Risk Management, presented on the State Cash Accounts and the Combined Funds Public Markets portfolio. Andrew Krech, Director of Private Markets and Asset Allocation, provided an overview of the Combined Funds Private Markets portfolio. John Mulé, Director of Legal, Legislative Policy and Shareholder Services provided an overview of the proxy voting and ESG initiatives at the SBI.

The meeting adjourned at 3:06 p.m.

Respectfully submitted,

Mansco Perry III
Executive Director and
Chief Investment Officer

TAB A

Report from the Executive Director

Quarterly Performance Summary

This page intentionally left blank.

Performance Summary

September 30, 2019

Description of SBI Investment Programs

The Minnesota State Board of Investment is responsible for the investment management of various retirement funds, trust funds and cash accounts.

Combined Funds

The Combined Funds represent the assets for both the active and retired public employees in the statewide retirement systems, the biggest of which are the Public Employees Retirement Association (PERA), the Teachers Retirement Association (TRA), and the Minnesota State Retirement System (MSRS). The SBI commingles the assets of these plans into the Combined Funds to capture investment efficiencies. All assets in the Combined Funds are managed externally by investment management firms retained by contract.

Participant Directed Investment Program

The Participant Directed Investment Program (PDIP) provides investment vehicles for a variety of retirement or other tax-advantaged savings plans. Investment goals among the PDIP's many participants are varied. In order to meet the variety of goals, participants may allocate their investments among one or more accounts that are appropriate for their needs within statutory requirements and rules established by the participating organizations. At this time, the assets of various retirement programs, including local firefighter groups, are included here.

Non-Retirement

The Non-Retirement Funds are funds established by the State of Minnesota and other government entities for various purposes which include the benefit of public schools, the environment, other post-employment benefits, workers compensation insurance, and other purposes.

State Cash

The State Cash accounts are cash balances of state government funds including the State General Fund. Most accounts are invested by SBI staff through a short-term pooled fund referred to as the Treasurer's Cash Pool. It contains the cash balances of special or dedicated accounts necessary for the operation of certain State agencies and non-dedicated cash in the State Treasury. Because of special legal restrictions, a small number of cash accounts cannot be commingled.

Funds Under Management

	<u>\$ Millions</u>
COMBINED FUNDS	
Combined Funds	\$70,691
PARTICIPANT DIRECTED INVESTMENT PROGRAMS	
Supplemental Investment Fund*	2,928
Mutual Funds**	7,188
Minnesota College Savings Plan	1,493
Achieve a Better Life Experience	7
NON-RETIREMENT FUNDS	
Assigned Risk Plan	288
Permanent School Fund	1,544
Environmental Trust Fund	1,232
Closed Landfill Investment Fund	99
Miscellaneous	263
Other Post Employment Benefits Accounts	668
STATE CASH ACCOUNTS	
Treasurer's Cash	12,911
Other State Cash Accounts	166
TOTAL	
SBI AUM	99,478

* Includes assets of smaller retirement funds which are invested with the SBI but are not included in the Combined Funds

** Does not include the Stable Value and Money Market accounts that are used by Mutual Funds and Supplemental Investment Fund

Note: Differentials within column amounts may occur due to rounding

Combined Funds Long Term Objectives

		<u>Comparison to Objective</u>
		<u>10 Year</u>
Match or Exceed Composite Index (10 yr.)	COMBINED FUNDS	9.7%
Outperform a composite market index weighted in a manner that reflects the long-term asset allocation of the Combined Funds over the latest 10 year period.	COMBINED FUNDS - COMPOSITE INDEX	9.4
	Excess	0.3
		<u>20 Year</u>
Provide Real Return (20 yr.)	COMBINED FUNDS	6.7%
Provide returns that are 3-5 percentage points greater than inflation over the latest 20 year period.	CPI-U	2.1
	Excess	4.6

Note:

Throughout this report performance is calculated net of investment management fees, differentials within column amounts may occur due to rounding, and returns for all periods greater than one year are annualized.

Combined Funds Summary

Combined Funds Change in Market Value (\$Millions)

	One Quarter
COMBINED FUNDS	
Beginning Market Value	\$70,658
Net Contributions	-655
Investment Return	687
Ending Market Value	70,691

The change in market value of the Combined Funds since the end of last quarter is due to net contributions and investment returns.

Performance (Net of Fees)

The Combined Funds' performance is evaluated relative to a composite of public market index and private market investment returns. The Composite performance is calculated by multiplying the beginning of month Composite weights and the monthly returns of the asset class benchmarks.

	Qtr	FYTD	1 Yr	3 Yr	5 Yr	10 Yr	20 Yr	30 Yr
COMBINED FUNDS	1.0%	1.0%	4.7%	9.8%	7.5%	9.7%	6.7%	8.6%
COMBINED FUNDS - COMPOSITE INDEX	1.1	1.1	5.1	9.5	7.5	9.4	6.6	8.4
Excess	-0.1	-0.1	-0.4	0.2	0.0	0.3	0.2	0.2

Asset Growth

Combined Funds Summary

Asset Mix

The Combined Funds actual asset mix relative to the Strategic Asset Allocation Policy Target is shown below. Any uninvested portion of the Private Markets allocation is held in Public Equity.

	<u>(Millions)</u>	<u>Actual Mix</u>	<u>Policy Target</u>
Public Equity	\$44,485	62.9%	53.0%
Fixed Income	7,386	10.4	10.0
Private Markets	10,751	15.2	25.0
Treasuries	7,492	10.6	10.0
Cash	577	0.8	2.0
TOTAL	70,691	100.0	

Composite Index Comparison

The Combined Funds Composite is set as the Strategic Asset Allocation Policy Target with the uninvested portion of Private Markets allocated to Public Equity. Asset class weights for Public Equity and Private Markets are reset at the start of each month. The Combined Funds Composite weighting shown below is as of the first day of the quarter.

	<u>Policy Weight</u>	<u>Market Index</u>
Public Equity	63.5%	Public Equity Benchmark
Fixed Income	10.0	BB Barclays U.S. Aggregate
Private Markets	14.6	Private Markets
Treasuries	10.0	BB Barclays Treasury 5+ Years
Cash	2.0	3 Month T-Bills

Combined Funds Asset Class Performance Summary

Public Equity

The Combined Funds Public Equity includes Domestic Equity and International Equity.

The Public Equity benchmark is 60.3% Russell 1000, 6.7% Russell 2000, 24.75% MSCI World ex US (net), and 8.25% MSCI EM (net).

The Russell 1000 and Russell 2000 measure the performance of the 1000 largest and 2000 next largest U.S. companies based on total market capitalization.

The MSCI World ex US index is composed of large and mid cap companies that capture approximately 85% of the total market capitalization in 22 of the 23 developed markets. The MSCI Emerging Markets index is composed of large and mid cap companies that capture approximately 85% of the total market capitalization across 24 Emerging Markets countries.

	<u>Last Qtr</u>	<u>FYTD</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>	<u>20 Year</u>	<u>30 year</u>
Public Equity	0.0%	0.0%	1.1%	10.9%	8.3%	10.9%	5.9%	8.8%
Public Equity Benchmark	0.1	0.1	1.5	10.8				
Excess	-0.1	-0.1	-0.4	0.1				
Domestic Equity	0.8	0.8	2.1	12.8	10.1	13.0	6.4	9.3
Domestic Equity Benchmark	1.0	1.0	2.8	12.8	10.4	13.1	6.6	9.5
Excess	-0.3	-0.3	-0.7	0.1	-0.3	-0.1	-0.2	-0.2
International Equity	-1.5	-1.5	-0.9	6.4	3.4	5.0	4.6	
International Equity Benchmark	-1.8	-1.8	-1.2	6.4	2.9	4.5	4.2	
Excess	0.3	0.3	0.2	0.1	0.5	0.5	0.4	

Note:

Prior to 6/30/16 the returns of Domestic and International Equity were not reported as a total Public Equity return. For additional information regarding historical asset class performance and benchmarks, please refer to the Combined Funds Performance Report.

Combined Funds Asset Class Performance Summary

Fixed Income

The Combined Funds Fixed Income program includes Core Fixed Income and Treasuries. The Combined Funds performance for these asset classes is shown here.

The Core Fixed Income benchmark is the Bloomberg Barclays U.S. Aggregate Index. This index reflects the performance of the broad bond market for investment grade (Baa or higher) bonds, U.S. Treasury and agency securities, and mortgage obligations with maturities greater than one year.

The Treasuries benchmark is the Bloomberg Barclays Treasury 5+ Years Index.

	<u>Last Qtr</u>	<u>FYTD</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>	<u>20 Year</u>	<u>30 year</u>
Fixed Income	2.3%	2.3%	10.4%	3.5%	3.8%	4.6%	5.4%	6.4%
Fixed Income Benchmark	2.3	2.3	10.3	2.9	3.4	3.7	5.0	6.1
Excess	0.1	0.1	0.1	0.5	0.5	0.9	0.4	0.4
Treasuries	4.5	4.5	17.0					
BBG BARC 5Y + Us Tsy Idx	4.6	4.6	17.2					
Excess	-0.1	-0.1	-0.2					

Cash

The Combined Funds Cash performance is shown here. Cash is held by the Combined Funds to meet the liquidity needs of the retirement systems to pay benefits.

	<u>Last Qtr</u>	<u>FYTD</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>	<u>20 Year</u>	<u>30 year</u>
Cash	0.6%	0.6%	2.4%	1.7%	1.1%	0.8%	2.2%	3.7%

Note:

For additional information regarding historical asset class performance and benchmarks, please refer to the Combined Funds Performance Report.

Combined Funds Asset Class Performance Summary

Private Markets

	<u>Last Qtr</u>	<u>FYTD</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>	<u>20 Year</u>	<u>25 year</u>	<u>30 year</u>
Private Markets	1.8%	1.8%	8.0%	13.7%	9.5%	12.6%	12.5%	13.7%	12.2%
Private Equity	3.5%	3.5%	12.8%	17.4%	14.3%	15.5%	13.3%	15.6%	
Private Credit	1.4	1.4	7.5	13.0	12.7	13.4	12.3		
Resources	-3.5	-3.5	-5.3	5.2	-4.8	5.9	14.9	14.4	
Real Estate	3.1	3.1	9.6	10.5	11.0	10.1	9.0	9.6	

Private Markets

The time-weighted rates of return for the Private Markets portfolio are shown here. Private Markets included Private Equity, Private Credit, Resources, and Real Estate. Some of the existing investments are relatively immature and returns may not be indicative of future results.

Private Equity Investments

The objectives of the Private Equity portfolio, which may include leveraged buyouts, growth equity, venture capital and special situations, are to achieve attractive returns and to provide overall portfolio diversification to the total plan.

Private Credit Investments

The objectives of the Private Credit portfolio, which may include mezzanine debt, direct lending, and other forms of non-investment grade fixed income instruments, are to achieve a high total return over a full market cycle and to provide some degree of downside protection and typically provide current income in the form of a coupon. In certain situations, investments in the Private Credit portfolio also provide an equity component of return in the form of warrants or re-organized equity.

Resource Investments

The objectives of the Resources portfolio, which may include energy, infrastructure, and other hard assets, are to provide protection against the risks associated with inflation and to provide overall portfolio diversification to the total plan.

Real Estate Investments

The objectives of the Real Estate portfolio, which may include core and non-core real estate investments, are to achieve attractive returns, preserve capital, provide protection against risks associated with inflation, and provide overall portfolio diversification to the total plan.

The SBI also monitors Private Markets performance using money-weighted return metrics such as Internal Rate of Return and Multiple of Invested Capital. For money-weighted return metrics please refer to the Combined Funds Performance Report.

SBI Combined Funds Strategic Allocation Category Framework

	<u>9/30/19</u> <u>(\$ millions)</u>	<u>9/30/19 Weights</u>	<u>Category Ranges</u>	
<u>Growth - Appreciation</u>				
Public Equity	\$ 44,485.34	62.9%		
Private Equity	\$ 6,025.80	8.5%

Commodities		0.0%		
		0.0%	0%	10%
<u>Protection</u>				
U.S. Treasuries	\$ 7,491.56	10.6%		
	\$ 7,491.56	10.6%	5%	20%
<u>Liquidity</u>				
Cash	\$ 651.04	0.9%		
	\$ 651.04	0.9%	0%	5%
<u>Opportunity</u>				
Opportunity		0.0%	0%	10%
Total	\$ 70,690.84	100.0%		
Illiquid Asset Exposure	\$ 10,677.12	15.1%	0%	30%

Volatility Equivalent Benchmark

Comparison Periods Ending

As of (Date):	9/30/2019							
	1-year	3-year	5-year	10-year	15-year	20-year	25-year	30-year
SBI Combined Funds Return	4.7%	9.8%	7.5%	9.7%	8.1%	6.7%	8.6%	8.6%
Volatility Equivalent Benchmark Return	5.1%	7.2%	5.6%	6.7%	6.2%	5.3%	6.7%	7.1%
Value Added	-0.4%	2.5%	1.9%	3.0%	1.9%	1.5%	1.9%	1.5%
Standard Deviation: Benchmark = Combined Funds			7.1%	7.9%	9.0%	9.3%	9.3%	9.2%
Benchmark Stock Weight	62%	62%	62%	60%	58%	61%	62%	62%
Benchmark Bond Weight	38%	38%	38%	40%	42%	39%	38%	38%

The Volatility Equivalent Benchmark stock and bond weights are adjusted to equal the standard deviation of the SBI Combined Funds portfolio. Then a return is calculated.

Combined Funds Summary

Asset Mix Compared to Other Pension Funds

The comparison universe used by the SBI is the Trust Universe Comparison Service (TUCS). Only funds with assets over \$1 billion are included in the comparisons shown in this section.

Comparisons of the Combined Funds' asset mix to the median allocation to stocks, bonds and other assets of the public and corporate funds in TUCS over \$1 billion are shown below:

Combined Funds Asset Mix

	<u>(\$Millions)</u>	<u>Actual Mix</u>
Public Equity	44,485	62.9
Fixed Income	7,386	10.4
Treasuries	7,492	10.6
Private Markets	10,751	15.2
Cash	577	0.8
TOTAL	70,691	100.0

	<u>Domestic Equity</u>	<u>International Equity</u>	<u>Bonds</u>	<u>Alternatives</u>	<u>Cash</u>
Combined Funds	42.6%	20.4%	21.0%	15.2%	0.8%
Median in TUCS	28.0%	6.7%	20.7%	12.9%	2.8%

Combined Funds Summary

Performance Compared to Other Pension Funds

While the SBI is concerned with how its returns compare to other pension investors, universe comparisons should be used with great care. There are several reasons why such comparisons will provide an "apples to oranges" look at performance:

- Differing Allocations. Asset allocation will have a dominant effect on return. The allocation to stocks among the funds in TUCS typically ranges from 20-90%, a very wide range for meaningful comparison. In addition, it appears that many funds do not include alternative asset holdings in their reports to TUCS. This further distorts comparisons among funds.
- Differing Goals/Liabilities. Each pension fund structures its portfolio to meet its own liabilities and risk tolerance. This will result in different asset mix choices. Since asset mix will largely determine investment results, a universe ranking is not relevant to a discussion of how well a plan sponsor is meeting its long-term liabilities.

With these considerations in mind, the performance of the Combined Funds compared to other public and corporate pension funds in Trust Universe Comparison Service (TUCS) are shown below.

The SBI's returns are ranked against public and corporate plans with over \$1 billion in assets. All funds in TUCS report their returns gross of fees.

	Periods Ended 09/30/2019							
	<u>Qtr.</u>	<u>1 Yr.</u>	<u>3 Yrs.</u>	<u>5 Yrs.</u>	<u>10 Yrs.</u>	<u>20 Yrs.</u>	<u>25 Yrs.</u>	<u>30 Yrs.</u>
Combined Funds	61st	62nd	11th	18th	8th	43rd	41st	35th
Percentile Rank in TUCS

EXECUTIVE DIRECTOR'S ADMINISTRATIVE REPORT

DATE: November 12, 2019

TO: Members, State Board of Investment

FROM: Mansco Perry III

1. Reports on Budget and Travel

A report on the SBI's administrative budget for the fiscal year to date through September 30, 2019 is included as **Attachment A**.

A report on travel for the period from July 1, 2019 – September 30, 2019 is included as **Attachment B**.

2. FY19 Audit Report

The Legislative Auditor is working on the financial audit of SBI operations for FY19. We will inform you of the results upon completion of the audit.

3. Draft of the FY19 Annual Report

A draft of the SBI's annual report for FY19 will be distributed to the Board members/designees and IAC members upon completion of the FY19 audit. We would anticipate distribution in December or January.

4. Meeting Dates for Calendar 2020.

IAC
Tuesday, February 18, 2020

Monday, May 18, 2020

Monday, August 17, 2020

Monday, November 16, 2020

SBI
Wednesday, February 26, 2020 or
Thursday, February 27, 2020*

Thursday, May 28, 2020

Wednesday, August 26, 2020

Wednesday, December 2, 2020 or
Thursday, December 3, 2020*

*In the event of a conflict with the State Economic Forecast.

5. Sudan Update

Each quarter, staff provides a report to the Board on steps taken to implement *Minnesota Statutes*, section 11A.243 that requires SBI actions concerning companies with operations in Sudan. Staff receives periodic reports from the Vigeo Eiris Conflict Risk Network (CRN) about the status of companies with operations in Sudan.

The SBI is restricted from purchasing stock in the companies designated as highest offenders by the CRN. Accordingly, staff updates the list of restricted stocks and notifies investment managers that they may not purchase shares in companies on the restricted list. Staff receives monthly reports from the SBI's custodian bank concerning SBI holdings of companies on the CRN list and writes letters as required by law.

According to the law, if after 90 days following the SBI's communication, a company continues to have active business operations in Sudan, the SBI must divest holdings of the company according to the following schedule:

- at least 50% shall be sold within nine months after the company appeared on the scrutinized list; and
- 100% shall be sold within fifteen months after the company appeared on the list.

In the third quarter, SBI managers sold 55,000 shares in one company on the divestment list.

On September 16, 2019, staff sent a letter to each international equity manager and domestic equity manager containing the most recent restricted list and the list of stocks to be divested in compliance with Minnesota law.

4. Iran Update

Each quarter, staff provides a report to the Board on steps taken to implement *Minnesota Statutes*, section 11A.244 that requires SBI actions concerning companies with operations in Iran.

SBI receives information on companies with Iran operations from Institutional Shareholder Services, Inc. (ISS). Staff receives monthly reports from the SBI's custodian bank concerning SBI holdings of companies on the restricted list and writes letters as required by the law.

According to the law, if after 90 days following the SBI's communication a company continues to have scrutinized business operations, the SBI must divest all publicly traded securities of the company according to the following schedule:

- at least 50% shall be sold within nine months after the company appeared on the scrutinized list; and
- 100% within fifteen months after the company appeared on the scrutinized list.

In the third quarter, SBI managers sold 523,000 shares in two companies on the divestment list.

On September 16, 2019, staff sent a letter to each international equity manager, domestic equity manager and fixed income manager containing the most recent restricted list and the list of companies to be divested in compliance with Minnesota law.

5. Litigation Update

SBI legal counsel will give a verbal update on the status of any litigation at the meeting.

Report from the Executive Director

TUCS Comparison Observations

This page intentionally left blank.

DATE: November 12, 2019

TO: Members, Investment Advisory Council

FROM: Mansco Perry III

SUBJECT: TUCS Comparison Observations

The SBI Combined Funds have historically been compared, in the Wilshire Trust Universe Comparison Service (TUCS), to the Master Trust-Plans with assets under management of \$1 billion or more. Given the size of the Combined Funds portfolio and the fact that the observations in the Master Trust include other institutional investors in addition to public funds, a more relevant comparison for the Combined Funds would be to other public funds of a comparable size.

We have had State Street provide comparisons for three groupings of Public Fund Plans as well as the Master Trust-Plan. Attached to this memo are the TUCS comparisons for Performance and Asset Allocation relative to the following comparison groups:

- Master Trust-Plans greater than \$1 billion
- Public Plans greater than \$10 billion
- Public Plans greater than \$20 billion
- Public Plans greater than \$50 billion

Given the size of the Combined Funds (\$70 billion), it would appear that the most relevant comparison group would be that for plans greater than \$50 billion. However, this grouping has a small number of comparison observations and the Combined Funds has a shorter history of being in this group.

Rather than make a decision regarding which group at this time is most appropriate, we will continue to present the performance and asset allocation comparisons for the current Master Plan group and the three public plan comparison groups. The information will be available for all to review. At some future date, we may make a recommendation, but for now we believe that presenting all the data may be most informative.

We should note that peer comparisons have generally been criticized because all plans have different asset allocation mixes. Different asset allocations will generate variations in return performance. While these comparisons will provide some information and may provide insight into the management of the Combined Funds, it is doubtful that any information gleaned from this data will be determinative of how the SBI performs or, more importantly, how the portfolio is constructed and managed.

Private Markets Program Report and Consideration of Commitments

This page intentionally left blank.

DATE: November 12, 2019

TO: Members, Investment Advisory Council

FROM: SBI Staff

SUBJECT: Private Markets Commitments for Consideration

Staff has reviewed the following action agenda item:

- A. Status of SBI Current Private Markets Commitments
- B. Consideration of new commitments

Existing Managers:

Private Equity	Lexington Partners	CIP V Overage	\$100 Million
Private Equity	Leonard Green & Partners	GEI VIII	\$150 Million
Private Equity	Madison Dearborn Partners	MDP VIII	\$100 Million
Distressed/Opp.	Marathon Asset Management	MDCF I	\$200 Million
Real Estate	Rockwood	Fund XI	\$100 Million

New Managers:

Private Credit	HPS Investment Partners	HPS Mezz 2019	\$100 Million
Private Equity	Vista Equity Partners	Perennial Fund	\$200 Million

IAC action is required on item B.

A. Status of SBI Current Private Markets Commitments

Minnesota State Board of Investment

Combined Funds

September 30, 2019

Combined Funds Market Value \$70,690,841,607

Amount Available for Investment **\$3,707,530,512**

	Current Level	Target Level	Difference
Market Value (MV)	\$10,677,122,202	\$17,672,710,402	\$6,995,588,200
MV +Unfunded	\$21,034,264,050	\$24,741,794,562	\$3,707,530,512

Asset Class	Market Value	Unfunded Commitment	Total

2017	\$2,021,595,780	(\$2,383,863,711)	(\$362,267,931)
2016	\$1,874,320,138	(\$1,728,367,357)	\$145,952,781
2015	\$1,541,161,769	(\$2,128,301,645)	(\$587,139,876)

B. Consideration of New Investment Commitments

ACTION ITEMS:

1) Investment with an existing private equity manager, Lexington Partners (“Lexington”), in Lexington Co-Investment Partners V Overage Program (“Overage Program”).

Lexington is forming the Overage Program to invest alongside CIP V in equity co-investment transactions that exceed prudent diversification levels for CIP V. The CIP V and Overage Program investments will be with leading buyout and growth sponsors primarily in U.S. and European companies with some selective investments in Asian and Latin American companies as well. While the Overage Program will only invest in CIP V deals, the ultimate portfolio construction will differ. The Overage Program will still be diversified across sponsor, company, company size, geography, industry, and vintage, but it is expected to have a greater exposure to mid and large size companies when compared to CIP V.

In addition to reviewing the attractiveness of the Overage Program investment offering, staff conducted on-site due diligence, reference checks, a literature database search, and reviewed the potential investor base for the fund.

More information on Overage Program is included as **Attachment A beginning on page 9.**

RECOMMENDATION:

Staff is requesting that the Investment Advisory Council concur with Staff’s recommendation to commit up to \$100 million, or 20% of Lexington Co-Investment Partners V Overage Program, whichever is less, plus an additional amount not to exceed one percent of the total commitment for the payment of required charges at closing. Approval of this potential commitment is not intended to be, and does not constitute in any way, a binding or legal agreement or impose any legal obligations on the State Board of Investment and neither the State of Minnesota, the Investment Advisory Council, the State Board of Investment nor its Executive Director have any liability for reliance by Lexington Partners upon this approval. Until the Executive Director on behalf of the SBI executes a formal agreement, further due diligence and negotiations may result in the imposition of additional terms and conditions on Lexington Partners or reduction or termination of the commitment.

2) Investment with an existing private equity manager, Leonard Green & Partners (“LGP”), in Green Equity Investors VIII, L.P. (“GEI VIII”).

LGP is seeking investors to continue their lengthy history of making investments in market-leading companies with attractive growth prospects across a broad range of industries, with a preference for companies providing services, including consumer, business, and healthcare services, as well as retail, distribution and industrials. LGP seeks to invest in companies with (i) market-leading franchises and defensible competitive positions, (ii) attractive growth prospects, and (iii) proven management teams. GEI VIII will primarily target companies based in the United States.

In addition to reviewing the attractiveness of the GEI VIII investment offering, staff conducted on-site due diligence, reference checks, a literature database search, and reviewed the potential investor base for the fund.

More information on GEI VIII is included as **Attachment B beginning on page 13.**

RECOMMENDATION:

Staff is requesting that the Investment Advisory Council concur with Staff's recommendation to commit up to \$150 million, or 20% of GEI VIII, whichever is less, plus an additional amount not to exceed one percent of the total commitment for the payment of required charges at closing. Approval of this potential commitment is not intended to be, and does not constitute in any way, a binding or legal agreement or impose any legal obligations on the State Board of Investment and neither the State of Minnesota, the Investment Advisory Council, the State Board of Investment nor its Executive Director have any liability for reliance by Leonard Green & Partners upon this approval. Until the Executive Director on behalf of the SBI executes a formal agreement, further due diligence and negotiations may result in the imposition of additional terms and conditions on Leonard Green & Partners or reduction or termination of the commitment.

3) Investment with an existing private equity manager, Madison Dearborn Partners ("MDP") in Madison Dearborn Capital Partners VIII ("Fund VIII").

Madison Dearborn Partners is establishing Fund VIII to make buyout and growth equity investments in established middle and upper middle-market companies located primarily in the United States. MDP is organized in the five industry verticals where it transacts: Basic Industries; Business & Government Software and Services; Financial & Transaction Services; Health Care; and Telecom, Media & Technology Services. MDP believes that its reputation and extensive experience in each of these sectors provide a significant competitive advantage with respect to: (i) sourcing; (ii) early assessment of investment opportunities; (iii) due diligence; and (iv) creating value in portfolio companies post close.

In addition to reviewing the attractiveness of the Madison Dearborn Capital Partners VIII investment offering, staff conducted on-site due diligence, reference checks, a literature database search, and reviewed the potential investor base for the fund.

More information on Fund VIII is included as **Attachment C beginning on page 17.**

RECOMMENDATION:

Staff is requesting that the Investment Advisory Council concur with Staff's recommendation to commit up to \$100 million, or 20% of Madison Dearborn Capital Partners VIII, whichever is less, plus an additional amount not to exceed one percent of the total commitment for the payment of required charges at closing. Approval of this potential commitment is not intended to be, and does not constitute in any way, a binding or legal agreement or impose any legal obligations on the State Board of Investment and neither the State of Minnesota, the Investment Advisory Council, the State Board of

Investment nor its Executive Director have any liability for reliance by Madison Dearborn Partners upon this approval. Until the Executive Director on behalf of the SBI executes a formal agreement, further due diligence and negotiations may result in the imposition of additional terms and conditions on Madison Dearborn Partners or reduction or termination of the commitment.

4) Investment with an existing private credit manager, Marathon Asset Management (“Marathon”), in Marathon Distressed Credit Fund, L.P. (“MDCF I”).

Marathon is establishing MDCF I to construct a portfolio of distressed, dislocated, and restructuring corporate credit opportunities in complex situations with attractive risk-adjusted return characteristics. Core holdings of the Fund will include bankruptcy reorganizations, liquidations, rescue lending, distressed exchanges, debtor-in-possession financings, and dislocated credit. Marathon may invest up to 30% of its aggregate capital commitments prior to the occurrence of an Investment Trigger (three predefined scenarios related to the High Yield bond market), but may not invest in excess of 30% of capital commitments, in each case measured at the time of investment, until an Investment Trigger has occurred

In addition to reviewing the attractiveness of the MDCF I Fund investment offering, staff conducted on-site due diligence, reference checks, a literature database search, and reviewed the potential investor base for the fund.

More information on MDCF I is included as **Attachment D beginning on page 21.**

RECOMMENDATION:

Staff is requesting that the Investment Advisory Council concur with Staff’s recommendation to commit up to \$200 million, or 20% of Marathon Distressed Credit Fund, L.P., whichever is less, plus an additional amount not to exceed one percent of the total commitment for the payment of required charges at closing. Approval of this potential commitment is not intended to be, and does not constitute in any way, a binding or legal agreement or impose any legal obligations on the State Board of Investment and neither the State of Minnesota, the Investment Advisory Council, the State Board of Investment nor its Executive Director have any liability for reliance by Marathon upon this approval. Until the Executive Director on behalf of the SBI executes a formal agreement, further due diligence and negotiations may result in the imposition of additional terms and conditions on Marathon or reduction or termination of the commitment.

5) Investment with an existing real estate manager, Rockwood Capital, LLC (“Rockwood”), in Rockwood Capital Real Estate Partners Fund XI, L.P. (“Fund XI”).

Rockwood is forming Fund XI to make value add investments in commercial real estate. Fund XI will continue Rockwood’s history of targeting office and other workspace, multifamily, and hotel assets in major U.S. metropolitan areas. Rockwood believes that there is significant opportunity for the Fund to create value by transforming under-improved properties with

certain positive attributes into valuable properties that will attract multiple buyers when Rockwood decides to sell. Fund XI will look to acquire well-located assets with upside potential that can be realized through renovation, re-tenanting, redevelopment, development and/or improvement in property management and operations.

In addition to reviewing the attractiveness of the Fund XI investment offering, staff conducted on-site due diligence, reference checks, a literature database search, and reviewed the potential investor base for the fund.

More information on Fund XI is included as **Attachment E beginning on page 25.**

RECOMMENDATION:

Staff is requesting that the Investment Advisory Council concur with Staff's recommendation to commit up to \$100 million, or 20% of Rockwood Capital Real Estate Partners Fund XI, L.P., whichever is less, plus an additional amount not to exceed one percent of the total commitment for the payment of required charges at closing. Approval of this potential commitment is not intended to be, and does not constitute in any way, a binding or legal agreement or impose any legal obligations on the State Board of Investment and neither the State of Minnesota, the Investment Advisory Council, the State Board of Investment nor its Executive Director have any liability for reliance by Rockwood upon this approval. Until the Executive Director on behalf of the SBI executes a formal agreement, further due diligence and negotiations may result in the imposition of additional terms and conditions on Rockwood or reduction or termination of the commitment.

6) Investment with a new private credit manager, HPS Investment Partners, LLC ("HPS"), in HPS Mezzanine Partners 2019, L.P. ("HPS 2019").

HPS is establishing HPS 2019 to generate current returns and long-term appreciation through investments in mezzanine securities, which are high-yielding fixed and floating rate debt and debt-like instruments. HPS believes mezzanine investments offer investors the combination of a high contractual coupon and current income, with significant downside protection through highly negotiated agreements with customized covenants. HPS generally intends to pursue investments where the members of the Mezzanine Team possess a deep knowledge of the sector and the company, generally focusing on companies that demonstrate, or are expected to develop: (i) sustainable advantages and meaningful barriers to entry, (ii) strong market share, (iii) substantial EBITDA margins and free cash flow and (iv) proven, experienced management teams.

In addition to reviewing the attractiveness of the HPS 2019 investment offering, staff conducted on-site due diligence, reference checks, a literature database search, and reviewed the potential investor base for the fund.

More information on HPS 2019 is included as **Attachment F beginning on page 29.**

RECOMMENDATION:

Staff is requesting that the Investment Advisory Council concur with Staff's recommendation to commit up to \$100 million, or 20% of HPS Mezzanine Partners 2019, L.P., whichever is less, plus an additional amount not to exceed one percent of the total commitment for the payment of required charges at closing. Approval of this potential commitment is not intended to be, and does not constitute in any way, a binding or legal agreement or impose any legal obligations on the State Board of Investment and neither the State of Minnesota, the Investment Advisory Council, the State Board of Investment nor its Executive Director have any liability for reliance by HPS Investment Partners upon this approval. Until the Executive Director on behalf of the SBI executes a formal agreement, further due diligence and negotiations may result in the imposition of additional terms and conditions on HPS Investment Partners or reduction or termination of the commitment.

7) Investment with a new private equity manager, Vista Equity Partners Management, LLC ("Vista"), in Vista Equity Partners Perennial, L.P. ("Perennial Fund").

Vista is establishing the Perennial Fund to create platforms with controlling interests in operationally mature, middle market, upper middle market and large cap enterprise software, data and technology-enabled solutions companies. Vista's value creation in Perennial will come from the Firm's ability to identify and acquire the optimal companies, effecting combinations of these companies into platforms via full or partial Mergers and Acquisitions, and enhancing product development and processes. Vista expects to hold investments in the Perennial Fund for a longer duration than typical private equity investments.

In addition to reviewing the attractiveness of the Perennial Fund investment offering, staff conducted on-site due diligence, reference checks, a literature database search, and reviewed the potential investor base for the fund.

More information on the Perennial Fund is included as **Attachment G beginning on page 33.**

RECOMMENDATION:

Staff is requesting that the Investment Advisory Council concur with Staff's recommendation to commit up to \$200 million, or 20% of Vista Equity Partners Perennial, L.P., whichever is less, plus an additional amount not to exceed one percent of the total commitment for the payment of required charges at closing. Approval of this potential commitment is not intended to be, and does not constitute in any way, a binding or legal agreement or impose any legal obligations on the State Board of Investment and neither the State of Minnesota, the Investment Advisory Council, the State Board of Investment nor its Executive Director have any liability for reliance by Vista upon this approval. Until the Executive Director on behalf of the SBI executes a formal agreement, further due diligence and negotiations may result in the imposition of additional terms and conditions on Vista or reduction or termination of the commitment.

PRIVATE EQUITY MANAGER SUMMARY PROFILE

I. Background Data

<i>Name of Fund:</i>	Lexington CIP V Overage Program
<i>Type of Fund:</i>	Private Equity – Co-Investment
<i>Target Fund Size:</i>	\$500 million
<i>Fund Manager:</i>	Lexington Partners
<i>Manager Contact:</i>	Bart Osman Lexington Partners 660 Madison Avenue New York, NY 10065

II. Organization and Staff

Lexington Partners L.P. (the “Firm” or “Lexington”) is forming Lexington Co-Investment Partners V, L.P. (the “Partnership” or “CIP V”) and the Lexington CIP V Overage Program (“Overage Program”), to continue Lexington’s history of successfully making equity co-investments in transactions alongside leading buyout and growth sponsors in U.S. and European companies. The Partnership and Program are being formed to continue Lexington’s successful, 21-year co-investment strategy and will selectively add new limited partners to the Firm’s established global co-investment program. The Overage Program is a vehicle that will invest alongside CIP V in deals that exceed prudent diversification levels for CIP V.

Lexington is the largest independent manager of co-investment and secondary acquisition funds with more than \$48 billion in original committed capital. Lexington’s funds pursue innovative strategies in two principal areas: (i) making equity co-investments alongside leading buyout and growth capital sponsors, and (ii) providing secondary liquidity solutions to owners of private equity and alternative investments. In addition, since 1998, Lexington’s secondary funds have made select commitments to new private equity funds during their initial formation to complement Lexington’s secondary acquisition strategy. Lexington has been at the forefront of private equity innovation since principals of Lexington helped pioneer the development of the secondary market for private equity interests 27 years ago and also created one of the first independent co-investment programs 21 years ago.

Lexington’s co-investment strategy is led by Partners Bart Osman, John Loverro, David Outcalt, and James Pitt. The CIP team is located in New York City and London, complemented by Lexington offices in Menlo Park, Boston, Hong Kong, and Santiago.

III. Investment Strategy

Increasingly, limited partners are seeking co-investment opportunities to enhance their private equity programs. Co-investments offer limited partners the ability to obtain insights and gain additional exposure to attractive private equity investments, while benefiting from significantly lower economic costs including lower fees and carried interest as compared to traditional primary fund investing. The co-investment program (“CIP”) will seek to generate superior returns by co-investing alongside high-quality buyout sponsors in attractive companies primarily in the United States and Europe. CIP V and the Overage Program will also co-invest opportunistically in companies in the growth markets of Asia and Latin America.

Lexington’s co-investment program (“CIP”) was created in 1998 specifically to allow the Florida State Board of Administration (“FSBA”), the fifth largest U.S. public pension fund, to harness the co-investment opportunities generated by the FSBA’s and Lexington’s combined private equity programs. Additional limited partners joined the program over the years to capitalize on the growth in co-investment opportunities from their respective large private equity fund portfolios. CIP’s dedicated co-investment team thoroughly analyzes transactions and has the discretion and flexible investment process to respond to opportunities in a timely manner. Lexington’s distinctive partnership model enables investors to aggregate their private equity commitments to provide increased access to deals that may not be available on an individual investor basis. Currently, the program’s limited partners are six U.S. state plans and five non-U.S. investors located in Australia, Europe, and Latin America.

Lexington has been a consistent co-investor in private equity transactions since 1998, sourcing and analyzing over 2,200 co-investment opportunities from more than 450 private equity sponsors, and committing to invest \$5.4 billion in 337 companies alongside 158 sponsors. Over the past 21 years, co-investment volume has increased considerably and is now estimated by published sources to account for more than 5% of global private equity volume. Lexington expects that co-investment volume will continue to increase due to the significant benefits for both limited partners and private equity sponsors.

CIP seeks to make passive, minority co-investments alongside lead transaction sponsors. As a result, CIP does not have the same degree of day-to-day portfolio company management responsibilities as the control sponsor. This allows CIP to assemble a more diversified portfolio of investments than traditional primary funds which, the General Partner believes, reduces portfolio risk. As in prior CIP funds, CIP V and the Overage Program will seek to assemble a diversified portfolio of co-investments including by sponsor, company, company size, geography, industry, and vintage, and therefore anticipates achieving broad industry exposure.

The Overage Program will invest alongside CIP V in deals that exceed prudent diversification levels for CIP V. While the Overage Program will only invest in CIP V deals, the ultimate portfolio construction will differ. The Overage Program will still be diversified across sponsor, company, company size, geography, industry, and vintage, but it is expected to have a greater exposure to mid and large size companies when compared to CIP V.

IV. Investment Performance

Previous fund performance as of June 30, 2019 is shown below. Historical CIP performance is provided here:

Fund	Vintage Year	Total Commitments	SBI Investment	Net IRR*	Net MOIC*	Net DPI*
CIP I	1998	\$903 million	-	13.4%	1.8	1.8
CIP II	2005	\$950 million	-	4.9%	1.4	1.2
CIP III	2012	\$1.6 billion	-	19.6%	1.8	1.1
CIP IV	2016	\$2.4 billion	\$200 million	20.7%	1.2	0.1

Historical performance for Lexington's global secondary funds is provided here:

Fund	Vintage Year	Total Commitments	SBI Investment	Net IRR*	Net MOIC*	Net DPI*
LCP I	1996	\$242 million	-	13.1%	1.3	1.3
LCP II	1998	\$1.1 billion	-	8.2%	1.3	1.3
LCP III	1999	\$656 million	-	8.7%	1.3	1.3
LCP IV	2000	\$606 million	-	19.3%	1.8	1.8
LCP V	2002	\$2.0 billion	-	18.9%	1.7	1.7
LCP VI	2006	\$3.8 billion	\$100 million	6.9%	1.4	1.3
LCP VII	2010	\$7.1 billion	\$200 million	15.1%	1.6	1.3
LCP VIII	2014	\$10.1 billion	\$150 million	19.6%	1.3	0.4
LCP IX	2018	\$12.0 billion	\$150 million	N/A	N/A	N/A

Historical performance for Lexington's middle market secondary funds is provided here:

Fund	Vintage Year	Total Commitments	SBI Investment	Net IRR*	Net MOIC*	Net DPI*
LMMI I	2005	\$556 million	-	11.6%	1.6	1.5
LMMI II	2009	\$650 million	-	14.7%	1.7	1.3
LMMI III	2013	\$1.1 billion	-	18.4%	1.5	0.7
LMMI IV	2017	\$2.7 billion	\$100 million	NM	1.1	0.1

* Previous fund investments are not indicative of future results. Net IRR, Net MOIC, and Net DPI were provided by Lexington Partners.

V. Investment Period and Term

The fund will have a five-year investment period and a ten-year term, with the potential of three one-year extension periods.

This document is a summary of more detailed information provided in the Fund's Confidential Private Placement Memorandum (the "PPM"). It is qualified in its entirety by the more detailed information provided in the PPM and the Fund's Agreement of Limited Partnership.

ATTACHMENT B

PRIVATE EQUITY MANAGER SUMMARY PROFILE

I. Background Data

<i>Name of Fund:</i>	Green Equity Investors VIII, L.P.
<i>Type of Fund:</i>	Private Equity
<i>Total Fund Size:</i>	\$10 billion
<i>Fund Manager:</i>	Leonard Green & Partners, L.P.
<i>Manager Contact:</i>	Erika Spitzer 11111 Santa Monica Blvd. #2000 Los Angeles, CA 90025

II. Organization and Staff

Leonard Green & Partners, L.P. (“LGP” or the “Firm”) is forming Green Equity Investors VIII, L.P. (“GEI VIII” or the “Fund”) to make investments in market-leading companies with attractive growth prospects across a broad range of industries, with a preference for companies providing services, including consumer, business, and healthcare services, as well as retail, distribution and industrials. GEI VIII will primarily target companies based in the United States.

Based in Los Angeles, California, Leonard Green & Partners was founded in 1989 and has raised seven successive funds that have pursued an investment strategy consistent with GEI VIII.

The investment activities of the Firm are led by John G. Danhakl, Jonathan D. Sokoloff and twelve other Investment Partners. The Investment Partners have successfully executed, managed, and exited leveraged investments through numerous economic and financial cycles. The Investment Partners, who have an average tenure of 15 years at LGP, form a cohesive and stable team of private equity professionals, with Messrs. Danhakl and Sokoloff (the “Managing Partners”) having worked together in various capacities for over 30 years. Overall LGP’s investment staff is made up of 39 investment professionals, supported by 18 additional non-investment staff.

III. Investment Strategy

In GEI VIII, the Firm will continue to pursue the same core philosophy, strategy, and process it has employed successfully since its inception. LGP’s investment philosophy begins with a commitment to achieve strong investment performance in any economic environment with a focus on minimizing risk. Specifically, LGP seeks to invest in companies with (i) market-leading franchises and defensible competitive positions, (ii) attractive growth prospects, and (iii) proven management teams. This strategy encompasses not only pursuing investments

that meet this investment criteria, but also proactive sourcing of investment opportunities, rigorous due diligence, creative structuring, active involvement in value creation post-acquisition, and timely realizations.

Target Market-Leading Companies

The Fund will target investments in companies with market-leading franchises, defensible competitive positions, and successful track records. These investments are expected to be made across a broad range of industries, with a general preference for companies providing services, including consumer, business, and healthcare services, as well as retail, distribution and industrials. In GEI VIII, the Firm will remain flexible, but will primarily target equity investments ranging in size from \$400 million to \$1 billion per transaction.

Growth Investing

A core element of LGP's strategy is investing in companies the Firm believes have attractive growth prospects. To execute this strategy, the Firm spends considerable time understanding, analyzing and evaluating the drivers of historical and projected growth for potential investments as well as identifying risks to future growth. LGP's diligence process often includes analyzing the unit-level economics of multi-location business, as applicable, across industries. In addition to organic growth, LGP evaluates the ability of companies to identify, consummate and integrate acquisitions. LGP has a proven track record of assisting portfolio companies in making acquisitions that create significant shareholder value. As a result, the Firm has historically generated the majority of its returns from EBITDA growth.

Invest with Proven Management Teams

LGP believes that the quality of a management team can have a material impact on the outcome of an investment. As a result, the Partners spend considerable time evaluating the ability and depth of a management team by analyzing, among other items: (i) the track record of effectively and consistently delivering growth, (ii) historical performance compared to budget and compared to the performance of competitors, (iii) the ability to adapt strategy, cost structure, and the business plan in the face of changing market conditions, and (iv) the value created by acquisitions. LGP believes that alignment of interests with management is critical. Investments are structured to ensure that management teams are compensated largely based on company performance and have significant personal equity invested alongside the Firm.

Proactive Deal Sourcing

For 30 years, LGP has conducted a proactive and focused outbound calling effort. With disciplined persistence, LGP's senior investment team works to connect the owners and/or the senior management of leading companies in industries that have attractive investment characteristics. In particular, LGP seeks to capitalize on the Firm's market presence in certain targeted industries to identify, contact, and develop relationships with other significant industry participants, often over a period of years, before making an investment.

Value Added Post Acquisition

Post-acquisition, the Firm works in partnership with portfolio company managers to achieve growth objectives and optimize operating performance. Typically, at least two LGP representatives serve on the board of directors of each portfolio company. LGP is particularly involved in prioritizing and approving growth initiatives and evaluating add-on

acquisition opportunities. LGP also seeks to coordinate the sharing of best practices and the procurement of indirect expense items across its portfolio through the efforts of the LGP Portfolio Services team, which consists of three full-time LGP professionals. This collective effort results in collaboration across many functions, including marketing, information technology, privacy/security, human resources, and supply chain. Equally important are the measurable cost savings in logistics, insurance, travel, facilities, and other categories. The LGP approach to adding value at portfolio companies is very appealing to strong leaders of great businesses, which contributes to the Firm being a partner of choice.

IV. Investment Performance

Previous fund performance as of June 30, 2019 for the Green Equity Investors funds and the SBI's investments with previous funds, where applicable, is shown below:

Fund	Inception Date	Total Equity Commitments	SBI Investment	Net IRR*	Net MOIC*	Net DPI*
Green Equity Investors I	1990	\$216 million	-	34.8%	4.3	4.3
Green Equity Investors II	1995	\$311 million	-	14.8%	2.1	2.1
Green Equity Investors III	1999	\$1.2 billion	-	21.8%	2.4	2.4
Green Equity Investors IV	2004	\$1.8 billion	-	11.2%	2.0	2.0
Green Equity Investors V	2007	\$5.3 billion	-	18.7%	2.3	1.8
Green Equity Investors VI	2012	\$6.3 billion	\$200 million	16.4%	1.7	0.7
Green Equity Investors VII	2017	\$9.6 billion	-	8.8%	1.2	0.0

* Previous Fund investments may be relatively immature and, therefore, returns may not be indicative of future results. Net IRR and Multiple of Invested Capital (MOIC) were provided by LGP.

V. Investment Period and Term

The investment period is six years from the initial Management Fee drawdown. The term is ten years from the date of the initial Management Fee drawdown, subject to a one-year extension at the General Partner's discretion and two further one-year extensions with the consent of the Advisory Committee.

ATTACHMENT C

PRIVATE EQUITY MANAGER SUMMARY PROFILE

I. Background Data

<i>Name of Fund:</i>	Madison Dearborn Capital Partners VIII-A, L.P.
<i>Type of Fund:</i>	Private Equity – Buyout
<i>Target Fund Size:</i>	\$4.5 billion
<i>Fund Manager:</i>	Madison Dearborn Partners VIII-A, L.P.
<i>Manager Contact:</i>	David Pequet 70 West Madison Street Chicago, Illinois 60602

II. Organization and Staff

Madison Dearborn Partners (“Madison Dearborn”, “MDP”, or the “Firm”) is forming Madison Dearborn Capital Partners VIII (the “Fund” and, together with its parallel funds, “Fund VIII”) to make buyout and growth equity investments in established middle and upper middle-market companies located primarily in the United States.

MDP was founded in 1992 and operates out of a single office in Chicago. The firm has a total of 43 investment professionals led by 20 managing directors with John Canning Jr. serving as Chairman, and Paul Finnegan and Samuel Mencoff as co-CEOs. The average tenure of the 20 managing directors at MDP and the predecessor firm, First Chicago Venture Capital, is 17 years. Since MDP’s formation in 1992, the firm has invested \$19.7 billion in 144 companies across seven prior investment funds.

III. Investment Strategy

Madison Dearborn seeks to invest in companies that are well-positioned to achieve substantial growth and value appreciation through carefully defined value creation initiatives. MDP will typically make equity and equity-related investments ranging from \$100 million to \$400 million in businesses with enterprise values ranging from \$100 million to \$2.5 billion. The Firm is organized in the five industry verticals where it transacts: Basic Industries; Business & Government Software and Services; Financial & Transaction Services; Health Care; and Telecom, Media & Technology Services (“TMT Services”). MDP believes that its reputation and extensive experience in each of these sectors provide a significant competitive advantage with respect to: (i) sourcing; (ii) early assessment of investment opportunities; (iii) due diligence; and (iv) creating value in portfolio companies post close.

MDP focuses on the middle and upper-middle market because the Principals believe it allows MDP to fully leverage its unique sourcing angles to generate deal flow away from the competitive mainstream. This segment of the market is also one where the Firm believes it can effectively implement change in companies during its ownership. Furthermore, companies in this size range often have multiple exit alternatives, including having the scale and relevance attractive to corporate buyers and the public markets, while also retaining the flexibility to sell to financial investors.

As with prior funds, Fund VIII will target both value-oriented mature companies and growth-oriented businesses with established operating track records. MDP employs an investment style that focuses primarily on the quality of the business, its prospects and its leadership and only secondarily on the type of investment structure. Having the experience and expertise to be flexible in terms of stage and structure provides the Firm with a broad opportunity set, and this flexibility allows the Principals to approach owners and management teams with a wider range of solutions. The Firm has deployed approximately 70% of its capital in buyout transactions and approximately 30% in growth equity transactions across its seven funds, and the expectation is that Fund VIII will ultimately have a similar composition.

Madison Dearborn's history in Chicago dates back to the early 1980s when the founders of MDP began investing on behalf of First Chicago Venture Capital. Over the last four decades, the Principals have built a leading private equity franchise based in the Midwestern United States. The Firm's strong reputation and extensive network of contacts and relationships in the region provide a clear competitive advantage in sourcing transactions. The Principals are deeply involved in the Chicago and Midwest business, civic, and philanthropic communities, including representation on the boards of many of the region's prominent universities, hospitals and museums as well as business, economic, and charitable organizations. This extensive network of relationships leads to deal flow with limited or no competition and often provides MDP with a decisive competitive angle when other potential buyers are involved. Having invested in 33 companies located in the Midwest since the Firm's formation in 1992 and having reviewed several hundred investment opportunities in the region, the Principals have built an extensive network of relationships with executives and owners over the years.

IV. Investment Performance

Previous fund performance as of June 30, 2019 is shown below. Historical MDP performance is provided here:

Fund	Vintage Year	Total Commitments	SBI Investment	Net IRR*	Net MOIC*	Net DPI*
MDCP I	1992	\$550 million	--	28.1%	3.4x	3.4x
MDCP II	1996	\$925 million	--	22.0%	2.3x	2.3x
MDCP III	1999	\$2,220 million	--	8.6%	1.5x	1.5x
MDCP IV	2000	\$4,036 million	--	14.0%	1.9x	1.9x
MDCP V	2006	\$6,515 million	--	7.1%	1.6x	1.6x
MDCP VI	2008	\$4,057 million	--	23.7%	2.1x	1.6x
MDCP VII	2015	\$4,435 million	\$100 million	10.9%	1.2x	0.1x

* Previous fund investments are not indicative of future results. Net IRR, Net MOIC, and Net DPI were provided by Madison Dearborn Capital Partners.

V. Investment Period and Term

The fund will have a six-year investment period and a ten-year term, with the potential of three one-year extension periods.

This document is a summary of more detailed information provided in the Fund's Confidential Private Placement Memorandum (the "PPM"). It is qualified in its entirety by the more detailed information provided in the PPM and the Fund's Agreement of Limited Partnership.

DISTRESSED/OPPORTUNISTIC MANAGER SUMMARY PROFILE

I. Background Data

<i>Name of Fund:</i>	Marathon Distressed Credit Fund, L.P.
<i>Type of Fund:</i>	Distressed Corporate Credit
<i>Total Fund Size:</i>	\$2 billion
<i>Fund Manager:</i>	Marathon Asset Management, L.P.
<i>Manager Contact:</i>	James Atwater One Bryant Park, 38th Floor New York, New York 10036

II. Organization and Staff

Marathon Asset Management was formed in 1998 by Bruce Richards (Chairman and Chief Executive Officer) and Louis Hanover (Chief Investment Officer), to seek attractive absolute returns through investments in the global credit markets, with long-term goal of building a world-class asset management platform. Marathon's core competency is opportunistic investing in the global corporate, emerging market and structured credit markets based on fundamental, bottom-up research across distinct investment funds, managed vehicles and separate accounts. Marathon Asset Management is a global credit manager with approximately \$17.3 billion of capital under management as of July 31, 2019. Marathon employs approximately 170 employees globally, approximately 84 of whom are investment professionals. Marathon is headquartered in New York with investment offices in London and Singapore.

Marathon is owned by the Partners of the Firm, which consist of Bruce Richards (Chairman and Chief Executive Officer), Louis Hanover (Chief Investment Officer), Andrew Rabinowitz (President & Chief Operating Officer), Jamie Raboy (Chief Risk Officer), Andrew Springer (Head of Structured Credit), Gabriel "Gaby" Szpigel (Head of Emerging Markets), Andrew Brady (Co-Head of Corporate Credit) and Jeff Jacob (Co-Head of Corporate Credit).

In June 2016, Blackstone Strategic Capital Holdings Fund, a vehicle managed by Blackstone Alternative Asset Management, acquired a passive, minority interest in the Investment Manager. The Principals continue to maintain autonomy over the Investment Manager's business management, operations and investment processes following this transaction.

III. Investment Strategy

Marathon will look to construct a portfolio of distressed, dislocated, and restructuring corporate credit opportunities in complex situations with attractive risk-adjusted return

characteristics. Core holdings of the Fund will include bankruptcy reorganizations, liquidations, rescue lending, distressed exchanges, debtor-in-possession financings, and dislocated credit. Marathon intends to target investments in stressed and deeply distressed companies that are often going through or preparing for some form of a restructuring process. Marathon's investment team seeks to identify the portion of the capital structure with the greatest asymmetry of potential reward relative to their fundamental view of the risk of the investment and in the context of the most likely outcome of the restructuring process. Marathon often takes an active role in a restructuring process, such as leading creditor's committees, when appropriate to advocate an outcome consistent with their investment view.

Additionally, Marathon will look to invest in dislocated or mispriced capital structures where there is no pending or ongoing credit event, but the price of a particular capital instrument does not reflect Marathon's view of the underlying risk of the investment. These investments may involve outright long-positions in individual loans or securities or investments in multiple parts of a single capital structure that we believe will diverge or converge from their current trading levels.

Marathon seeks to identify corporate credit-related events, such as corporate liability management activities or deleveraging and improving corporate credit profiles that are not reflected in a security or loans trading levels. These types of events could include activities such as new equity capital raises, discounted debt retirements, maturity extension risks or companies experiencing fundamental earnings improvements.

Marathon has been investing in distressed securities since its inception in 1998, over which time the investment team has been responsible for committing over \$30 billion to distressed investments. Marathon's corporate credit investment team has an average of 18 years of experience investing in bankruptcy reorganizations, dislocated credit, distressed exchanges, rescue loans, debtor-in-possession loans, liquidations and sovereign restructurings.

Since 2008, Marathon has raised capital for over 10 closed-end draw down vehicles to take advantage of specific market opportunities. However, it has been over 10 years since Marathon raised a dedicated distressed corporate investment vehicle in the U.S. as the firm has sought to identify the best risk-adjusted return across asset classes and geographies. The firm believes the opportunity for strong risk-adjusted returns in distressed corporate credit is imminent and has created a fund structure to take advantage of current opportunities as well as a broader set of opportunities following market dislocation.

Investment Triggers

Marathon may invest up to 30% of its aggregate capital commitments prior to the occurrence of an Investment Trigger (as defined below) but may not invest in excess of 30% of capital commitments, in each case measured at the time of investment, until an Investment Trigger has occurred unless the investment manager receives the consent of the Advisory Committee. Once an Investment Trigger has occurred, the Partnership may continue to make investments in excess of 30% of capital commitments, regardless of whether the criterion of any Investment Trigger continues to be satisfied.

“Investment Trigger” means:

- High Yield spreads reach a level of +750bps or more based on the Bank of America Merrill Lynch High Yield Index (H0A0 Index, sourced from Bloomberg); or
- 20% of bonds in the Bank of America ML High Yield index (sourced from Bloomberg) trade at a price of <80% of par; or
- The trailing 12 month High Yield default rate reaches 4% or higher as reported by Bank of America Global Research.

IV. Investment Performance

Previous fund performance as of June 30, 2019 is shown below:

Fund	Vintage Year	Total Commitments	SBI Investment	Net IRR*	Net MOIC*	Net DPI
Corporate Debt Opportunities Fund	2009	\$400 Million	-	16.7	2.0x	1.91x
Public Private Investment Partnership	2009	\$949 Million	-	24.6%	1.8x	1.7x
European Credit Opportunity I	2011	\$974 Million	-	9.1%	1.3x	1.19x
European Credit Opportunity Fund II	2014	\$1.1 Billion	-	9.6%	1.5x	.68x
European Credit Opportunity Fund III	2015	\$692 Million	-	15%	1.4x	0x

* Previous fund investments are not indicative of future results. Net IRR and Net MOIC were provided by Marathon.

V. Investment Period and Term

The Fund’s investment horizon is based on its 30-month Investment Period and 30-month Harvest Period. The conclusion of the Investment Period and/or the Harvest Period may be extended for a one-year period in the sole discretion of the General Partner and for an additional one-year period with the consent of the Advisory Committee.

This document is a summary of more detailed information provided in the Fund’s Confidential Private Placement Memorandum (the “PPM”). It is qualified in its entirety by the more detailed information provided in the PPM and the Fund’s Agreement of Limited Partnership.

ATTACHMENT E

REAL ESTATE MANAGER SUMMARY PROFILE

I. Background Data

<i>Name of Fund:</i>	Rockwood Capital Real Estate Partners Fund XI, L.P.
<i>Type of Fund:</i>	Real Estate – Value-Add
<i>Target Fund Size:</i>	\$1.25 billion
<i>Fund Manager:</i>	Rockwood
<i>Manager Contact:</i>	Tara McCann 140 East 45 th Street New York, NY 10017

II. Organization and Staff

Rockwood Capital, LLC (“Rockwood” or the “Firm”) is forming Rockwood Capital Real Estate Partners Fund XI, L.P. (the “Fund” or “Fund XI”) to make value add investments in commercial real estate. Fund XI will continue Rockwood’s real estate investment activities which are focused on the acquisition of equity or debt interests in properties, principally in the United States, across a broad range of geographical markets and product types.

Rockwood was formed in 1995 by Neil Smith, Ed Kavounas, Walter Schmidt, Bob Gray, and Peter Falco. The firm remains 100% privately-owned with nine active partners and is lead by a management committee consisting of Walter Schmidt, Tyson Skillings and Peter Kaye. As of June 2019, the firm managed nearly \$8.4 billion of equity commitments across its funds and separate accounts. Rockwood is headquartered in New York City and has additional offices in San Francisco and Los Angeles with approximately 73 employees focused on real estate.

Since inception, Rockwood has invested approximately \$30.7 billion in gross asset value in equity and debt investments across a broad spectrum of property types. Of the over 400 assets Rockwood has purchased, the majority are office, multifamily, hotel, and retail assets. Approximately 80% of the current assets are office or multifamily.

III. Investment Strategy

Rockwood Capital Real Estate Partners Fund XI is the latest offering in a series of Rockwood-sponsored “value creation” real estate investment vehicles that date back to 1990. The Fund will focus its investment activities on real estate and real estate related assets within the United States. It will target office and other workspace, multifamily, and hotel assets. Fund XI will employ active asset management to reposition, re-lease, rehabilitate, and/or develop real estate assets, but will not pursue investment opportunities predicated on significant land entitlement.

The Fund will seek to make investments across Boston, New York City, Washington D.C. Miami, Austin, Denver, Phoenix, San Diego, Los Angeles, San Francisco, Portland and Seattle. These target markets are major U.S. metropolitan areas with highly educated workforces and high household incomes, and where growth is being driven by knowledge-based industries that are prospering from technological advances, globalization, and other socioeconomic trends. Rockwood targets mixed use locations with a focus on the following: collective intelligence (educated labor force and strong research/education institutions), growth and capital flows, infrastructure / public transit / walkable, and culture.

Rockwood believes that there is significant opportunity for the Fund to create value by transforming under-improved properties with certain positive attributes into valuable properties that will attract multiple buyers when Rockwood decides to sell. Fund XI will look to acquire well-located assets with upside potential that can be realized through renovation, re-tenanting, redevelopment, development and/or improvement in property management and operations. Examples of such investments could include:

- Office: Renovating office buildings with “good bones” to appeal to today’s tenants by converting largely private office space to open floor plans, improving internet connectivity, adding or enhancing common areas for tenant recreation, and offering tenant concierge services;
- Multifamily: Renovation/redevelopment of Class A or B assets in locations with outstanding demographics and select development of state-of-the-art product;
- Hotel: Repositioning a higher or select-service hotel by upgrading common areas and guest rooms, changing the hotel branding and replacing the management team; and/or
- Retail: Reposition a pedestrian-friendly urban retail asset in areas with strong demographics.

Fund XI will pursue a mix of assets, some with income in place and others where the business plan will require some time to put income in place. In so doing, the Manager will seek to implement its risk/return and “speed to income” focused “bucket classification system” on behalf of the Fund to construct a diverse and balanced portfolio that has a combination of current return and value creation upside. More specifically, each investment, at inception and over time as value creation plans are implemented, will be classified into one of three “risk buckets”. The first risk bucket will be comprised of assets with an income stream already in place that Rockwood will endeavor to enhance, either through growth of the income or improvement in the income (e.g., improvement in duration or credit). The second risk bucket will be comprised of assets that have more modest in-place income and require more comprehensive value creation strategies (relative to the first risk bucket) to create value and stabilize income (expected within the first 12 to 24 months of investment). The third risk bucket will be comprised of substantially vacant buildings and development opportunities, generally with no current cash flow at acquisition and typically require 24 to 36 months to put income in place. Investments made by the Fund will be reclassified over time. Generally, investments will move from higher risk buckets to lower risk buckets as business plans are implemented and income is put into place.

IV. Investment Performance

Previous fund performance as of June 30, 2019 is shown below:

Fund	Vintage Year	Total Commitments	SBI Investment	Net IRR*	Net MOIC*	Net DPI*
Fund I	1990	\$266.1 million	--	19.6%	1.7x	1.7x
Fund II	1995	\$82.6 million	--	30.7%	2.2x	2.2x
Fund III	1998	\$221.0 million	--	14.7%	2.1x	2.1x
Fund IV	2000	\$366.3 million	--	24.2%	1.8x	1.8x
Fund V	2003	\$460.0 million	--	12.1%	1.4x	1.4x
Fund VI	2005	\$657.0 million	--	1.4%	1.1x	1.1x
Fund VII	2006	\$1,094.0 million	--	N/A	0.7x	0.5x
Fund VIII	2008	\$963.9 million	--	19.1%	1.6x	1.6x
Fund IX	2012	\$678.0 million	--	13.9%	1.4x	1.0x
Fund X	2015	\$1,100.0 million	\$100 million	4.3%	1.1x	0.1x

* Previous fund investments are not indicative of future results. Net IRR, Net MOIC, and Net DPI were provided by Rockwood.

V. Investment Period and Term

The fund will have a three-year investment period and a nine-year term, with the potential of two one-year extension periods.

This document is a summary of more detailed information provided in the Fund's Confidential Private Placement Memorandum (the "PPM"). It is qualified in its entirety by the more detailed information provided in the PPM and the Fund's Agreement of Limited Partnership.

ATTACHMENT F

PRIVATE CREDIT MANAGER SUMMARY PROFILE

I. Background Data

<i>Name of Fund:</i>	HPS Mezzanine Partners 2019, L.P.
<i>Type of Fund:</i>	Private Credit
<i>Total Fund Size:</i>	\$8 Billion
<i>Fund Manager:</i>	HPS Investment Partners, LLC
<i>Manager Contact:</i>	Adam Jordan 1320 Main Street, Suite 300 Columbia, SC 29201

II. Organization and Staff

HPS Investment Partners, LLC (“HPS”) formerly known as Highbridge Principal Strategies, LLC, has established the Fund, a Delaware Limited Partnership, to invest in privately negotiated mezzanine strategies. HPS Mezzanine Management 2019, LLC, a subsidiary of HPS, will serve as the investment manager for the Fund.

HPS is a leading global investment firm with a focus on non-investment grade credit. Established in 2007, HPS has 139 investment professionals and over 340 total employees as of October 1, 2019, and is headquartered in New York with 10 additional offices globally. HPS was established as a unit of Highbridge Capital management, LLC (“HCM”) a subsidiary of J.P. Morgan Asset Management (“JPMAM”). In March 2016, the principals of HPS acquired HPS from JPMAM, which retained HCM’s hedge fund strategies. As of October 1, 2019, HPS had approximately \$58 billion of assets under management.

III. Investment Strategy

HPS will seek to generate current returns and long-term appreciation through investments in mezzanine securities, which are high-yielding fixed and floating rate debt and debt-like instruments. Mezzanine securities may include subordinated debt (such as second lien and unsecured debt), preferred equity and convertible securities and may be accompanied by equity-related securities (such as options or warrants) and/or select common equity investments. Mezzanine securities typically represent the portion of the issuer’s capital structure between senior secured debt and common equity. They are generally senior in rank to common equity but subordinated to any senior secured indebtedness and are typically used by companies as growth capital to fund acquisitions, refinance existing indebtedness or recapitalize their balance sheets. HPS believes mezzanine investments offer investors the

combination of a high contractual coupon and current income, with significant downside protection through highly negotiated agreements with customized covenants.

HPS believes there is an attractive opportunity to provide mezzanine financing to large companies (\$300 million weighted average EBITDA in prior fund) that prefer or need this type of funding as an alternative to traditional financing sources. Global regulatory actions stemming from the 2008 financial crisis have significantly increased capital requirements and costs for banks to underwrite and syndicate non-investment grade credit commitments. Banks' unwillingness to take underwriting risk for subordinated debt has led them to focus on very large, existing issuers and increase the "flex" provisions in their commitment papers, allowing them to significantly change pricing and terms of a new issue to help it clear the market. These actions have narrowed the group of issuers that are able to or want to access the publicly syndicated credit markets and, in combination with ongoing market volatility, have led corporate issuers to seek dedicated private credit platforms that invest and hold the issuers' securities for the long term. A mezzanine financing solution allows issuers to: (a) avoid the uncertainty and increasing cost of obtaining syndicated financing commitments, (b) negotiate customized structures and terms, (c) work collaboratively with a single long-term financing provider, (d) act quickly if an opportunity requires financing in a short period of time, (e) limit burdensome public reporting/maintain confidentiality of financial information and (f) minimize management team distraction and time associated with a syndicated financing.

HPS believes that the diversified sourcing, scale, flexibility of capital and experience of the investment team allow it to offer creative capital solutions to companies while providing investors with attractive returns and significant downside protection. The diversity and breadth of its sourcing platform combined with a favorable demand environment for non-investment grade capital has allowed HPS to remain highly selective on investment opportunities and have limited dependence on any single industry or deal source. The Fund intends to leverage HPS's global credit platform and relationships to continue to source attractive investments directly from private and public companies as well as private equity-backed businesses.

HPS generally intends to pursue investments where the members of the Mezzanine Team possess a deep knowledge of the sector and the company, generally focusing on companies that demonstrate, or are expected to develop: (i) sustainable advantages and meaningful barriers to entry, (ii) strong market share, (iii) substantial EBITDA margins and free cash flow and (iv) proven, experienced management teams. HPS expects to be the sole or lead investor in each investment and will consider a variety of transactions including recapitalizations, refinancing, restructurings, acquisitions and leveraged buyouts.

The Fund will have global investments capabilities but will focus on large-cap companies in North America and Europe, with 60% to 80% of the portfolio anticipated to be in North America.

IV. Investment Performance

Previous fund performance as of June 30, 2019 for HPS Mezzanine funds is shown below:

Fund	Vintage Year	Total Commitments	SBI Investment	Net IRR*	Net MOIC*	Net DPI*
Mezzanine Partners I	2008	\$2.1 Billion	-	6.6%	1.3x	1.1x
Mezzanine Partners II	2012	\$4.4 Billion	-	14.8%	1.5x	1.1x
Mezzanine Partners III	2016	\$6.6 Billion	-	12.9%	1.2x	0.1x

* Previous fund investments are not indicative of future results. Net IRR, MOIC and DPI were provided by HPS.

V. Investment Period and Term

The investment period will be four years from the first closing date. The term of the fund will be ten years from the first closing date.

This document is a summary of more detailed information provided in the Fund's Confidential Offering Memorandum (the "OM" or "PPM"). It is qualified in its entirety by the more detailed information provided in the PPM and the Fund's Agreement of Limited Partnership.

PRIVATE EQUITY MANAGER SUMMARY PROFILE

I. Background Data

<i>Name of Fund:</i>	Vista Equity Partners Perennial, L.P.
<i>Type of Fund:</i>	Private Equity
<i>Total Fund Size:</i>	\$3 billion
<i>Fund Manager:</i>	Vista Equity Partners Management, LLC
<i>Manager Contact:</i>	Julian Bostic 2 Prudential Plaza, 180 North Stetson Ave Suite 4000 Chicago, IL 60601

II. Organization and Staff

Vista Equity Partners, (“Vista” or the “Firm”) is forming Vista Equity Partners Perennial, L.P. (the “Fund”) to acquire a portfolio of operationally mature enterprise software businesses for combination and assembly into a platform solutions to help digitize large and growing industrial verticals on a global scale.

Vista was formed in 2000 by Robert F. Smith, Stephen Davis and Brian Sheth to pursue buyout transactions of enterprise software businesses and technology-enabled solutions companies. Currently the Firm has over 460 employees, including over 147 investment professionals and over 135 members of the Vista Consulting Group (“VCG”). Vista maintains offices in Austin, Chicago, Oakland, San Francisco and New York. Over its 19 year history, Vista has raised over \$52 billion and made over 290 acquisitions in the enterprise software, data and technology-enabled solutions sector.

The Perennial strategy will be executed by a fully dedicated team comprised of Investment Principals James Hickey and Burke Norton, Operating Principal Vince Burkett, and Vice President Anand Anbalagan. Vista’s executive team of Robert Smith, Brian Sheth, and David A. Breach will also be actively involved in the strategy. The dedicated team will be supported by the broader Vista platform’s associates and analysts, as well as the Vista Consulting Group.

III. Investment Strategy

Vista Perennial Fund will seek to create platforms with controlling interests in operationally mature, middle market, upper middle market and large cap enterprise software, data and technology-enabled solutions companies. To execute the Fund’s strategy, target companies are expected to be mature from an operational perspective, running at high levels of efficiency where the traditional approach taken by other Vista funds of operational

transformation is not necessary. Vista's value creation in Perennial will come from the Firm's ability to identify and acquire the optimal companies, effecting combinations of these companies into platforms via full or partial M&A, and enhancing product development and processes.

Value Creation Opportunities:

While Vista funds have historically invested in portfolio companies requiring significant operational transformation to unlock their potential value, companies targeted by Perennial are not expected to require significant operational transformation due to their operational maturity. Instead, Vista intends to create value for the Fund through the following:

- **Vertical Identification:** Appropriate industry verticals will be identified by analyzing a number of factors including: large end markets; numerous and highly fragmented software providers; customers seeking workflow digitization and willingness to invest in such initiatives; industries where software is embedded in critical workflows; and industries where workflows are conducive to digitization. Of the 68 industries and 157 sub-industries within the Global Industry Classification Standard ("GICS"), Vista has identified 15 industry verticals that could be of interest to the Perennial strategy, of which five may be immediately actionable.
- **Asset Identification:** Vista will target companies in specific industry verticals that have strong customer and revenue retention, high levels of contractually recurring revenue, strong competitive positioning, operational maturity with in-place best practices, and attractive EBITDA margins.
- **Add-on Acquisition:** In addition to core asset acquisition, combination and integration, Vista intends to identify and execute add-on acquisitions that provide complimentary offerings to existing core products and services.
- **Vertical Integration:** Workflow digitization within an industry such as education or real estate requires consolidation and integration of various point solutions. Perennial will leverage Vista's ability to identify and acquire the workflow solutions within a given industry, as well as its operational ability to integrate these solutions into one product offering.
- **Horizontal Integration:** Integration of workflows across industries is also a significant opportunity for the Fund. For example, the consolidation of Customer Relationship Management solutions across the Real Estate, Education or Insurance sectors could result in the creation of a single, best-in-class solution and significantly increase addressable market opportunities.
- **Product Development:** Vista intends to employ a flexible product development model, with the ability to develop products on a standalone basis or with an integrated approach across a combined industry vertical platform. Vista will leverage its operational expertise when deciding whether to integrate solutions, determining appropriate go-to-market strategies, running technology assessment models of new products and assessing technology combination issues to best serve each targeted industry vertical.

Big Data & Advanced Technologies

More recently, Vista has begun establishing expertise in leveraging the value of data and adopting advanced technologies including cognitive computing, artificial intelligence and machine learning within its existing portfolio of companies across its different funds. Vista believes the targeted companies will be able to contribute complimentary datasets to create a data platform that will help create value for customers.

- *Data consolidation:* While companies targeted by the Fund are expected to hold vast amounts of data, few have considered their datasets holistically – or with other datasets to enhance insights, resulting in predictive or prescriptive analysis. Vista believes data monetization strategies exist within these companies and that value exists from improved efficacy and richer insights by consolidating supplementary or complimentary datasets of multiple operationally mature companies.
- *Combined advanced technology initiatives:* Vista believes advanced technologies are quickly becoming the foundation for future transformation of businesses around the globe. When applied to platforms of larger scale and to larger volumes of data, the potential impact is greater than when applied independently to each of the constituent companies. Vista believes it has identified an opportunity for value creation via increased automation as well as enhanced and new products that will emerge from applying these technologies.

IV. Investment Performance

Previous fund performance as of June 30 2019 for Vista Equity Partners Flagship funds is shown below. Note that Vista began managing third-party capital in Vista Equity Partners (VEP) Fund II:

Fund	Vintage Year	Total Commitments	SBI Investment	Net IRR*	Net MOIC*	Net DPI*
VEP II	2000	\$1 billion	-	29.2%	2.7	2.7
VEP III	2007	\$1.3 billion	-	27.4%	2.5	2.4
VEP IV	2011	\$3.5 billion	-	17.8%	2.0	1.3
VEP V	2014	\$6.0 billion	-	23.8%	1.9	0.8

* Previous Fund investments may be relatively immature and, therefore, returns may not be indicative of future results. Net IRR and Multiple of Invested Capital (MOIC) were provided by Vista.

V. Investment Period and Term

The assembly period will be eight years from the commencement of investment activities. The Fund does not have a fixed term. However, the General Partner may at any time pursue any of the following liquidity options: (i) a public offering, (ii) issuance of stock or equity interests, (iii) a securitization of future income streams, (iv) a sale or transfer of assets, or (v) any other transaction that achieves a similar liquidity effect for the Partners. In addition, at the expiration of the assembly period and each four-year anniversary thereof, the General Partner will make reasonable efforts to assist any Limited Partner in transferring or selling its interest in the Fund.

Proposed Statutory Amendments to Investment Authority

This page intentionally left blank.

DATE: November 12, 2019

TO: Members, Investment Advisory Council

FROM: SBI Staff

SUBJECT: Proposed Statutory Amendments to Investment Authority

Staff is recommending that the Investment Advisory Council endorse a legislative amendment which would authorize investments in co-investments and separate accounts through the SBI's Private Markets program, and bank loans through the SBI's Public Markets program.

Co-investments and Separate Accounts

Each quarter, the Private Markets team considers numerous investment opportunities for the State Board of Investment. Most of this deal flow represents the traditional commingled limited partnership fund structures. Over the past decade, large institutional investors have negotiated new investment arrangements in the form of co-investments and separate accounts with more favorable economic terms. In most cases, these situations represent investment opportunities similar to traditional fund structures but with lower fees and lower carried interest. The main difference between traditional structures and co-investments/separate accounts is that the latter may be customized by the general partner for larger limited partners such as the SBI. Investing in co-investments or separate accounts will result in significant investment savings versus being limited to investing in the traditional fund structures only.

Staff is recommending proposed legislation which permits investments in separate accounts and co-investment opportunities and exempts these investments from certain restrictions. These investments can benefit the portfolio in the following ways:

- (i) Provide access to the same type of underlying investments as a commingled vehicle, but at lower cost;
- (ii) Generate attractive risk-adjusted returns through investments that cannot easily be made via a commingled vehicle; and
- (iii) Allow for the SBI to impose investment restrictions and/or guidelines that protect the interests of the plan, or allow for the SBI to construct a unique portfolio specific to the SBI's needs.

For instance, a General Partner may be unwilling to grant significant fee concessions on a commitment to a main commingled fund, but may instead be willing to manage a separate pool of capital for the SBI alongside the SBI's commitment to the main fund on a lower-fee or no-fee

basis, and without carried interest. In this hypothetical example, by committing \$70 million to the main fund and \$30 million to the separate pool, rather than \$100 million to the comingled fund, the SBI would substantially lower both the management fees charged on the total amount of capital, as well as the carried interest shared with the General Partner. Depending on the structure of the separate pool, the SBI may be the only limited partner in the fund or may participate in a co-investment opportunity with one or more additional limited partners.

If these investment opportunities are prudent and provide economic benefits that would accrue to plan participants, it is within the Executive Director's fiduciary duty to consider them. Currently, however, Minn. Stat. § 11A.24, subd. 6(b) forecloses the ability to participate in separate accounts and most co-investment opportunities because the SBI would hold up to a 100% interest in the investment vehicle and the vehicle may not have four other participants. To address this issue, the proposed amendment exempts these investments from the requirements that the SBI's participation in the investment vehicle be limited to 20% and that the investment have four unrelated owners. Importantly, the amendment preserves the requirement that the SBI participate in investment vehicles that have limited liability, which would limit the SBI's co-investment opportunities to indirect ownership through appropriate investment vehicles. Finally, any investments in separate accounts or co-investment opportunities would count against the 35% portfolio limitation for alternative investments.

Bank Loans

Staff is seeking the authority to invest in bank loans to further diversify the SBI's portfolio by allowing investment in companies and structures that cannot be accessed in either the high yield or investment grade corporate market. Because bank loans (also referred to as leveraged loans) are not considered securities, the SBI does not currently have statutory authority to invest the asset class. With additional authority the SBI could invest in bank loans via both the primary and secondary market.

Bank loans are a unique asset class with both offensive and defensive characteristics. Staff believes that an allocation to bank loans – either on a stand-alone basis or as part of a fixed income asset allocation product such as Multi-asset Credit or Core Plus – would provide an opportunity for enhanced yields and broader diversification within the SBI's fixed income investment program.

The bank loan market has grown steadily since the mid-1990s, and outstanding loans now exceed \$1.4 trillion, making the bank loan market as large as the high yield bond market (see Figure 1).

Figure 1. Bank loan vs. high yield market size, \$ billions: 1999-2019

Note: As of 08/2019. Includes US and European High Yield Bonds and Leveraged Loans
Source: JPM

Bank loans are loans provided by lenders to companies in order to support mergers and acquisitions, recapitalization of the balance sheet, and other activities within the company. Bank loans are typically the senior-most debt in a company’s capital structure and in most cases are secured by collateral and have covenants which require the borrower to maintain certain financial metrics.

The term to maturity for a bank loan will vary by borrower but is usually five to seven years. Bank loans typically pay a floating rate coupon based on short-term reference rate, such as 3-month LIBOR, plus a spread. The spread on a particular bank loan will vary based on credit quality of the company and conditions in the market at the time of issuance. Bank loans are typically repayable at par at any time by the borrower without penalty.

While the typical borrower has a leveraged capital structure and tends to be smaller in size than an average investment grade issuer, bank loans’ senior placement in the capital structure, collateral security and (commonly) covenants can make loans attractive compared to high yield bonds, which are largely unsecured. In addition, the floating rate nature of bank loans reduces interest rate risk and can provide inflation protection.

As bank investment products, the bank loan market is overseen by banking regulators, including the Office of the Comptroller of the Currency (OCC), the FDIC and the Federal Reserve. New issue bank loans are marketed via an offering memorandum (versus a prospectus for SEC-registered securities) and may be offered only to institutional investors. There is a robust secondary market for trading bank loans between institutional investors, with investors usually trading through dealer desks at the large underwriting banks.

Attachment A includes sample language for a proposed amendment to Minn. Stat. § 11A.24, subd. 6(a) and (b).

RECOMMENDATION:

Staff is requesting that the Investment Advisory Council concur with Staff's recommendation to pursue proposed legislation permitting Private Market investments in separate accounts and co-investment opportunities, and exempt these investments from restrictions which currently prohibit separate accounts; and to authorize the use of bank loans by the SBI.

ATTACHMENT A

PROPOSED AMENDMENT

Minn. Stat. § 11A.24, subd. 6(a) and (b)

(a) In addition to the investments authorized in subdivisions 1 to 5, and subject to the provisions in paragraph (b), the state board is authorized to invest funds in:

(1) equity and debt investment businesses through participation in limited partnerships, trusts, private placements, limited liability corporations, limited liability companies, limited liability partnerships, and corporations;

(2) real estate ownership interests or loans secured by mortgages or deeds of trust or shares of real estate investment trusts through investment in limited partnerships, bank-sponsored collective funds, trusts, mortgage participation agreements, and insurance company commingled accounts, ~~including separate accounts~~;

(3) resource investments through limited partnerships, trusts, private placements, limited liability corporations, limited liability companies, limited liability partnerships, and corporations; and

(4) investment vehicles that are co-investments or separate accounts;

~~(4) (5)~~ international securities; **and**

(6) bank loans

(b) The investments authorized in paragraph (a) must conform to the following provisions:

(1) the aggregate value of all investments made under paragraph (a), clauses (1) to ~~(3)~~ **(4)**, may not exceed 35 percent of the market value of the fund for which the state board is investing;

(2) there must be at least four unrelated owners of the investment **vehicle** other than the state board for investments made under paragraph (a), clause (1), (2), or (3);

(3) state board participation in an investment vehicle is limited to 20 percent thereof for investments made under paragraph (a), clause (1), (2), or (3); and

(4) state board participation ~~in a limited partnership~~ **in an investment vehicle** does not include a general partnership interest or other interest involving general liability. The state board may ~~not engage in any activity as a limited partner~~ **not participate in any investment vehicle in a manner** which creates general liability.

DATE: November 12, 2019

TO: Members, Investment Advisory Council

FROM: SBI Staff

SUBJECT: Update on Stable Value Fund Review

Stable Value Review

The Stable Value Fund (formerly the Fixed Interest Account) opened in November 1986 and was changed to its current approach in November 1994, at which time the current manager, Galliard Capital Management, was hired to manage the account. The participants in the Minnesota Deferred Compensation Plan, Health Care Savings Plan, Unclassified Retirement Plan, and the Public Employees Retirement Association Defined Contribution Plan are eligible to invest in the fund. In total, the Stable Value option has over \$1.5 billion in assets as of September 30, 2019.

During the past year, it was announced that several members of Galliard's senior management team, including three of the remaining four managing partners, would be retiring soon. Galliard has made several significant organizational changes as a result of the announcement.

Given that there has not been a major review of the program for some time, staff is in the process of reviewing the Stable Value Program. As part of this process, staff is reviewing several managers including the incumbent, Galliard, to determine if it is advisable to make any changes to the program. All the firms being reviewed have experience with large institutional clients, have over five years of managing a portfolio with the current investment teams, and have the ability to sub-advise a portion of the fixed income portfolio, if warranted.

The current plan is to bring the results of the review and any recommendations to the Board and the Investment Advisory Council at the February 2020 meetings.

DATE: November 12, 2019

TO: Members, Investment Advisory Council

FROM: SBI Staff

SUBJECT: Discussion of Uninvested Allocation

As everyone is aware, a portion of the SBI Combined Funds asset allocation exists as a result of the private markets allocation being less than the target prescribed by the Funds' asset allocation. This is due primarily to committed capital not being drawn down by our general partners. In those cases, we have historically set policy either to direct the uninvested allocation to hold either fixed income or equities. This has generally made managing the designated asset class (fixed income or equities) to its allocation target, or adjusted allocation target, slightly challenging.

Staff is in the process of reviewing different approaches to managing the uninvested allocation. One of the primary objectives in any change to managing the uninvested allocation will be improving the efficiency of the process for raising cash from investments.

- One approach we are reviewing is to incorporate a cash overlay approach which would allow us to maintain equity exposure while facilitating the cash raising process.
- Another approach is to use both equity and bond or treasury futures to overlay cash, which would enable us to both facilitate the raising of cash and rebalancing our targeted public equity and fixed income allocations.
- The allocation to equities in the uninvested allocation may be managed separately from the targeted public equity allocation. An example would be to place a portfolio of S&P 500 equity within this portion rather than our standard Russell index-based portfolios, both actively and passively managed. This approach could be coupled with an S&P 500 futures approach. This would allow cash movements without disrupting the targeted equity allocations.
- Any assets included in the Opportunity Portfolio could also reside in the uninvested allocation portfolio.

The Executive Director is requesting that the Investment Advisory Council (IAC) share its perspective at the November 2019 IAC meeting. It would be helpful if the IAC members provided feedback both in regards to the concept and potential approaches. At this time, the Executive Director anticipates that a recommendation will be forthcoming with the potential of implementing prospective changes in advance of the beginning of Fiscal Year 2021.

TO: Members, Investment Advisory Council

FROM: SBI Staff

SUBJECT: Potential Addition of Liquid Alternatives Strategies Under Review

At the most recent Investment Advisory Council (IAC) meeting held on August 12, 2019, IAC members shared their perspectives on the SBI's asset allocation for the Combined Funds and offered suggestions for areas of research for potential capital deployment. One theme from the discussion was the Fund's significant allocation to public equities, particularly U.S. equities.

While the portfolio's equity-heavy allocation has served the portfolio well – both over the longer term and over the recent 5- and 10-year periods – several members noted the possible benefits of adding diversifying strategies to the portfolio. Following the meeting, public markets staff met with the Executive Director to outline a goal of reviewing strategies in the liquid alternatives space.

Outline of Strategy Review

Liquid alternatives include a broad range of investment strategies which encompass over \$2.2 trillion in invested assets. The asset class is well accepted as providing a rich opportunity set for potentially diversifying strategies. Importantly, the return objective of many strategies in the liquid alternatives space is similar to the long-run expected return on equities. While there are thousands of unique funds spread across more than a dozen broad strategy categories, based on both internal discussions and with Aon and Meketa, Staff has identified the following broad strategy categories for more in-depth research:

Systematic Diversified Macro – Includes a broad range of strategies in which the investment process is predicated on movements in underlying economic variables and the impact these have on equity, fixed income, hard currency and commodity markets. Strategies have investment processes based on mathematical, algorithmic and technical models. May employ trading strategies designed to identify opportunities in markets exhibiting trending or momentum characteristics across individual instruments or asset classes.

Alternative Risk Premia – These strategies are designed to systematically isolate and capture market returns attributable to factors such as value, momentum, quality, carry, and trend. Other strategies may attempt to systematically capture price discrepancies between related securities (statistical arbitrage) or factors related to the pricing of volatility. In most cases, managers seek to build a diversified portfolio of factor exposures in order to maximize return per unit of volatility.

Risk Parity – This strategy focuses explicitly on the allocation of risk, usually defined as volatility, rather than allocation of capital. Risk parity funds typically invest across a broad range of asset classes, including equities, fixed income and commodities.

Over the past several months, Staff has engaged with peers, industry contacts and the consultants to develop an initial short list of managers and specific strategies for consideration. Given the diversifying role we are seeking from any allocation to liquid alternatives, Staff is using the following key criteria for evaluating potential strategies:

- Low/no correlation with public equities, particularly in down markets;
- Return potential in the 7-10% range, making funding from equities return-neutral (or better);
- Systematic and disciplined, designed to capture persistent market factors;
- Risk-managed and diversified to control drawdown risk; and
- Highly liquid underlying investments, with monthly or quarterly liquidity.

There are a wide variety of managers and unique strategies within the Systematic Macro, Alternative Risk Premia and Risk Parity categories. Given the size of the Combined Funds, Staff plans to focus on the larger managers in the space (strategy assets >\$1 billion), with initial emphasis placed on well-established firms with 10+ year track records. Staff intends to evaluate a number of managers over the next several quarters, with a goal of bringing forward recommendations to the IAC for initial investment in 3-5 strategies totaling \$250-\$750 million. It is intended that these strategies would sit in the Opportunity category of the Combined Funds strategic allocation framework, and that the investments would be funded via a reduction in the Growth - Appreciation category (from public equities).

Staff will provide a short presentation with a focus on one of the managers we have been reviewing. The Executive Director is requesting that IAC members provide their prospective regarding the concept, and potential managers for staff's consideration.

TO: Members, Investment Advisory Council

FROM: SBI Staff

SUBJECT: Private Markets Asset Class Review, Resources (within Real Assets)

Real Asset Portfolio Review

The SBI has made private investments in natural resources for nearly 40 years. Staff will present to the Investment Advisory Council a review of the resources portfolio, including a discussion of the investment rationale at the outset, and how that rationale has evolved over time. Staff will discuss changes in the composition of the portfolio throughout its history and assess what the portfolio looks like today.

The presentation will also highlight the role of real assets in a broadly diversified institutional portfolio. Staff intends to generate a discussion of the objectives of the SBI's current real assets portfolio, and what investments or strategies are best able to achieve these objectives. Members of the Council will be encouraged to share their perspectives, as well as any experiences they may have investing in real assets.

Review of SBI Public Markets Program Third Quarter 2019

SBI Portfolio - Quarter and Year Performance

In the third quarter, the Combined Funds slightly underperformed the composite benchmark return (+1.0% Combined Funds versus +1.1% Composite Benchmark). Domestic equities underperformed its benchmark return (+0.8% Domestic Equity versus +1.0% Domestic Equity Benchmark), while international equities outperformed its benchmark return (-1.5% International Equity versus -1.8% International Equity Benchmark). The core fixed income portfolio met the Bloomberg Barclays U.S. Aggregate Index return of 2.3%, while the Treasury Protection Portfolio slightly underperformed the Bloomberg Barclays Treasury 5+ Year Index (Portfolio +4.5% versus Benchmark +4.6%). Lastly, private markets, subject to a one quarter valuation lag, contributed positively, returning +1.8% for the quarter.

For one year ending third quarter 2019, the Combined Funds underperformed the composite benchmark return (+4.7% Combined Funds versus +5.1% Composite Benchmark). Domestic equities underperformed its benchmark return (+2.1% Domestic Equity versus +2.8% Domestic Equity Benchmark), while international equities outperformed its benchmark return (-0.9% International Equity versus -1.2% International Equity Benchmark). The core fixed income portfolio slightly outperformed the Bloomberg Barclays U.S. Aggregate Index return (+10.4% Fixed Income versus +10.3% Fixed Income Benchmark), while the Treasury Protection Portfolio slightly underperformed the Bloomberg Barclays Treasury 5+ Year Index (Portfolio +17.0% versus Benchmark +17.2%). Lastly, private markets contributed positively, returning +8.0% for the year.

Domestic Equity

The performance of U.S. stocks was mixed and returns were muted overall. For the third quarter, the Russell 3000 Index returned +1.2%. During the same period, large-cap stocks outperformed small-cap stocks, as the Russell 1000 Index returned +1.4% while the Russell 2000 Index returned -2.4%. Over the year, for both large and small-cap stocks, and during the quarter for small-cap stocks, growth fell out of favor reversing the trend where growth traditionally outperformed value over longer time periods. The positive returns of the U.S. equity market came amidst accommodative central bank policies which helped offset concerns that an escalating trade war with China and a U.S. yield curve inversion could lead to a recession. The Utilities, Real Estate and Consumer Staples sectors had the strongest gains, while Energy and Health Care stocks lagged.

The large-cap growth managers trailed the Russell 1000 Growth benchmark (-6.3% large-cap growth versus +1.5% Russell 1000 Growth Index) for the quarter. Stock selection was negative across most sectors, led by the Technology sector. While all three managers trailed the benchmark for the quarter, Zevenbergen, with its concentrated, high growth/momentum focus, fell over 12% versus its Russell 1000 growth benchmark due to underperformance led by sizable positions in Exact Sciences Corp, Netflix, Inc. and Zillow Group, Inc.

The large-cap value managers fared better, exceeding the Russell 1000 Value (+1.8% large-cap value versus +1.4 Russell 1000 Value Index) for the quarter. Stock selection in the Consumer Discretionary sector helped performance. In terms of managers, Barrow Hanley and LSV outperformed while Earnest Partners trailed the quarterly benchmark.

The small-cap growth managers trailed the Russell 2000 Growth benchmark (-5.3% small-cap growth versus -4.2% benchmark) for the quarter. Stock selection detracted from performance, led by the Financial Services sector. Wellington outperformed for the quarter and three managers underperformed.

The small-cap value managers matched the Russell 2000 Value benchmark of -0.6% for the quarter. Overall sector allocation was positive for the quarter, with stock selection slightly detracting from performance. Two managers outperformed for the quarter and two underperformed.

For the quarter, the semi-passive managers in aggregate slightly trailed the Russell 1000 Index return. Stock selection in the Financial Services, Consumer Discretionary and Product Durables sectors contributed negatively for performance. The passive Russell 3000, Russell 1000 and Russell 2000 Index mandates matched their respective indices within expectation.

Developed International Equity

International stocks had a lackluster quarter, weighed down by slower growth in the Eurozone, uncertainty surrounding Brexit and global trade tensions. In this market environment, defensive sectors such as Consumer Staples and Utilities tend to perform well. The active developed markets managers slightly underperformed the MSCI World ex USA Standard Index (net) (-1.0% developed international versus -0.9%) for the quarter. From a country perspective, stock selection in France and Finland contributed to the underperformance, partially offset by positive stock selection in Japan and Canada. From a sector perspective, negative stock selection in Health Care (Pharmaceuticals in particular), and underweight positioning in Consumer Staples (Nestle SA, among others) contributed to the modest underperformance.

AQR's portfolio underperformed the MSCI World ex USA Standard Index (net) during the quarter. Stock selection decisions in the Materials, Industrials, Health Care and Real Estate sectors contributed negatively to performance. Stock selection overall in the United Kingdom and Japan was also negative.

Both the passive developed markets manager and the passive emerging markets manager tracked their respective indices within guideline tolerance for the quarter.

Emerging Markets Equity

Emerging market equities (EME), as measured by MSCI EME Index, produced a negative return of -4.2% during the quarter as the global economic slowdown was felt more acutely by China and EM countries than developed markets. Country performance was also wide ranging and volatile, with Argentina's stock market and peso falling 47% during the quarter on populist election results, India experiencing softness within its Banking sector, while Turkey, Egypt and Taiwan produced positive returns. On a relative basis, the SBI active program declined less than its benchmark as

the active composite returned -2.5%, versus MSCI EM -4.2%. Six managers in the active program outperformed while one manager underperformed. The overall emerging markets equity program, including passive, outperformed the benchmark return 120 basis points (-3.1% versus -4.2%) over the same period. During the quarter, the SBI opened the Netherlands at custody, allowing managers holding Naspers the ability to participate in newly listed and Amsterdam-traded Prosus, which jumped roughly 30% post-IPO. Positive allocation and selection to the Technology sector was the largest contributor to relative returns for the quarter, followed by defensive oriented Consumer Staples, though EME overall was negative on an absolute basis.

Fixed Income – Core

Overall, the SBI Fixed Income program matched the Bloomberg Barclays Aggregate benchmark performance of +2.3% for the quarter. Two of the four active SBI fixed income managers within the core fixed income pool outperformed the benchmark (+2.2% active program versus +2.3% benchmark). The three semi-passive managers in total outperformed the benchmark (+2.5% semi-passive versus +2.3% benchmark). Yields fell (prices rose) across the curve, as markets reacted defensively to trade wars between the U.S. and China, reinforced by two FOMC interest rate cuts in the quarter, bringing the target federal funds rate range to 1.75% - 2.0%. The U.S. curve remained inverted, with yields on the short and long maturities exceeding mid-range maturities, with policy makers and market participants debating the predictive qualities of such an inversion. Lastly, the curve flattened during the quarter, with yields on 10-year and 30-year maturities falling more than yields on 2-year and 3-year maturities. In this environment, managers with curve positioning underweight these long maturities found it difficult to match or exceed the benchmark. Both outperforming active managers were positioned with longer duration and curve flatteners as described above. The semi-passive managers' guidelines constraining duration and curve mismatches benefited the program during the quarter. Investment Grade corporate spreads followed equities lead and widened modestly during the quarter resulting in mixed manager performance within Investment Grade credit, while asset-backed securities and commercial mortgage backed securities with a focus on the consumer produced positive relative performance.

Fixed Income – Treasury Portfolio

During the third quarter of 2019, U.S. Treasury securities continued its rally across the curve in a “flight to quality” response to market conditions, with the 10 year Treasury yield falling from 2.00% yield to 1.67%, and 30 year Treasury yield falling from 2.50% to 2.10%. For the three months ending 9/30/2019, the three managers responsible for the Treasury Portfolio mandate (Goldman Sachs, BlackRock and Neuberger Berman) slightly underperformed the Bloomberg Barclays Treasury 5+ Year Index, returning 4.5% versus 4.6% for the benchmark. On a relative basis, short duration positioning detracted from performance, as well as managers' allocation to Treasury Inflation Protection Securities (TIPS) allocations, for which strategies tied to rising inflation expectations did not materialize. For the quarter, the Treasury Portfolio was SBI's best performing asset class in absolute terms.

Public Markets Managers' Organizational Update Third Quarter 2019

Domestic Equity Managers

Barrow Hanley

In September 2019, Jeff Fahrenbruch, Managing Director and lead Portfolio Manager relinquished his portfolio management responsibilities as he transitions out of the organization. Jeff will remain at Barrow Hanley through the end of the year. Staff plans to meet with the manager during the fourth quarter to assess the impact of the Portfolio Manager change and will closely monitor the transition.

J.P. Morgan

During the quarter, Ethan Alderman, one of two analysts covering REITs left the firm and his replacement is being sought.

BlackRock

Jeff Smith, former Head of Global Human Resources Group, left the firm in July 2019 because he failed to adhere to company policy (no additional details provided). Following his departure, BlackRock's Vice Chairman Rob Fairbairn became interim head of Global Human Resources Group, and recently Manish Mehta who served as Global Head of ETF and Index Investments was named the new department head, reporting into BlackRock's Chairman and CEO, Larry Fink.

Developed International Equity Managers

AQR

In September 2019, Neal Pawar, Chief Technology Officer, left AQR. Steve Mock and Ian Roche, previously Head of Enterprise Architecture & Trading Engineering and Head of Portfolio Implementation Engineering respectively at AQR, have been named Co-Chief Technology Officers. In August 2019, Marcos Lopez de Prado, Head of Machine Learning, departed from AQR. He was replaced by Bryan Kelly.

State Street Global Advisors (SSgA)

During the quarter, Stan Wasilauski, Chief Technology Officer, transitioned to a new role at SSgA and was replaced by Susan Lasota. Greg Hartch, Chief Risk Officer, assumed the role of Head of Private Investments. He was replaced in the role of Chief Risk Officer by Tim Corbett.

Emerging Market Equity Managers

Neuberger Berman

In July 2019, Patrick Ru, EME analyst on the team responsible for North Asia, relocated to Hong Kong from the New York office to provide greater focus on the regions he covers. The team is

increasing its focus on the Greater China region and looks to add exposure to this growing opportunity set.

Macquarie

The company received negative press as a former employee claimed retaliation following a sexual harassment lawsuit in January 2018. The woman filed a petition in Federal court with a claim against the firm regarding the arbitration process meant to resolve the matter. The SBI will monitor the situation, however no action is recommended at this time.

Fixed Income

BlackRock

Jeff Smith, former Head of Global Human Resources Group, left the firm in July 2019 because he failed to adhere to company policy (no additional details provided). Following his departure, BlackRock's Vice Chairman Rob Fairbairn became Interim Head of Global Human Resources Group, and recently Manish Mehta who served as Global Head of ETF and Index Investments was named the new department head, reporting into BlackRock's Chairman and CEO, Larry Fink.

Non-Retirement Manager Update Third Quarter 2019

Fixed Income

RBC Global Asset Management

The fixed income portfolio matched the Bloomberg Barclays Intermediate Government benchmark of 2.1% for the quarter. The portfolio's underperformance from short duration positioning was largely offset by positive excess yield generated by agency debentures and mortgage pools. The portfolio's mandate limits investments in spread products such as Investment Grade corporates and structured credit, thus those asset classes has minimal effect on returns for the quarter.

Prudential Fixed Income

The fixed income portfolio return of 2.5% for the quarter outperformed the benchmark return, the Bloomberg Barclays U.S. Aggregate by 11 basis points. The U.S. Treasury curve was lower and flattened during the quarter. The portfolio's long duration positioning and overweight of long key rates (25 year) were the primary contributors to performance.

Equity

BNY Mellon

Mellon tracked its benchmark, the S&P 500, for the quarter.

Deferred Compensation Manager Update Third Quarter 2019

Domestic Equities

Vanguard Total Stock Market Index Institutional Plus

The all cap domestic equity Fund matched the return of the CRSP US Total Market Index for the quarter with a 1.1% return. The benchmark represents 100% of the investable U.S. stock market and includes large-, mid-, small-, and micro-cap stocks regularly traded on the NYSE and NASDAQ.

The Vanguard Total Stock Market Index (Institutional Plus) is a new fund that was added to the mutual fund line up during the third quarter of 2019. This fund is available to eligible participants that use the mutual fund line up.

Vanguard Dividend Growth Fund

The Fund returned 3.5% for the quarter, which underperformed its benchmark, the NASDAQ US Dividend Achievers Select Index return of 4.2%. Unfavorable allocations and weaker stock selection in Consumer Staples weighed on performance for the quarter. The portfolio's underweight to Utilities and a small allocation to Energy, a sector not currently in the benchmark, negatively impacted relative return.

Vanguard Institutional Index Plus

The large-cap domestic equity Fund matched the return of the S&P 500 Index for the quarter with a 1.7% return.

Vanguard Mid-Cap Index

The mid-cap equity Fund tracked the benchmark, CRSP US Mid Cap Index, for the quarter with a 0.6% return.

T. Rowe Price

The small-cap equity portfolio outperformed the Russell 2000 for the quarter with a 0.2% return versus the benchmark return of -2.4%. Stock selection was the main contributor to relative performance; primarily in the Financials and Energy sectors in addition to an underweight to Energy companies. Stock choices in Consumer Discretionary and Communication Services were also strong.

International Equities

Fidelity Diversified International

The international equity portfolio returned 0.3% for the quarter outperformed the MSCI EAFE Free benchmark return of -1.1%. Stock selection was the main contributor for the outperformance, primarily in Information Technology and Industrial sectors. Regionally, favorable stock selection in the U.S. and emerging markets contributed the most to relative performance.

Vanguard Total International Stock Index

The international equity portfolio matched the benchmark, the FTSE Global All Cap ex US Index, for the quarter with a -1.7% return. In the short-term, the international portfolio will tend to have higher tracking error because of fair value pricing, which tends to smooth out over time. Fair value pricing most frequently occurs when a current price is not readily available and is not reflective of its current value. This most frequently occurs when the foreign market is closed while the U.S. market is open.

Fixed Income

Dodge & Cox Income Fund

The fixed income portfolio underperformed the benchmark, the Bloomberg Barclays Aggregate, for the quarter with a 1.2% return versus the benchmark return of 2.3%. As treasury yields declined, the portfolio's lower duration position relative to the benchmark detracted from returns. The portfolio's smaller allocation to long-term (10+ years) bonds also detracted as the long end of the yield curve declined more than the curve on average.

Vanguard Total Bond Market Index

The fixed income Fund returned 2.4% for the quarter outperformed the benchmark, the Bloomberg Barclays U.S. Aggregate Index, return of 2.3% for the same time period. Small deviations in the fund's performance relative to the benchmark may occur given the fund's sampling approach to approximate the index.

Balanced and Conservative Options

Vanguard Balanced

The balanced portfolio return of 1.7% matched the customized benchmark return for the quarter. The benchmark is a combined return of 60% CRSP US Total Market and 40% Barclays Aggregate.

Galliard Capital Management

The stable value portfolio outperformed the benchmark, the 3 Year Constant Maturity Treasury plus 0.45%, return for the quarter with a 0.7% return versus the benchmark return of 0.5%. An overweight to spread securities was the primary driver of performance. Specifically, overweight's to Corporates, ABS, CMBS, and other Government securitizations all proved additive, as those sectors outperformed U.S. Treasuries with similar maturity profiles.

During the third quarter there were two Senior Client Service Relationship Managers who left the firm. These changes are in addition to the announcement made last quarter of the planned retirement for several senior personnel prior to the end of the year. Staff is in the process of completing a full due diligence review of the stable value strategy.

State Street Global Advisors

The money market fund matched the 90 Day T-Bill return of 0.6%.

Global Equity Markets

**GLOBAL MSCI IMI INDEX RETURNS (USD)
AS OF 09/30/2019**

- Concerns of slowing global growth and trade wars ramped up significantly over the quarter before giving way to monetary stimulus that helped to bolster stocks. In local currency terms, the MSCI AC World Investable Market Index returned 1.1% but due to U.S. dollar appreciation, global equities returned -0.2% in USD terms.
- Japanese stocks were the strongest performers (3.3%) where significant multiple expansion saw cyclical sectors, such as the Consumer Discretionary sector, outperform strongly.
- Pacific ex-Japan was the worst performer with a return of -4.8%, significantly dragged down by double-digit decline in Hong Kong equity returns due to slowdown in China and heightened political unrest with growing protests triggered by a controversial extradition bill.
- Emerging Markets (EM) equities fell sharply at -4.3% as impact of trade concerns continues to be a strong headwind. In particular, a double-digit decline in Chinese stocks detracted from EM returns as both the rhetoric and size of tariffs increased. Much of the fall can be attributed however to the strong appreciation of the U.S. dollar with the MSCI EM IMI down by 1.9% in local currency terms.

**RUSSELL STYLE RETURNS
AS OF 09/30/2019**

Source: Russell Indexes

**RUSSELL GICS SECTOR RETURNS
AS OF 09/30/2019**

Source: Russell Indexes

- With expectations of corporate earnings turning lower, the positive return for U.S. equities was primarily driven by multiple expansion. In general, less economically-sensitive sectors outperformed which is not too surprising given the deteriorating outlook. The Russell 3000 Index rose 1.2% during the third quarter and 2.9% over the one-year period. Relative to their international peers, U.S. stocks broadly outperformed with particularly resilience from the Financials sector.
- Energy (-7.6%) and Healthcare (-3.6%) were the worst performers over the quarter. The former was affected by lower crude oil prices, while the latter despite its more defensive nature underperformed due to political headwinds. Meanwhile, Utilities (8.5%) and Consumer Staples (5.7%) were the best performing sectors in Q3 2019.
- Performance was mixed across the market capitalization spectrum over the quarter. In general, small cap stocks underperformed both large and medium cap stocks over the quarter. Small-cap stocks underperformed on a fairly broad basis, rather than any meaningful differences in sector allocations although the near double-digit decline in small-cap Health Care stocks was notable. Growth stocks generally underperformed their Value counterparts in Q3 2019 and over the last year.

U.S. Fixed Income Markets

**BLOOMBERG BARCLAYS AGGREGATE RETURNS BY SECTOR
AS OF 09/30/2019**

Source: FactSet

- The Bloomberg Barclays U.S. Aggregate Bond Index rose by 2.3% over the quarter. Corporate bonds were the best performers, returning 3.0%. Securitized debt underperformed other areas of the U.S. bond market with lower duration of the segment attributed to the more modest returns with a return of 0.9%.
- Strong underlying government bond returns supported corporate bonds returns across all credit grades. Within investment grade bonds, Baa bonds rose the most at 3.3%. High Yield bonds returned 1.3% with minimal movement in spreads over the quarter.
- As the U.S. yield curve flattened over the quarter, long-maturity bonds outperformed intermediate and short-maturity bonds. Long-maturity bonds returned 6.6% while short-maturity bonds returned only 0.7%.

U.S. Fixed Income Markets

U.S. TREASURY YIELD CURVE

U.S. 10-YEAR TREASURY AND TIPS YIELDS

- The U.S. nominal yields fell across all maturities with the yield curve flattening over the quarter as longer-term yields decreased by more than short-term yields. Over the quarter, the widely watched spread between 10 and 2-year U.S. Treasury yields briefly fell into negative territory for the first time since 2007, a concerning development as a recession has followed every yield curve inversion since the 1960s.
- The 10-year U.S. Treasury yield ended the quarter at 1.68%, 32bps lower than at the start of the quarter in which the U.S. Federal Reserve (Fed) twice cut the interest rate by 25bps each to 1.75%-2.00%. Despite the two rate cuts, the Fed made it clear that it was not the beginning of a sustained easing cycle. This more conservative messaging was maintained at the September Fed meeting although the Federal Open Market Committee (FOMC) appeared to be divided on the future direction of rates with a member arguing for more aggressive cuts to be made.
- The weaker economic outlook was reflected in the downward movements in TIPS yields by 16bps over the quarter and ended the period at 0.15%, while lower inflation expectations led breakeven inflation lower by 16bps to 1.54%.

European Fixed Income Markets

**EUROZONE PERIPHERAL BOND SPREADS
(10-YEAR SPREADS OVER GERMAN BUNDS)**

Source: FactSet

- European government bond spreads over 10-year German bunds generally fell across the Euro Area with the exception of Spanish and Irish government bonds. The European Central Bank (ECB) cut its deposit rate by 10bps to -0.5% and announced that its bond purchasing program will be restarted with the purchase of €20billion of bonds each month from November 2019. Furthermore, the ECB indicated that this policy would not be time limited but will be in place until their inflation target is reached.
- German government bund yields fell by 27bps to -0.58% over the quarter after the country's manufacturing sector dived deeper into contraction territory. Meanwhile, the 30-year German bund yield turned negative for the first time in history. Italian government bond yields fell by 129bps to a record low of 0.81% over the quarter as political uncertainty eased after a new coalition government was formally agreed.
- Greek government bond yields fell by 109bps over the quarter to a record low of 1.34%. Greece submitted a request to repay part of its expensive loans from the International Monetary Fund (IMF) early.

Credit Spreads

Spread (bps)	9/30/2019	6/30/2019	6/30/2018	Quarterly Change (bps)	1-Year Change (bps)
U.S. Aggregate	46	46	39	0	7
Gov't	0	0	0	0	0
Credit	109	109	100	0	9
Gov't/Credit	46	46	43	0	3
MBS	46	46	28	0	18
CMBS	70	69	60	1	10
ABS	37	41	38	-4	-1
Corporate	115	115	106	0	9
High Yield	373	377	316	-4	57
Global Emerging Market	312	282	273	30	39

Source: Barclays Live

- Movements in credit spreads over U.S. Treasuries were mixed over the quarter. There were fairly muted movements in U.S. credit with modest narrowing in U.S. high yield spreads while U.S. corporate spreads were unchanged.
- Emerging market bond spreads widened significantly by 30bps over the quarter. The ongoing trade war, U.S. dollar debt vulnerabilities among certain EM countries given the increase in the 'greenback' and less risk appetite weighed on emerging market debt in general.

Currency

**TRADE WEIGHTED U.S. DOLLAR INDEX
(1973 = 100)**

Source: Federal Reserve

**U.S. DOLLAR RELATIVE TO EUR, GBP AND JPY
REBASED TO 100 AT 09/30/2013**

Source: FactSet

- The U.S. dollar continued on an upward trend with economic releases surprising to the upside in the U.S. and cyclical supports – a wide interest rate differential and relative economic strength – remaining intact. The U.S. dollar strengthened against major currencies over the quarter, rising by 2.8% on a trade-weighted basis over the quarter, supported by appreciation against sterling and the euro, up 3.3% and 4.5% respectively. The U.S. dollar appreciated less against the Japanese yen which benefited from some safe haven flows during bouts of market volatility over the quarter.
- Once again, closely tied to Brexit developments, sterling slipped by just 0.1% on a trade weighted basis but fell by considerably more to a post-EU referendum low against the U.S. dollar. Sterling depreciated by 3.2% against the U.S. dollar.
- The euro was weak over the quarter as economic releases disappointed with data pointing to near-recessionary conditions in the bloc. With the region exposed to global economic activity, the ongoing trade war and decelerating growth weighed on the region and the currency. Further headwinds pushed the euro lower later in the quarter as the ECB eased monetary policy and lowered interest rates. Against this backdrop, the euro slid by c.4% against the U.S. dollar.

Commodities

COMMODITY RETURNS AS OF 09/30/2019

Source: Bloomberg

Note: Softs and Grains are part of the wider Agriculture sector

- Commodities fell over the quarter which saw the Bloomberg Commodity Index return -1.8%.
- Despite ongoing supply risks, exacerbated by the drone attacks on oil infrastructure in Saudi Arabia that accounts for nearly half of the Kingdom's production, crude oil prices ended the quarter lower. Weaker energy demand led to lower crude oil prices: the price of Brent crude oil fell by 8.7% to \$61/bbl while WTI crude oil spot price fell by 7.5% to \$54/bbl. Energy sector disappointed with a return of -4.5%.
- Supported partly by safe-haven buying over the quarter, Precious Metals was the best performing sector over the quarter with a return of 5.3%. This took the one-year return to over 20%. All other commodity sectors posted negative returns over the same period.
- Agriculture (-6.1%) was the worst performing sector in Q3 2019. Within the Agriculture sector, Softs fell by 8.6% whilst Grains fell by 6.5%.

Hedge Fund Markets Overview

HEDGE FUND PERFORMANCE AS OF 09/30/2019

Note: Latest 5 months of HFR data are estimated by HFR and may change in the future.

Source: HFR

- Hedge fund performance was mixed across all strategies in the third quarter.
- Over the quarter, Global Macro hedge fund strategies were the best performers with a return of 1.5%. Most of the outperformance occurred over August when market risks were elevated. Conversely, Emerging Markets and Distressed-Restructuring were the worst performers, returning -2.0% and -1.6% respectively.
- The HFRI Fund-Weighted Composite Index and the HFRI Fund of Funds Composite Index produced returns of -0.4% and -0.9%, respectively.

Private Equity Market Overview – Q2 2019

LTM Global Private Equity-Backed Buyout Deal Volume

Source: Preqin

- **Fundraising:** In Q2 2019, \$178.1 billion was raised by 366 funds, which was an increase of 25.8% on a capital basis and an increase of 0.3% by number of funds over the prior quarter. Dry powder stood at nearly \$2.0 trillion at the end of the quarter, a modest increase compared to the previous quarter.¹
- **Buyout:** Global private equity-backed buyout deals totaled \$77.7 billion in Q2 2019, which was up 6.8% on a number of deals basis and down 27.0% on a capital basis from Q1 2019.¹ Through the end of Q2 2019, the average purchase price multiple for all U.S. LBOs was 11.2x EBITDA, an increase of 0.6x over year-end 2018 and up from the five-year average (10.2x).² Large cap purchase price multiples stood at 11.0x, up compared to the full-year 2018 level of 10.6x.² The weighted average purchase price multiple across all European transaction sizes averaged 11.1x EBITDA for Q2 2019, up from the 10.9x multiple seen at the end of Q1 2019. Purchase prices for transactions of €1.0 billion remained at 11.3x at the end of Q2 2019, a drop from the 11.7x seen at year-end 2018. Transactions between €500.0 million and €1.0 billion were down 0.3x from the end of 2018, and stood at 11.0x at the end of the quarter.² Globally, exit value totaled \$104.7 billion from 453 deals during the second quarter, significantly higher than the \$40.8 billion in exits from 460 deals during Q1 2019.¹
- **Venture:** During the second quarter, 1,409 venture-backed transactions totaling \$28.7 billion were completed in the U.S., which was an increase on a capital and deal basis over the prior quarter's total of \$26.1 billion across 1,362 deals. This was 41.4% higher than the five-year quarterly average of \$20.3 billion.³ Total U.S. venture-backed exit activity totaled approximately \$138.3 billion across 198 completed transactions in Q2 2019, up slightly on a capital basis from the \$50.1 billion across 185 exits in Q1 2019.⁴
- **Mezzanine:** Four funds closed on \$1.2 billion during the second quarter. This was an increase from the prior quarter's total of \$1.0 billion raised by three funds, but represented a decrease of 76.7% from the five-year quarterly average of \$5.1 billion. Estimated dry powder was \$51.5 billion at the end of Q2 2019, down from the \$58.8 billion seen at the end of Q1 2019.¹

Private Equity Market Overview – Q2 2019

U.S. LBO Purchase Price Multiples – All Transactions Sizes

Source: S&P

- **Distressed Debt:** The LTM U.S. high-yield default rate was 1.9% as of July 2019, which was down from year-end 2018's LTM rate of 2.4%.⁵ During the quarter, \$15.3 billion was raised by 15 funds, higher than both the \$5.0 billion raised by 14 funds in Q1 2019 and the five-year quarterly average of \$11.0 billion.¹ Dry powder was estimated at \$119.4 billion at the end of Q2 2019, which was up slightly from the \$118.0 billion seen at the end of Q1 2019. This remained above the five-year annual average level of \$103.3 billion.¹
- **Secondaries:** Four funds raised \$1.5 billion during the quarter, down from the \$2.2 billion raised by nine funds in Q1 2019 and the \$9.0 billion raised by ten funds in Q4 2018.¹ At the end of Q2 2019, there were an estimated 58 secondary and direct secondary funds in market targeting roughly \$74.6 billion.¹ The average discount rate for all private equity sectors finished the quarter at 9.2%, lower than the 9.5% discount at the end of Q1 2019.⁶
- **Infrastructure:** \$23.1 billion of capital was raised by 29 funds in Q2 2019 compared to \$18.3 billion of capital raised by 21 partnerships in Q1 2019. At the end of the quarter, dry powder stood at an estimated \$217.0 billion, up significantly from Q1 2019's total of \$175.0 billion. Infrastructure managers completed 582 deals with an estimated aggregate deal value of \$155.0 billion in Q2 2019 compared to 552 deals totaling \$63.0 billion a quarter ago.¹
- **Natural Resources:** During Q2 2019, two funds closed on \$0.4 billion compared to five funds totaling \$1.5 billion in Q1 2019. Energy and utilities industry managers completed approximately 80 deals totaling an estimated \$12.4 billion through Q2 2019, which represents 36.1% of the full year capital deployment in 2018.¹

U.S. Commercial Real Estate Markets

PRIVATE VS. PUBLIC REAL ESTATE RETURNS AS OF 09/30/2019

*Third quarter returns are preliminary
Sources: NCREIF, FactSet

CAP RATES BY SECTOR

Sources: RCA, AON 12/31/2018

- U.S. Core Real Estate returned 1.3%* over the third quarter, equating to a 5.6% total gross return year-over-year, including a 4.2% income return. Debt mark-to-market was a drag on the quarterly return as a result of declining interest rates. Going forward, income and income growth are expected to be the larger drivers of return, given the current point of the real estate cycle.
- Global property markets, as measured by the FTSE EPRA/NAREIT Developed Real Estate Index, returned 4.9% (USD) in aggregate during the third quarter. The sector benefitted from increasingly accommodative monetary policy. REIT market performance was driven by North America (7.6% USD) and Europe (3.3% USD). The U.S. REIT markets (FTSE NAREIT Equity REITs Index) gained 7.8% in the third quarter. Central bank easing proved to be supportive of REIT pricing.
- According to RCA through August 2019, the U.S. property market has experienced price growth of 6.7% year-over-year across major sectors. The industrial sector pricing appreciated 12.5% year-over-year, leading all sectors. Furthermore, transaction volume was up 10% over the same period.
- Return expectations have normalized, with go forward expectations in line with historical norms. The market benefited from two rate cuts during the Quarter, from the Federal Reserve, and declining interest rates have led to a rally across various asset classes. According to Preqin, there remains a record amount of dry powder (\$334 billion) in closed-end vehicles seeking real estate exposure, which should continue to lend support to valuations and liquidity in the commercial real estate market.

Appendix A:

Global Private Equity Market Overview

2Q 2019

Private Equity Overview

Total Funds Raised

Source: Preqin

LTM Global Private Equity-Backed Buyout Deal Volume

Source: Preqin

Fundraising

- In 2Q 2019, \$178.1 billion was raised by 366 funds, which was an increase of 25.8% on a capital basis and an increase of 0.3% by number of funds from the prior quarter.¹
 - 2Q 2019 fundraising was 13.3% higher on a capital basis than 2Q 2018.
 - Relative to the five-year quarterly average, the number of funds raised decreased by 32.7% while the total capital raised increased by 8.2%, strengthening the observation that larger amounts of capital are being raised by fewer funds.
 - The majority of 2Q 2019 capital was raised by funds with target geographies in North America, comprising 59.7% of the quarterly total. Capital targeted for Europe made up 25.5% of the total funds raised during the quarter, while the remainder was attributable to managers targeting Asia and other parts of the world.
- Dry powder stood at nearly \$2.0 trillion at the end of the quarter, a modest increase compared to the previous quarter.¹

Activity

- In 2Q 2019, 1,305 deals were completed for an aggregate deal value of \$77.7 billion as compared to 1,264 transactions totaling \$106.4 billion in 1Q 2019.¹
 - This was 26.6% lower than the five-year quarterly average deal volume of \$105.8 billion.
- European LBO transaction volume totaled €7.4 billion in 2Q 2019, representing roughly 29.7% of 2018's total LBO loan volume.³
- At the end of 2Q 2019, the average purchase price multiple for all U.S. LBOs was 11.2x EBITDA, up compared to the year-end 2018 (10.6x) and up from the five-year average (10.2x). Large corporate purchase price multiples stood at 11.0x through 2Q 2019, up from with the 10.6x observed at year-end 2018.³
 - For all U.S. LBOs, this quarter was 1.1x and 2.0x turns (multiple of EBITDA) above the five and ten-year average levels, respectively.
- European multiples for transactions greater than €1.0 billion averaged 11.3x in the second quarter, equal to that witnessed in the first quarter. Transactions greater than €500.0 million saw a slight increase of 0.1x in purchase multiples and ended the quarter at 11.0x.³
- Debt remained broadly available in the U.S.
 - U.S. average leverage levels in 2Q 2019 were 5.7x compared to the five and ten-year averages of 5.7x and 5.2x, respectively.³
 - The amount of debt issued supporting new transactions increased compared to year-end 2018 from 68.2% to 72.2%, which is also higher than the 61.7% average level over the prior five years.³
- In Europe, average senior debt/EBITDA through 2Q 2019 was 5.6x, up from the 4.7x observed year-end 2018. This was also up over the five-year average of 5.1x and ten-year average level of 4.5x.

Fundraising

- \$103.8 billion was closed on by 89 buyout and growth funds in 2Q 2019, compared to \$64.4 billion raised by 111 funds in 2Q 2018.¹
 - This was higher than the five-year quarterly average of \$83.1 billion.
 - Advent Global Private Equity IX was the largest fund raised, closing on \$17.5 billion.¹
- Buyout and growth equity dry powder was estimated at \$948.2 billion, which surpassed the \$930.5 billion observed at the end of 1Q 2019. This was substantially higher than the five-year average level of \$675.5 billion.¹
 - Aside from mega funds, which increased 5.1% quarter-over-quarter, buyout dry powder decreased across all fund size categories in 2Q 2019. Middle-market fund dry powder exhibited the largest decrease during the quarter (2.1%), and is now estimated at \$123.8 billion. Large and small market buyout dry powder finished the quarter down 1.3% and 0.4%, respectively, from 1Q 2019.¹
 - An estimated 58.8% of buyout dry powder was targeted for North America, while European dry powder comprised 26.4% of the total.¹

Activity

- Global private equity-backed buyout deals totaled \$77.7 billion in 2Q 2019, which was a decrease of 27.0% and 26.6% from 1Q 2019 and the five-year quarterly average, respectively.¹
 - 1,350 deals were completed during 2Q 2019, which was up 6.8% from 1Q 2019 and down 1.1% compared to the five-year quarterly average.
 - In 2Q 2019, deals valued at \$1-4.99 billion accounted for an estimated 60.1% of total deal value during the quarter compared to 46.2% in 2018 and 43.0% in 2017.¹
- Entry multiples for all transaction sizes in 2Q 2019 stood at 11.3x EBITDA, up from 2018's level (10.6x).³
 - Large corporate purchase price multiples stood at 10.8x during the quarter, up from the 10.6x observed at year-end 2018.³
 - The weighted average purchase price multiple across all European transaction sizes averaged 11.1x EBITDA in 2Q 2019, down from the 11.3x seen at year-end 2018. Purchase prices for transactions of €1.0 billion or more remained at 11.3x during the quarter.
 - Transactions greater than €500.0 million were up 0.1x from 1Q 2019, and stood at 11.0x.³
 - The portion of average purchase prices financed by equity for all deals was 42.2% in 2Q 2019, up from 40.1% in 2018. This remained above the five and ten-year average levels of 39.9% and 39.8%, respectively.³
- Globally, exit value totaled \$104.7 billion from 453 deals in 2Q 2019 compared to \$40.8 billion for 460 deals in 1Q 2019 and \$119.4 billion across 610 deals in Q2 2018.¹

Opportunity

- Operationally focused managers targeting the middle and large markets with expertise in multiple sectors

Venture Capital

Venture Capital Fundraising

U.S. Venture Capital Investments by Quarter (\$B)

Source: PwC/CB Insights Report

Fundraising

- \$22.1 billion of capital closed in 2Q 2019, up from the prior quarter total of \$20.1 billion but down from the Q2 2018 total of \$26.7 billion.¹
 - 154 funds closed during the quarter, down 5.5% and 33.4% from the prior quarter and five year quarterly average, respectively.¹
 - Andreessen Horowitz LSV Fund I was the largest fund raised during the quarter, closing on \$2.2 billion.¹⁶
- The average fund size raised during the quarter was approximately \$153.0 million, which was less than both the prior quarter of \$154.0 million but higher than the five year quarterly average of \$117.9 million.¹
- Dry powder was estimated at \$255.0 billion at the end of 2Q 2019, which was up from 1Q 2019's total of \$239.9 billion. This was 54.7% higher than the five year average. An estimated 45.7% of dry powder was targeted for North America, followed by approximately 37.7% earmarked for Asia.¹

Activity

- During the second quarter, 1,409 venture-backed transactions totaling \$28.7 billion were completed in the U.S., which was an increase on a capital and deal basis over the prior quarter's total of \$26.1 billion across 1,362 deals. This was 41.4% higher than the five-year quarterly average of \$20.3 billion. This was the second strongest quarter on a capital investment basis since Q2 2017 and marks the eighth consecutive quarter of \$20.0 billion or more invested into venture-backed companies.⁷
 - The number of unicorns in the U.S., or companies with valuations of \$1.0 billion or more, increased by 19 in 2Q 2019.⁷
- Median pre-money valuations increased across all deal stages except Series D during Q2. Seed, Series A, and Series B increased by 22.5%, 24.0%, and 16.5%, respectively, to valuations of \$9.8 million, \$24.8 million, and \$75.0 million, respectively. Series C pre-money valuations increased by 21.9% quarter-over-quarter, ending at \$195.0 million. Series D+ deal valuations, however, were down significantly by 39.6% quarter-over-quarter and are currently valued at \$305.0 million.⁹
- Total U.S. venture backed exit activity totaled \$138.3 billion across 198 completed transactions in 2Q 2019, up significantly on a capital basis from \$50.1 billion in 1Q 2019.⁸
 - There were 34 venture-backed initial public offerings during the quarter, which was significantly higher than the 14 completed in 1Q 2019.⁸
 - The number of M&A transactions totaled 163 deals in 2Q 2019, barely up from 162 deals in Q1 2019.⁷

Opportunity

- Early stage continues to be attractive, although we are monitoring valuation increases
- Smaller end of growth equity
- Technology sector

Leveraged Loans

Fundraising

- New CLO issuance totaled \$63.7 billion through 2Q 2019, up \$34.6 billion from 1Q 2019.²
- High-yield debt issuance totaled \$71.7 billion in 2Q 2019, up from \$60.5 billion issued in 1Q 2019.²
- Leveraged loan mutual fund net flows ended 2Q 2019 with a net outflow of \$17.6 billion, compared to a net outflow of \$10.1 billion through 1Q 2019.²

Activity

- Leverage for all LBO transactions ended the quarter at 5.7x, down slightly from 2018's level of 5.8x. Leverage continues to be comprised almost entirely of senior debt. The average leverage level for large cap LBOs was 5.8x during the quarter, up 0.1x from 1Q 2019.³
- YTD institutional new leveraged loan issuances totaled \$146.9 billion through 2Q 2019, down significantly from the \$270.4 billion issued during the same period in 2018.²
- 72.2% of new leveraged loans were used to support M&A and growth activity in 2Q 2019, down from 80.4% in 1Q 2019. This was above the prior five-year average of 61.7%.³
- European leveraged loan issuance decreased by 20.6% quarter-over-quarter to €12.0 billion, which was 35.4% of 2018's total sponsored loan volume.³
- High yield YTWs for BB, B, and CCC indices ended the quarter at 4.36%, 5.99%, and 10.14%, respectively.²

Opportunity

- Funds with the ability to source deals directly and the capacity to scale for large transactions
- Funds with an extensive track record and experience through prior credit cycles

Mezzanine

Fundraising

- Four funds closed on \$1.2 billion during the second quarter. This was a significant decrease from the \$12.4 billion raised by 10 funds in Q2 2018 and represented a decrease of 76.7% from the five-year quarterly average of \$5.1 billion.¹
- Estimated dry powder was \$51.5 billion at the end of 2Q 2019, down from the \$58.8 billion seen at the end of 1Q 2019.¹
- Fundraising activity picked up with an estimated 73 funds in market targeting \$29.0 billion of commitments, compared to 67 funds in market at the end of 2018 targeting \$25.0 billion of commitments. HPS Mezzanine Partners 2019 is the largest fund in market, targeting commitments of \$8.0 billion.¹

Opportunity

- Funds with the capacity to scale for large sponsored deals

Distressed Private Markets

Distressed Debt, Turnaround, & Special Situations Fundraising

Source: Preqin

High-Yield Bond Volume vs Default Rates

Source: UBS & Fitch Ratings

Fundraising

- During the quarter, \$15.3 billion was raised by 15 funds compared to \$5.0 billion raised by 14 funds in 1Q 2019.¹
 - 2Q 2019 fundraising was 39.6% higher than the five-year quarterly average of \$11.0 billion.
 - GSO Energy Select Opportunities Fund II was the largest partnership raised during the quarter, closing on \$4.5 billion.
- Dry powder was estimated at \$119.4 billion at the end of 2Q 2019, up slightly from the \$118.0 billion seen at the end of 1Q 2019. This was up compared to year-end 2018 (\$117.5 billion). This remained above the five-year average level of \$103.3 billion.¹
- Roughly 118 funds were in the market at the end of 2Q 2019, seeking \$59.7 billion in capital commitments.¹
 - Distressed debt managers were targeting the most capital, seeking an aggregate \$29.5 billion.
 - Fortress Credit Opportunities Fund V was the largest fund in market with a target fund size of \$5.0 billion.

Activity

- The LTM U.S. high-yield default rate was 1.9% as of July 2019, which was down from year-end 2018's LTM rate of 2.4%.⁶
- While spreads remained in line with the prior period, a declining LIBOR rate saw yields tighten during the quarter. Credit markets are bracing for a volatile period moving forward, which may result in opportunities for lenders.⁴
- High purchase prices and continued elevated levels of leverage may result in an increase in distressed opportunities looking out over the next two to three years, or sooner if there is a stall in the economy.

Opportunity

- Funds capable of performing operational turnarounds
- Funds with the flexibility to invest globally

Secondaries

Secondary Fundraising

Source: Preqin

Secondary Pricing

Source: UBS

Fundraising

- Four funds raised \$1.5 billion during the quarter, down from the \$2.2 billion raised by nine funds in Q1 2019 and the \$9.0 billion raised by ten funds in Q4 2018.¹
 - 2Q 2019's aggregate capital raised represents 6.4% of 2018's full year total.
 - Adams Street Global Secondary Fund VI was the largest fund raised during the quarter, closing on \$1.05 billion.¹
- Approximately 73% of secondaries funds in market are raising capital to target North America, up 54% from 1H 2018. An estimated 84% of secondaries funds are targeting private equity investments.¹
- At the end of 2Q 2019, there were an estimated 58 secondary and direct secondary funds in market, targeting approximately \$74.6 billion. Ardian Secondaries Fund VIII and Lexington Capital Partners IX were the largest funds in the market targeting \$12.0 billion each.¹
 - Two funds, Ardian Secondaries Fund VIII and Lexington Capital Partners IX (\$12.0 billion target), represent 32.2% of all capital being raised.¹

Activity

- Buyers have increasingly turned to leverage in their transactions in order to support attractive pricing and transaction execution. The spreads between committed capital and drawn capital by secondary purchasers has increased over the last quarter (and year).²
- The average discount rate for all private equity sectors finished Q2 2019 at 9.2%, down from 9.5% at the end of Q1 2019. The average buyout pricing discount ended at 6.4%, while venture ended at a discount of 18.8%.² The average buyout pricing discount for Q2 was down from Q1 2019's 6.8% discount, while the venture discount was up from 18.5%.
- Pricing, while having become slightly less favorable for buyers over the last quarter, is expected to remain attractive for sellers given the continued high levels of dry powder and competition for secondary transactions. Pricing increased marginally in Q2 due to reduced public market volatility and a slight decline in secondary fundraising.²
- For buyout pricing, tail-end vintages were being traded at larger discounts, while top performing funds continued to obtain premiums for their assets. While there is support and interest in pre-2010 vintage funds, there is significant volume and competition for younger vintages where premiums are often being commanded.²

Opportunity

- Funds that are able to execute complex and structured transactions at scale
- Funds that are able to leverage their long-standing relationships and networks in the secondaries marketplace
- Niche strategies

Infrastructure

Global Infrastructure Fundraising

Source: Preqin

Number of Deals Completed

Source: Preqin

Fundraising

- \$23.1 billion of capital was raised by 29 funds in 2Q 2019 compared to \$18.3 billion of capital raised by 21 partnerships in 1Q 2019, as capital continues to be concentrated around a smaller set of infrastructure managers.¹
 - About 87.4% of the capital raised is targeting investment in North America or Europe.¹
- As of the end of 1Q 2019, there were an estimated 173 funds in the market seeking roughly \$162.0 billion, compared to 210 funds targeting \$190.0 billion in 1Q 2019.¹
 - The majority of infrastructure funds in market are targeting capital commitments of \$1.0 billion or more.¹
 - Global Infrastructure Partners IV and Brookfield Infrastructure Fund IV were the largest funds in the market as of the end of 2Q 2019, targeting \$20.0 billion each. Both are focused on making investments within the U.S.¹
- At the end of the quarter, dry powder stood at an estimated \$217.0 billion, up from Q1 2019 of \$185.0 billion.¹ Current dry powder levels for infrastructure are at five year highs.¹
- Concerns surrounding the relative availability and pricing of assets remain. Fundraising continues to be very competitive given the number of funds and aggregate target level of funds in market. Investor appetite for the asset class persists despite the record levels of dry powder and increased investment activity from strategic and corporate buyers as well as institutional investors.

Activity

- Infrastructure managers completed 582 deals with an estimated aggregate deal value of \$155.0 billion in 2Q 2019 compared to 552 deals totaling \$63.0 billion a quarter ago.¹ The average deal value during the quarter was \$266.3 million, up compared to the five-year average of \$135.0 million.
 - North America accounted for 33.5% of the deals in 2Q 2019, while 36.6% and 12.2% of deals were transacted in Europe and Asia, respectively.¹
 - Renewable energy was the dominant industry during the quarter with 52.9% of transactions, followed by the utilities and conventional energy sectors, which accounted for 14.4% and 13.9%, respectively, of the quarter's deals. Transport accounted for 9.6% of transactions.¹

Opportunity

- Greenfield infrastructure is less competitive and offers a premium for managers willing to take on construction risk

Source: Preqin

Energy & Utilities Deal Activity

Source: Preqin

Fundraising

- During 2Q 2019, two funds closed on \$0.4 billion compared to five funds totaling \$1.5 billion in 1Q 2019.¹
- At the end of 2Q 2019, there were roughly 97 funds in the market targeting an estimated \$36.6 billion in capital, compared to 94 funds seeking an estimated \$36.1 billion in 1Q 2019.¹
 - NGP Natural Resources XII was seeking the most capital with a target fund size of \$5.3 billion.
- Dry powder was estimated at \$49.7 billion at the end of 2Q 2019, which was down 7.8% from 1Q 2019's level, and remains below the record level of \$72.1 billion observed in 4Q 2015.¹

Activity

- Energy and utilities industry managers completed 80 deals totaling a reported \$12.4 billion in 2Q 2019, representing 51.6% and 36.1% of 2018's total deal activity and total deal value, respectively.¹
- Crude oil prices decreased during the quarter.
 - WTI crude oil prices decreased 6.0% during the quarter to \$54.66/bbl.¹¹
 - Brent crude oil prices ended the quarter at \$64.22/bbl, down 2.9% from Q1 2019.¹¹
- Natural gas prices (Henry Hub) decreased by a significant 18.6% during the second quarter, ending at \$2.40 per MMBtu.¹¹
- A total of 958 crude oil and natural gas rotary rigs were in operation in the U.S. at the end of 2Q 2019, down 5.4% from the prior quarter. Crude oil rigs represented 81.8% of the total rigs in operation, while gas rigs represented 18.0% of the total rigs in operation.¹⁵
- The price of iron ore (Tianjin Port) ended the second quarter at \$108.94 per dry metric ton, up by 26.0% quarter-over-quarter.¹²

Opportunity

- Acquire and exploit existing oil and gas strategies preferred over early stage exploration in core U.S. and Canadian basins
- Select midstream opportunities

Appendix B:

Real Estate Market Update

2Q 2019

United States Real Estate Market Update (2Q19)

General

- The S&P 500 produced a gross total return of 4.3% during the quarter. The MSCI US REIT index produced a return of 1.3%. Consumer Sentiment remained flat at 98.2, but rose subsequent to quarter-end.
- Macro indicators for U.S. real estate continue to be positive; GDP grew at an annualized rate of 2.3% in the second quarter and headline CPI rose by 1.8% YoY, below the Fed's 2% target. As of quarter-end, the economy has now experienced 105 consecutive months of job growth. The Federal Reserve has paused its tightening of monetary policy, and cut the effective federal funds rate, which was 2.13% at quarter-end.

Commercial Real Estate

- Private real estate market carrying values remained flat over the quarter. Transaction cap rates (5.3%) compressed 5 bps during the quarter, while current valuation cap rates expanded across property sectors, apartments (+6 bps), industrial (+11 bps), office (+18 bps), and retail (+16 bps).
- NOI growth by sector continued to deviate during the quarter, with the industrial and apartments sector continuing to outpace the other traditional property types. While the industrial sector has faced increasing supply, it continues to benefit from outsized demand tailwinds (e-commerce and economic growth). On the other hand, retail experienced negative 40 bps of NOI growth during the quarter.
- In the second quarter of 2019, \$23 bn of aggregate capital was raised by real estate funds. In 2018, private equity real estate funds raised \$236 bn which is an increase of 9% YoY. However, transaction volume declined during the 1st quarter by 18% year over year to \$28 bn.
- 10-year treasury bond yields dropped 40 bps to 2.0% during the quarter, and, subsequent to quarter-end, have dropped further to 1.7%. A combination of expansionary fiscal policy and tightening monetary policy have led to increasing short-term interest rates and an inversion of the yield curve.

Empower Results® 31

United States Property Matrix (2Q19)

INDUSTRIAL	MULTIFAMILY
- In 2Q19, industrial properties were the highest returning sector at 3.4% and outperformed the NPI by 191 bps. - Transaction volumes reached \$19.1 billion in the second quarter of the year, a 4.0% year-over-year decrease. Individual asset sales were up 13.6% year-over-year, while portfolio sales drove the decline in year-over-year volume (-31.5%). - The industrial sector continued to experience steady NOI growth of 8.9% over the past year, increasing from the prior periods TTM growth of 8.6% in 1Q19. Market rent growth is expected to decelerate compared to the recent phenomenal pace, but still remains strong. - Vacancy declined 40 bps to 3.1%, close to all-time historic lows. E-commerce continues to drive demand. - Industrial cap rates compressed approximately 12 bps from a year ago, to 4.8%. Industrial fundamentals still top all property sectors.	- The apartment sector delivered a 1.4% return during the quarter, underperforming the NPI by 9 bps. - Transaction volume in the second quarter of 2019 reached \$45.6 billion, an increase of 25.3% year-over-year. This volume continues to make multifamily the most actively traded sector for the eighth straight quarter. - Cap rates increased to 4.4%, expanding 9 bps year-over-year. Robust job growth and improving wages have supported healthy operating fundamentals. - Steady demand for the sector continues to keep occupancy above 94.3%, over a 1.0% increase from a year ago. Delayed deliveries from construction labor bottlenecks have created a gap between permitting activity and starts volume.
OFFICE	RETAIL
- The office sector returned 1.7% in 2Q19, 15 bps above the NPI return over the period. - Transaction volumes increased by 36.4% year-over-year in Q2. Annual sales volumes equaled \$39.5 billion for the quarter. Single asset transactions accounted for 77% of volume. - Occupancy growth within the office sector has improved, increasing 1.0% year-over-year. Office continues to be the highest vacancy property type at close to 9.8%. - NOI growth of 4.4% in the last year is a positive as the sector continues to benefit from positive job growth. Sun Belt and tech-oriented West Coast office fundamentals are healthiest. - Office cap rates compressed slightly from a year ago to approximately 4.8% in the second quarter. Office-using job growth is positive, though decelerating as expected.	- As of 2Q19, the retail sector delivered a quarterly return of -0.1%, performing 162 bps below the NPI. - Transaction volumes totaled \$16.9 billion in the second quarter, down 22.7% year-over-year. - Cap rates have expanded approximately 25 bps within the sector over the last year. Strong fundamental headwinds continue to effect the retail landscape. - NOI growth has been negative for five consecutive quarters. NOI has declined 40 bps over the past year. Retail is expected to continue to suffer from the shift towards e-commerce. - Retail vacancy rates declined 74 bps over the past year to 6.8%. Many big box stores have closed as the need for retail space shrinks, translating to a negative outlook for rent growth.

Global Real Estate Market Update (2Q19)

- Global investment activity during the second quarter of 2019 continues to slow, and YoY transaction activity has decreased.

- Geopolitical uncertainty and its potential impacts on the global real estate markets has remained a principal concern for investors. However, global commercial real estate is still positioned to steadily perform in 2019. Despite compressing yields, broad decreases in risk-free rates has increased the value of real estate yields. Capital values and rents are expected to increase during the year. However, full-year global investment volumes are expected to decline by 5-10%, especially in the office and retail sectors.

Global Total Commercial Real Estate Volume - 2018 - 2019

\$ US Billions	Q2 2019	Q2 2018	% Change		H1 2019	H1 2018	% Change	
			Q2 19 - Q2 18				H1 19 - H1 18	
Americas	120	114	5%		214	221	-3%	
EMEA	67	79	-15%		126	158	-20%	
Asia Pacific	257	211	22%		433	428	1%	
Total	444	404	10%		773	807	-4%	

Source: Real Capital Analytics, Inc., Q2' 19

- In the second quarter, investment volumes in the Americas to decline YoY, led by the U.S., Brazil, and Mexico.
- Asia-Pacific cross-border investment activity slightly decreased in the second quarter. Despite this, Asia-Pacific has shown the best first-half of the year performance on record. This growth was driven by robust activity in China and Singapore.
- In EMEA, the decline in investment volume is largely attributable to uncertainty over Brexit in the UK and ongoing structural changes in the retail sector.
- In the office sector, leasing activity continued to increase through the second quarter of 2019. The U.S. office market continued to perform well, driven by demand from the technology and co-working industries. Europe's net absorption outperformed the 10 year average, led by performance in Madrid. In Asia Pacific's office market gross leasing volumes witnessed a 30% year-over year decline due to limited availability of space, economic uncertainty and trade tensions. Globally, aggregate rental growth for prime office locations is expected to stay positive in 2019 and office vacancy is expected to continue to fall.
- In the retail sector, the U.S. net absorption declined by 45% YoY in the second quarter. Strengthening labor markets and wage growth in Europe has positively impacted consumer spending, and retailers continue to focus on rightsizing their store portfolios. Asia Pacific retailers are focusing their efforts on providing unique products and targeting niche consumer segments. Australia is experiencing challenging retailer market pressures and rising incentives leading to modest rental growth.
- The multifamily market in the U.S. has continued to see growth in demand and declines in vacancy rates. There has been an increase in construction activity which is likely to lead to some near-term supply headwinds. Investment activity in European multifamily markets was lower due to rent control regulation leading to investor caution.
- The global industrial market continued to perform well during the quarter, with vacancy rates in the U.S. and Asia Pacific at all-time lows, as demand continues to be robust. U.S. rental rates are expected to increase, driven by robust leasing momentum. Demand has been strong in the European logistics market as well, however, a slight deceleration in the rate of growth suggests the sector may be entering a stage of stabilization.

Capital Markets Outlook

Takeaways

- From a market performance perspective, September was a relatively normal “risk-on” month as most Global Equity markets produced positive returns whereas most sovereign-oriented Fixed Income markets produced negative returns. On a year-to-date basis, however, most indices across Global Equity and Global Fixed Income markets have produced unusually high returns.
- Recent interest rate movements are historically consistent with oncoming recessions. However, economic data remains extremely mixed and shifting political rhetoric regarding global trade has added to short-term uncertainty. In the face of all this, Global Equity markets have continued to deliver positive returns.
- While there continues to be significant discussion regarding interest rates (e.g., yield curve inversions, central bank policy, etc.), the complexity of the current environment has increased what is always an immense challenge for forecasting.
- US Equity markets remain expensive whereas Non-US Equity markets remain reasonably valued relative to their history.
- Implied equity market volatility¹ remained lower than its historical average (≈ 19) throughout the entire month of September, although this metric did steadily rise from mid-month (≈ 13) to the end of the month (≈ 17).
- The Market Sentiment Indicator² stayed at **neutral** at month end.
- Market uncertainty, as measured by Systemic Risk, decreased during September. With that said, recent economic data suggests that the global economy is in a slowing, but not yet recessionary, phase. The potential for negative surprises exists as global economies navigate their respective “late-cycle” dynamics and geopolitical events continue to unfold, as evidenced by recent market movements.
- *New Addition: We incorporated a measure of Fixed Income Volatility to the Dashboard.*

¹ As measured by VIX Index.

² See Appendix for the rationale for selection and calculation methodology used for the risk metrics.

- Dashboard (1) summarizes the current state of the different valuation metrics per asset class relative to their own history.

¹ With the exception of Private Equity Valuation that are available annually and data is as of December 31, 2018.

Risk Overview/Dashboard (2) (As of September 30, 2019)

- Dashboard (2) shows how the current level of each indicator compares to its respective history.

Market Sentiment Indicator (All History) (As of September 30, 2019)

Market Sentiment Indicator (Last Three Years) (As of September 30, 2019)

US Equity Cyclically Adjusted P/E¹ (As of September 30, 2019)

- This chart details one valuation metric for US Equities. A higher (lower) figure indicates more expensive (cheaper) valuation relative to history.

¹ US Equity Cyclically Adjusted P/E on S&P 500 Index – Source: Robert Shiller and Yale University.

Small Cap P/E vs. Large Cap P/E¹ (As of September 30, 2019)

- This chart compares the relative attractiveness of Small Cap US Equities vs. Large Cap US Equities on a valuation basis. A higher (lower) figure indicates that Large Cap (Small Cap) is more attractive.

¹ Small Cap P/E (Russell 2000 Index) vs. Large Cap P/E (Russell 1000 Index) - Source: Russell Investments. Earnings figures represent 12-month "as reported" earnings.

Growth P/E vs. Value P/E¹ (As of September 30, 2019)

- This chart compares the relative attractiveness of US Growth Equities vs. US Value Equities on a valuation basis. A higher (lower) figure indicates that Value (Growth) is more attractive.

¹ Growth P/E (Russell 3000 Growth Index) vs. Value (Russell 3000 Value Index) P/E - Source: Bloomberg, MSCI, and Meketa Investment Group. Earnings figures represent 12-month "as reported" earnings.

Developed International Equity Cyclically Adjusted P/E¹ (As of September 30, 2019)

- This chart details one valuation metric for Developed International Equities. A higher (lower) figure indicates more expensive (cheaper) valuation relative to history.

¹ Developed International Equity (MSCI EAFE ex Japan Index) Cyclically Adjusted P/E – Source: MSCI and Bloomberg. Earnings figures represent the average of monthly “as reported” earnings over the previous ten years.

Emerging Market Equity Cyclically Adjusted P/E¹ (As of September 30, 2019)

- This chart details one valuation metric for Emerging Markets Equities. A higher (lower) figure indicates more expensive (cheaper) valuation relative to history.

¹ Emerging Market Equity (MSCI Emerging Markets Index) Cyclically Adjusted P/E – Source: MSCI and Bloomberg. Earnings figures represent the average of monthly “as reported” earnings over the previous ten years.

Private Equity Multiples¹ (As of December 31, 2018)²

- This chart details one valuation metric for the Private Equity market. A higher (lower) figure indicates more expensive (cheaper) valuation relative to history.

¹ Private Equity Multiples – Source: S&P LCD Average EBITDA Multiples Paid in All LBOs.

² Only annual figures available.

Core Real Estate Spread vs. Ten-Year Treasury¹ (As of September 30, 2019)

- This chart details one valuation metric for the Private Core Real Estate market. A higher (lower) figure indicates cheaper (more expensive) valuation.

¹ Core Real Estate Spread vs. Ten-Year Treasury – Source: Real Capital Analytics, US Treasury, Bloomberg, and Meketa Investment Group. Core Real Estate is proxied by weighted sector transaction based indices from Real Capital Analytics and Meketa Investment Group.

REITs Dividend Yield Spread vs. Ten-Year Treasury¹ (As of September 30, 2019)

- This chart details one valuation metric for the Public REITs market. A higher (lower) figure indicates cheaper (more expensive) valuation.

¹ REITs Dividend Yield Spread vs. Ten-Year Treasury – Source: NAREIT, US Treasury. REITs are proxied by the yield for the NAREIT Equity index.

Credit Spreads¹ (As of September 30, 2019)

- This chart details one valuation metric for the US Credit markets. A higher (lower) figure indicates cheaper (more expensive) valuation relative to history.

¹ Credit Spreads – Source: Barclays Capital. High Yield is proxied by the Barclays High Yield index and Investment Grade Corporates are proxied by the Barclays US Corporate Investment Grade index.

Emerging Market Debt Spreads¹ (As of September 30, 2019)

- This chart details one valuation metric for the EM Debt markets. A higher (lower) figure indicates cheaper (more expensive) valuation relative to history.

¹ EM Spreads – Source: Bloomberg. Option Adjusted Spread (OAS) for the Bloomberg Barclays EM USD Aggregate Index.

Equity Volatility ¹ (As of September 30, 2019)

- This chart details historical implied equity market volatility. This metric tends to increase during times of stress/fear and while declining during more benign periods.

¹ Equity Volatility – Source: Bloomberg, and Meketa Investment Group. Equity Volatility proxied by VIX Index, a Measure of implied option volatility for US equity markets.

Fixed Income Volatility ¹ (As of September 30, 2019)

- This chart details historical implied fixed income market volatility. This metric tends to increase during times of stress/fear and while declining during more benign periods.

¹ Fixed Income Volatility – Source: Bloomberg, and Meketa Investment Group. Fixed Income Volatility proxied by MOVE Index, a Measure of implied option volatility for US Treasury markets.

Systemic Risk and Volatile Market Days¹ (As of September 30, 2019)

- Systemic Risk is a measure of 'System-wide' risk, which indicates herding type behavior. This measure declined materially during September.

¹ Source: Meketa Investment Group, as of September 30, 2019. Volatile days are defined as the top 10 percent of realized turbulence, which is a multivariate distance between asset returns.

Yield Curve Slope (Ten Minus Two)¹ (As of September 30, 2019)

- This chart details the historical difference in yields between ten-year and two-year US Treasury bonds/notes. A higher (lower) figure indicates a steeper (flatter) yield curve slope.

¹ Yield Curve Slope (Ten Minus Two) – Source: Bloomberg, and Meketa Investment Group. Yield curve slope is calculated as the difference between the 10-Year US Treasury Yield and 2-Year US Treasury Yield.

Ten-Year Breakeven Inflation¹ (As of September 30, 2019)

- This chart details the difference between nominal and inflation-adjusted US Treasury bonds. A higher (lower) figure indicates higher (lower) inflation expectations.

¹ Ten-Year Breakeven Inflation – Source: US Treasury and Federal Reserve. Data is as of June 30, 2019 for TIPS and Treasuries. Inflation is measured by the Consumer Price Index (CPI-U NSA).

Total Return Given Changes in Interest Rates (bps)¹ (As of September 30, 2019)

	Total Return for Given Changes in Interest Rates (bps)									Statistics	
	-100	-50	0	50	100	150	200	250	300	Duration	YTW
Barclays US Short Treasury (Cash)	2.0%	1.8%	1.7%	1.5%	1.4%	1.3%	1.1%	1.0%	0.8%	0.29	1.69%
Barclays US Treasury 1-3 Yr.	3.5%	2.6%	1.7%	0.8%	-0.2%	-1.2%	-2.1%	-3.1%	-4.1%	1.84	1.68%
Barclays US Treasury Intermediate	5.4%	3.4%	1.4%	-0.5%	-2.3%	-4.1%	-5.9%	-7.6%	-9.2%	3.87	1.42%
Barclays US Treasury Long	22.5%	11.7%	2.0%	-6.7%	-14.3%	-20.8%	-26.3%	-30.7%	-34.0%	18.4	1.98%

¹ Data represents the expected total return from a given change in interest rates (shown in basis points) over a 12-month period assuming a parallel shift in rates. Data is as of September 30, 2019 via Barclays, Bloomberg, and Meketa Investment Group.

Long-Term Outlook – 20-Year Annualized Expected Returns¹

- This chart details Meketa's long-term forward-looking expectations for total returns across asset classes.

¹ Source: Meketa Investment Group's 2019 Annual Asset Study.

Meketa Market Sentiment Indicator

Explanation, Construction and Q&A

Meketa has created the MIG Market Sentiment Indicator (MIG-MSI) to complement our valuation-focused Risk Metrics. This measure of sentiment is meant to capture significant and persistent shifts in long-lived market trends of economic growth risk, either towards a risk-seeking trend or a risk-aversion trend.

This appendix explores:

- What is the Meketa Market Sentiment Indicator?
- How do I read the indicator graph?
- How is the Meketa Market Sentiment Indicator constructed?
- What do changes in the indicator mean?

Meketa has created a market sentiment indicator for monthly publication (the MIG-MSI – see below) to complement Meketa's Risk Metrics.

- Meketa's Risk Metrics, which rely significantly on standard market measures of relative valuation, often provide valid early signals of increasing long-term risk levels in the global investment markets. However, as is the case with numerous valuation measures, the Risk Metrics may convey such risk concerns long before a market corrections take place. The MIG-MSI helps to address this early-warning bias by measuring whether the markets are beginning to acknowledge key Risk Metrics trends, and / or indicating non-valuation based concerns. Once the MIG-MSI indicates that the market sentiment has shifted, it is our belief that investors should consider significant action, particularly if confirmed by the Risk Metrics. Importantly, Meketa believes the Risk Metrics and MIG-MSI should always be used in conjunction with one another and never in isolation. The questions and answers below highlight and discuss the basic underpinnings of the Meketa MIG-MSI:

What is the Meketa Market Sentiment Indicator (MIG-MSI)?

- The MIG-MSI is a measure meant to gauge the market's sentiment regarding economic growth risk. Growth risk cuts across most financial assets, and is the largest risk exposure that most portfolios bear. The MIG-MSI takes into account the momentum (trend over time, positive or negative) of the economic growth risk exposure of publicly traded stocks and bonds, as a signal of the future direction of growth risk returns; either positive (risk seeking market sentiment), or negative (risk averse market sentiment).

How do I read the Meketa Market Sentiment Indicator graph?

- Simply put, the MIG-MSI is a color-coded indicator that signals the market's sentiment regarding economic growth risk. It is read left to right chronologically. A green indicator on the MIG-MSI indicates that the market's sentiment towards growth risk is positive. A gray indicator indicates that the market's sentiment towards growth risk is neutral or inconclusive. A red indicator indicates that the market's sentiment towards growth risk is negative. The black line on the graph is the level of the MIG-MSI. The degree of the signal above or below the neutral reading is an indication the signal's current strength.
- Momentum as we are defining it is the use of the past behavior of a series as a predictor of its future behavior.

How is the Meketa Market Sentiment Indicator (MIG-MSI) Constructed?

- The MIG-MSI is constructed from two sub-elements representing investor sentiment in stocks and bonds:
 - Stock return momentum: Return momentum for the S&P 500 Equity Index (trailing 12-months)
 - Bond yield spread momentum: Momentum of bond yield spreads (excess of the measured bond yield over the identical duration US Treasury bond yield) for corporate bonds (trailing 12-months) for both investment grade bonds (75% weight) and high yield bonds (25% weight).
 - Both measures are converted to Z-scores and then combined to get an “apples to apples” comparison without the need of re-scaling.
- The black line reading on the graph is calculated as the average of the stock return momentum measure and the bonds spread momentum measure.¹ The color reading on the graph is determined as follows:
 - If both stock return momentum and bond spread momentum are positive = GREEN (positive)
 - If one of the momentum indicators is positive, and the other negative = GRAY (inconclusive)
 - If both stock return momentum and bond spread momentum are negative = RED (negative)

¹ Momentum as we are defining it is the use of the past behavior of a series as a predictor of its future behavior.

“Time Series Momentum” Moskowitz, Ooi, Pedersen, August 2010. <http://pages.stern.nyu.edu/~lpederse/papers/TimeSeriesMomentum.pdf>

What does the Meketa Market Sentiment Indicator (MIG-MSI) mean? Why might it be useful?

- There is strong evidence that time series momentum is significant and persistent. In particular, across an extensive array of asset classes, the sign of the trailing 12-month return (positive or negative) is indicative of future returns (positive or negative) over the next 12-month period. The MIG-MSI is constructed to measure this momentum in stocks and corporate bond spreads. A reading of green or red is agreement of both the equity and bond measures, indicating that it is likely that this trend (positive or negative) will continue over the next 12 months. When the measures disagree, the indicator turns gray. A gray reading does not necessarily mean a new trend is occurring, as the indicator may move back to green, or into the red from there. The level of the reading (black line) and the number of months at the red or green reading, gives the user additional information on which to form an opinion, and potentially take action.

Comprehensive Performance Report

September 30, 2019

Description of SBI Investment Programs

The Minnesota State Board of Investment is responsible for the investment management of various retirement funds, trust funds and cash accounts.

Combined Funds

The Combined Funds represent the assets for both the active and retired public employees in the statewide retirement systems, the biggest of which are the Public Employees Retirement Association (PERA), the Teachers Retirement Association (TRA), and the Minnesota State Retirement System (MSRS). The SBI commingles the assets of these plans into the Combined Funds to capture investment efficiencies. All assets in the Combined Funds are managed externally by investment management firms retained by contract.

Participant Directed Investment Program

The Participant Directed Investment Program (PDIP) provides investment vehicles for a variety of retirement or other tax-advantaged savings plans. Investment goals among the PDIP's many participants are varied. In order to meet the variety of goals, participants may allocate their investments among one or more accounts that are appropriate for their needs within statutory requirements and rules established by the participating organizations. At this time, the assets of various retirement programs, including local firefighter groups, are included here.

Non-Retirement

The Non-Retirement Funds are funds established by the State of Minnesota and other government entities for various purposes which include the benefit of public schools, the environment, other post-employment benefits, workers compensation insurance, and other purposes.

State Cash

The State Cash accounts are cash balances of state government funds including the State General Fund. Most accounts are invested by SBI staff through a short-term pooled fund referred to as the Treasurer's Cash Pool. It contains the cash balances of special or dedicated accounts necessary for the operation of certain State agencies and non-dedicated cash in the State Treasury. Because of special legal restrictions, a small number of cash accounts cannot be commingled.

Performance Reporting Legend

Manager Level Data

Aggregate Level Data

Sub-Asset Class Level Data

Asset Class Level Data

Note:

Throughout this report performance is calculated net of investment management fees, aggregates include terminated managers, and returns for all periods greater than one year are annualized. Inception Date and Since Inception Returns refer to the date of retention by the SBI. FYTD refers to the return generated by an account since July 1 of the most recent year. For historical benchmark details, please refer to the addendum of this report. Inception to date return information is included for manager accounts and total asset class but not other aggregates because of portfolio management decisions to group managers in different aggregates over time.

Combined Funds

September 30, 2019

Combined Funds Summary

Combined Funds Change in Market Value (\$Millions)

	<u>One Quarter</u>
COMBINED FUNDS	
Beginning Market Value	\$70,658
Net Contributions	-655
Investment Return	687
Ending Market Value	70,691

The change in market value of the Combined Funds since the end of last quarter is due to net contributions and investment returns.

Performance (Net of Fees)

The Combined Funds' performance is evaluated relative to a composite of public market index and private market investment returns. The Composite performance is calculated by multiplying the beginning of month Composite weights and the monthly returns of the asset class benchmarks.

	<u>Qtr</u>	<u>FYTD</u>	<u>1 Yr</u>	<u>3 Yr</u>	<u>5 Yr</u>	<u>10 Yr</u>	<u>20 Yr</u>	<u>30 Yr</u>

COMBINED FUNDS - COMPOSITE INDEX	1.1	1.1	5.1	9.5	7.5	9.4	6.6	8.4
Excess	-0.1	-0.1	-0.4	0.2	0.0	0.3	0.2	0.2

Asset Growth

Combined Funds Summary

Asset Mix

The Combined Funds actual asset mix relative to the Strategic Asset Allocation Policy Target is shown below. Any uninvested portion of the Private Markets allocation is held in Public Equity.

	<u>(Millions)</u>	<u>Actual Mix</u>	<u>Policy Target</u>
Public Equity	\$44,485	62.9%	53.0%
Fixed Income	7,386	10.4	10.0
Private Markets	10,751	15.2	25.0
Treasuries	7,492	10.6	10.0
Cash	577	0.8	2.0
TOTAL	70,691	100.0	

Composite Index Comparison

The Combined Funds Composite is set as the Strategic Asset Allocation Policy Target with the uninvested portion of Private Markets allocated to Public Equity. Asset class weights for Public Equity and Private Markets are reset at the start of each month. The Combined Funds Composite weighting shown below is as of the first day of the quarter.

	<u>Policy Weight</u>	<u>Benchmark</u>
Public Equity	63.5%	Public Equity Benchmark
Fixed Income	10.0	BB Barclays U.S. Aggregate
Private Markets	14.6	Private Markets
Treasuries	10.0	BB Barclays Treasury 5+ Years
Cash	2.0	3 Month T-Bills

Combined Funds Asset Class Performance Summary

Public Equity

The Combined Funds Public Equity includes Domestic Equity and International Equity.

The Public Equity benchmark is 60.3% Russell 1000, 6.7% Russell 2000, 24.75% MSCI World ex US (net), and 8.25% MSCI EM (net).

The Russell 1000 and Russell 2000 measure the performance of the 1000 largest and 2000 next largest U.S. companies based on total market capitalization.

The MSCI World ex US index is composed of large and mid cap companies that capture approximately 85% of the total market capitalization in 22 of the 23 developed markets. The MSCI Emerging Markets index is composed of large and mid cap companies that capture approximately 85% of the total market capitalization across 24 Emerging Markets countries.

	<u>Last Qtr</u>	<u>FYTD</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>	<u>20 Year</u>	<u>30 year</u>
Public Equity	0.0%	0.0%	1.1%	10.9%	8.3%	10.9%	5.9%	8.8%
Public Equity Benchmark	0.1	0.1	1.5	10.8				
Excess	-0.1	-0.1	-0.4	0.1				
Domestic Equity	0.8	0.8	2.1	12.8	10.1	13.0	6.4	9.3
Domestic Equity Benchmark	1.0	1.0	2.8	12.8	10.4	13.1	6.6	9.5
Excess	-0.3	-0.3	-0.7	0.1	-0.3	-0.1	-0.2	-0.2
International Equity	-1.5	-1.5	-0.9	6.4	3.4	5.0	4.6	
International Equity Benchmark	-1.8	-1.8	-1.2	6.4	2.9	4.5	4.2	
Excess	0.3	0.3	0.2	0.1	0.5	0.5	0.4	

Note:

Prior to 6/30/16 the returns of Domestic and International Equity were not reported as a total Public Equity return. For additional information regarding historical asset class performance and benchmarks, please refer to the Combined Funds Performance Report.

Combined Funds Asset Class Performance Summary

Fixed Income

The Combined Funds Fixed Income program includes Core Fixed Income and Treasuries. The Combined Funds performance for these asset classes is shown here.

The Core Fixed Income benchmark is the Bloomberg Barclays U.S. Aggregate Index. This index reflects the performance of the broad bond market for investment grade (Baa or higher) bonds, U.S. Treasury and agency securities, and mortgage obligations with maturities greater than one year.

The Treasuries benchmark is the Bloomberg Barclays Treasury 5+ Years Index.

	<u>Last Qtr</u>	<u>FYTD</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>	<u>20 Year</u>	<u>30 year</u>
Fixed Income	2.3%	2.3%	10.4%	3.5%	3.8%	4.6%	5.4%	6.4%
Fixed Income Benchmark	2.3	2.3	10.3	2.9	3.4	3.7	5.0	6.1
Excess	0.1	0.1	0.1	0.5	0.5	0.9	0.4	0.4
Treasuries	4.5	4.5	17.0					
BBG BARC 5Y + Us Tsy Idx	4.6	4.6	17.2					
Excess	-0.1	-0.1	-0.2					

Cash

The Combined Funds Cash performance is shown here. Cash is held by the Combined Funds to meet the liquidity needs of the retirement systems to pay benefits.

	<u>Last Qtr</u>	<u>FYTD</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>	<u>20 Year</u>	<u>30 year</u>
Cash	0.6%	0.6%	2.4%	1.7%	1.1%	0.8%	2.2%	3.7%

Note:

For additional information regarding historical asset class performance and benchmarks, please refer to the Combined Funds Performance Report.

Combined Funds Asset Class Performance Summary

Private Markets

	<u>Last Qtr</u>	<u>FYTD</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>	<u>20 Year</u>	<u>25 year</u>	<u>30 year</u>
Private Markets	1.8%	1.8%	8.0%	13.7%	9.5%	12.6%	12.5%	13.7%	12.2%
Private Equity	3.5%	3.5%	12.8%	17.4%	14.3%	15.5%	13.3%	15.6%	
Private Credit	1.4	1.4	7.5	13.0	12.7	13.4	12.3		
Resources	-3.5	-3.5	-5.3	5.2	-4.8	5.9	14.9	14.4	
Real Estate	3.1	3.1	9.6	10.5	11.0	10.1	9.0	9.6	

Private Markets

The time-weighted rates of return for the Private Markets portfolio are shown here. Private Markets included Private Equity, Private Credit, Resources, and Real Estate. Some of the existing investments are relatively immature and returns may not be indicative of future results.

Private Equity Investments

The objectives of the Private Equity portfolio, which may include leveraged buyouts, growth equity, venture capital and special situations, are to achieve attractive returns and to provide overall portfolio diversification to the total plan.

Private Credit Investments

The objectives of the Private Credit portfolio, which may include mezzanine debt, direct lending, and other forms of non-investment grade fixed income instruments, are to achieve a high total return over a full market cycle and to provide some degree of downside protection and typically provide current income in the form of a coupon. In certain situations, investments in the Private Credit portfolio also provide an equity component of return in the form of warrants or re-organized equity.

Resource Investments

The objectives of the Resources portfolio, which may include energy, infrastructure, and other hard assets, are to provide protection against the risks associated with inflation and to provide overall portfolio diversification to the total plan.

Real Estate Investments

The objectives of the Real Estate portfolio, which may include core and non-core real estate investments, are to achieve attractive returns, preserve capital, provide protection against risks associated with inflation, and provide overall portfolio diversification to the total plan.

The SBI also monitors Private Markets performance using money-weighted return metrics such as Internal Rate of Return and Multiple of Invested Capital. For money-weighted return metrics please refer to the Combined Funds Performance Report.

Quarterly Report

Asset Class & Manager Performance

September 30, 2019

The assets of the Combined Funds are allocated to public equity, fixed income, private markets, and cash. Each asset class may be further differentiated by geography, management style, and/or strategy. Managers are hired to manage the assets accordingly. This diversification is intended to reduce wide fluctuations in investment returns on a year-to-year basis and enhances the Funds' ability to meet or exceed the actuarial return target over the long-term.

The Combined Funds consist of the assets of active employees and retired members of the statewide retirement plans. The SBI commingles the assets of these plans into the Combined Funds to capture investment efficiencies. This sharing is accomplished by grouping managers by asset class, geography, and management style, into several Investment Pools. The individual funds participate in the Investment Pools by purchasing units which function much like the shares of a mutual fund.

While the vast majority of the units of these pools are owned by the Combined Funds, the Supplemental Investment Fund also owns units of these pools. The Supplemental Investment Funds are mutual fund-like investment vehicles which are used by investors in the Participant Directed Investment Program. Please refer to the Participant Directed Investment Program report for more information.

The performance information presented on the following pages for Public Equity and Fixed Income includes both the Combined Funds and Supplemental Investment Fund. The Private Markets is Combined Funds only. All assets in the Combined Funds are managed externally by investment management firms retained by contract.

Combined Funds Asset Class Performance Summary

Private Markets

	<u>Last Qtr</u>	<u>FYTD</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>	<u>20 Year</u>	<u>25 year</u>	<u>30 year</u>
Private Markets	1.8%	1.8%	8.0%	13.7%	9.5%	12.6%	12.5%	13.7%	12.2%
Private Equity	3.5%	3.5%	12.8%	17.4%	14.3%	15.5%	13.3%	15.6%	
Private Credit	1.4	1.4	7.5	13.0	12.7	13.4	12.3		
Resources	-3.5	-3.5	-5.3	5.2	-4.8	5.9	14.9	14.4	
Real Estate	3.1	3.1	9.6	10.5	11.0	10.1	9.0	9.6	

Private Markets

The time-weighted rates of return for the Private Markets portfolio are shown here. Private Markets included Private Equity, Private Credit, Resources, and Real Estate. Some of the existing investments are relatively immature and returns may not be indicative of future results.

Private Equity Investments

The objectives of the Private Equity portfolio, which may include leveraged buyouts, growth equity, venture capital and special situations, are to achieve attractive returns and to provide overall portfolio diversification to the total plan.

Private Credit Investments

The objectives of the Private Credit portfolio, which may include mezzanine debt, direct lending, and other forms of non-investment grade fixed income instruments, are to achieve a high total return over a full market cycle and to provide some degree of downside protection and typically provide current income in the form of a coupon. In certain situations, investments in the Private Credit portfolio also provide an equity component of return in the form of warrants or re-organized equity.

Resource Investments

The objectives of the Resources portfolio, which may include energy, infrastructure, and other hard assets, are to provide protection against the risks associated with inflation and to provide overall portfolio diversification to the total plan.

Real Estate Investments

The objectives of the Real Estate portfolio, which may include core and non-core real estate investments, are to achieve attractive returns, preserve capital, provide protection against risks associated with inflation, and provide overall portfolio diversification to the total plan.

The SBI also monitors Private Markets performance using money-weighted return metrics such as Internal Rate of Return and Multiple of Invested Capital. For money-weighted return metrics please refer to the Combined Funds Performance Report.

Notes

None of the data presented herein has been reviewed or approved by either the general partner or investment manager. The performance and valuation data presented herein is not a guarantee or prediction of future results. Ultimately, the actual performance and value of any investment is not known until final liquidation. Because there is no industry-standardized method for valuation or reporting comparisons of performance and valuation data among different investments is difficult.

Data presented in this report is made public pursuant to Minn. Stat. Chs. 13 and 13D, and Minn. Stat. § 11A.24, subd. 6(c). Additional information on private markets investments may be classified as non-public and not subject to disclosure.

* MOIC: Multiple of Invested Capital

**Partnership interests transferred to the MSBI during 1Q2015. All data presented as of the transfer date.

Quarterly Report

Participant Directed Investment Program

The Participant Directed Investment Program (PDIP) provides investment vehicles for a variety of retirement or other tax-advantaged savings plans. The objective of the Plan is to be competitive in the marketplace by providing quality investment options with low fees to its participants. Investment goals among the PDIP's many participants are varied.

- The Supplemental Investment Fund (SIF) is an investment platform that provides participants with the option to invest in many of the same pools as the Combined Fund in addition to a Stable Value Fund and a Money Market Fund. The Volunteer Firefighter Account is an option in the SIF for local firefighter entities that join the Statewide Voluntary Firefighter Plan administered by PERA. The investment vehicles are structured much like a family of mutual funds where participating entities buy or sell units in each fund. Participants may allocate their investments among one or more funds that are appropriate for their needs and are within statutory requirements and rules established by the participating organizations.
- The Mutual Fund Line-up is an investment platform that offers participants three sets of investment options. The first is a set of actively and passively managed mutual funds, a Stable Value Fund and a Money Market Fund. The second is a set of target date funds called Minnesota Target Retirement Funds. The third is a self-directed brokerage account window which offers thousands of mutual funds. The SBI has no direct management responsibilities for funds within the self-directed brokerage account window. Participants may allocate their investments among one or more accounts that are appropriate for their needs within the statutory requirements and rules established by the participating organizations.
- The SBI is responsible for the investment options provided in the two State Sponsored Savings Plans, which are established under provisions of the Internal Revenue Code 529, the Minnesota College Savings Plan and Minnesota Achieving a Better Life Experience Plan (ABLE). The Minnesota College Savings Plan is an educational savings plan designed to help families save for qualified nationwide college costs. The SBI is responsible for the investments and the Minnesota Office of Higher Education (OHE) is responsible for the overall administration of the Plan. The SBI and OHE have contracted jointly with TIAA-CREF Tuition Financing, Inc. to provide administrative, marketing, communication, recordkeeping and investment management services. The ABLE Plan is a savings plan designed to help individuals save for qualified disability expenses without losing eligibility for certain assistance programs. The plan is administered by the Department of Human Services (DHS). The SBI and DHS have jointly contracted with Ascensus to provide recordkeeping, administrative, and investment management services for the plan.

The investment returns shown in this report are calculated using a time-weighted rate of return formula. These returns are net of investment management fees and transaction costs. They do not, however, reflect administrative expenses that may be deducted by the retirement systems or other agencies to defray administrative costs.

Supplemental Investment Fund Summary

The Minnesota Supplemental Investment Fund (SIF) is a multi-purpose investment platform that offers a range of investment options to state and local public employees. This investment platform provides some or all of the investment options to the Public Employees Retirement Association (PERA) Defined Contribution Plan, local pension plans and the Statewide Volunteer Firefighter plan.

A wide diversity of investment goals exists among the Fund's participants. In order to meet those needs, the Fund has been structured much like a "family of mutual funds." Participants may allocate their investments among one or more accounts that are appropriate for their needs, within the statutory requirements and rules established by the participating organizations. Participation in the Fund is accomplished through the purchase or sale of shares in each account. All returns are net of investment management fees.

Investment Option Descriptions

- Balanced Fund - a balanced portfolio utilizing both common stocks and bonds
- U.S. Stock Actively Managed Fund - an actively managed, U.S. common stock portfolio.
- U.S. Stock Index Fund - a passively managed, common stock portfolio designed to broadly track the performance of the U.S. stock market.
- Broad International Stock Fund - a portfolio of non-U.S. stocks that incorporates both active and passive management.
- Bond Fund - an actively managed, bond portfolio.
- Money Market Fund - a portfolio utilizing short-term, liquid debt securities.
- Stable Value Fund - a portfolio of stable value instruments, including security backed contracts and insurance company and bank investment contracts.
- Volunteer Firefighter Account - a balanced portfolio only used by the Statewide Volunteer Firefighter Plan.

Supplemental Investment Fund Performance

Balanced Fund

The primary investment objective of the Balanced Fund is to gain exposure to publicly traded U.S. equities, bond and cash in a diversified investment portfolio. The Fund seeks to maximize long-term real rates of return, while limiting short-run portfolio return volatility. The Balanced Fund is invested in a balanced portfolio of common stocks and bonds. Common stocks provide the potential for significant capital appreciation, while bonds act as a deflation hedge and provide portfolio diversification. The benchmark is a blend of 60% Russell 3000/35% Barclays Aggregate Bond Index/5% T-Bills Composite.

SIF BALANCED FUND BENCHMARK		1.6	5.9	8.9	7.7	9.3
Excess		1.8	1.7	0.9	0.5	0.5

U.S. Actively Managed Fund

The U.S. Stock Actively Managed Fund's investment objective is to generate above-average returns from capital appreciation on common stocks. The U.S. Stock Actively Managed Fund is invested primarily in the common stocks of U.S. companies. The managers in the account also hold varying levels of cash.

	<u>Ending Market Value</u>	<u>Last Qtr</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>
U.S. ACTIVELY MANAGED FUND	60,362,194	-0.7	0.9	13.6	10.4	13.2

Excess		-1.9	-2.0	0.7	-0.0	0.1

Supplemental Investment Fund Performance

U.S. Stock Index Fund

The investment objective of the U.S. Stock Index Fund is to generate returns that track those of the U.S. stock market as a whole. The Fund is designed to track the performance of the Russell 3000 Index, a broad-based equity market indicator. The Fund is invested 100% in common stock.

	<u>Ending Market Value</u>	<u>Last Qtr</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>
U.S. STOCK INDEX FUND	\$358,248,991	1.2%	3.0%	12.8%	10.5%	13.1%
Russell 3000		1.2	2.9	12.8	10.4	13.1
Excess		0.0	0.0	0.0	0.0	0.0

Broad International Stock Fund

The investment objective of the Broad International Stock Fund is to earn a high rate of return by investing in the stock of companies outside the U.S. Portions of the Fund are passively managed and semi-passively managed. These portions of the Fund are designed to track and modestly outperform, respectively, the return of developed markets included in the MSCI World ex USA Index. A portion of the Fund is "actively managed" by several international managers and emerging markets specialists who buy and sell stocks in an attempt to maximize market value. The International Equity Benchmark is currently the MSCI ACWI ex USA (net).

	<u>Ending Market Value</u>	<u>Last Qtr</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>
BROAD INTERNATIONAL STOCK FUND	109,303,224	-1.5	-0.9	6.4	3.4	5.0
International Equity Benchmark		-1.8	-1.2	6.4	2.9	4.5
Excess		0.3	0.2	0.1	0.5	0.5

Supplemental Investment Fund Performance

Bond Fund

The investment objective of the Bond Fund is to exceed the return of the broad domestic bond market by investing in fixed income securities. The Bond Fund invests primarily in high-quality, government and corporate bonds that have intermediate to long-term maturities, usually 3 to 20 years. The Bond Fund benchmark is the Bloomberg Barclays U.S. Aggregate.

	<u>Ending Market Value</u>	<u>Last Qtr</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>
BOND FUND	\$108,621,148	2.3%	10.4%	3.5%	3.8%	4.6%
BBG BARC US Agg		2.3	10.3	2.9	3.4	3.7
Excess		0.1	0.1	0.5	0.5	0.9

Money Market Fund

The investment objective of the Money Market Fund is to protect principal by investing in short-term, liquid U.S. Government securities. The Fund is invested entirely in high-quality, short-term U.S. Treasury and Agency securities. The average maturity of the portfolios is less than 90 days. Please note that the Market Value for the Money Market Fund reflects assets held through the Deferred Compensation Plan as well.

	<u>Ending Market Value</u>	<u>Last Qtr</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>
MONEY MARKET FUND	489,764,230	0.6	2.5	1.7	1.2	0.7
ICE BofAML US 3-Month Treasury Bill		0.6	2.4	1.5	1.0	0.5
Excess		0.0	0.2	0.2	0.2	0.1

Supplemental Investment Fund Performance

Stable Value Fund

The investment objectives of the Stable Value Fund are to protect investors from loss of their original investment and to provide competitive interest rates using somewhat longer-term investments than typically found in a money market fund. The Fund is invested in a well-diversified portfolio of high-quality fixed income securities with strong credit ratings. The Fund also invests in contracts issued by highly rated insurance companies and banks which are structured to provide principal protection for the Fund's diversified bond portfolios, regardless of daily market changes. The Stable Value Fund Benchmark is the 3-year Constant Maturity Treasury Bill +45 basis points. Please note that the Market Value for the Stable Value Fund reflects assets held through the Deferred Compensation Plan as well.

	<u>Ending Market Value</u>	<u>Last Qtr</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>
STABLE VALUE FUND	\$1,601,332,885	0.7%	2.7%	2.3%	2.2%	2.6%
Fixed Interest Blended Benchmark		0.5	2.7	2.4	2.0	1.6
Excess		0.2	-0.0	-0.1	0.2	1.0

Volunteer Firefighter Account

The Volunteer Firefighter Account is different than other SIF program options. It is available only to the local entities that participate in the Statewide Volunteer Firefighter Plan (administered by PERA) and have all of their assets invested in the Volunteer Firefighter Account. There are other volunteer firefighter plans that are not eligible to be consolidated that may invest their assets through other SIF program options. The investment objective of the Volunteer Firefighter Account is to maximize long-term returns while limiting short-term portfolio return volatility. The account is invested in a balanced portfolio of domestic equity, international equity, fixed income and cash. The benchmark for this account is 35% Russell 3000, 15% MSCI ACWI ex USA (net), 45% Bloomberg Barclays U.S. Aggregate, 5% 3 Month T-Bills.

	<u>Ending Market Value</u>	<u>Last Qtr</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>

Excess		0.1	-0.1	0.3	0.3	

Mutual Funds

The mutual fund investment line-up provides investment options to the Minnesota Deferred Compensation Plan (MNDCP), Unclassified Retirement Plan, Health Care Savings Plan, and the Hennepin County Retirement Plan. The MNDCP is a tax-sheltered retirement savings plan that is supplemental to public employees primary retirement plan. (In most cases, the primary plan is a defined benefit plan administered by TRA, PERA, or MSRS.) Participants can choose from active and passively managed stock and bond funds, a Stable Value Fund, a Money Market Fund, a set of 10 target date retirement fund options, and a brokerage window where participants can choose from hundreds of mutual funds.

Mutual Funds

MN TARGET RETIREMENT ACCOUNTS

Target retirement funds offer a mix of investments that are adjusted over time to reduce risk and become more conservative as the target retirement date approaches. A participant only needs to make one investment decision by investing their assets in the fund that is closest to their anticipated retirement date.

Target Date Retirement Funds

MN College Savings Plan Options

The Minnesota College Savings Plan is an education savings plan designed to help families set aside funds for future college costs. The SBI is responsible for the investments and the Minnesota Office of Higher Education (OHE) is responsible for the overall administration of the Plan.

The SBI and OHE contract jointly with TIAA to provide administrative, marketing, communication, recordkeeping and investment management services. Please see the next page for the performance as reported by TIAA.

AGE-BASED MANAGED ALLOCATIONS

The Age-Based Managed Allocation Option seeks to align the investment objective and level of risk, which will become more conservative as the beneficiary ages and moves closer to entering an eligible educational institution.

RISK BASED ALLOCATIONS

The Risk Based Allocation Option offers three separate allocation investment options - Aggressive, Moderate and Conservative, each of which has a fixed risk level that does not change as the Beneficiary ages.

ASSET CLASS BASED ALLOCATIONS

U.S. LARGE CAP EQUITY INDEX - A passive domestic stock portfolio that tracks the S&P 500.

INTERNATIONAL EQUITY INDEX - A fund that passively invests in a mix of developed and emerging market equities. The fund is expected to track a weighted benchmark of 80% MSCI ACWI World ex USA and 20% MSCI Emerging Markets Free Index.

U.S. AND INTERNATIONAL EQUITY INDEX - A fund that invests in a mix of equities, both U.S. and international, across all capitalization ranges and real estate-related securities. The fund is expected to track a weighted benchmark of 60% Russell 3000, 24% International, 6% Emerging Markets, and 10% Real Estate Securities Fund.

PRINCIPAL PLUS INTEREST OPTION - A passive fund where contributions are invested in a Funding Agreement issued by TIAA-CREF Life. The funding agreement provides for a return of principal plus a guaranteed rate of interest which is made by the insurance company to the policyholder, not the account owners. The account is expected to outperform the return of the 3-month T-Bill.

EQUITY AND INTEREST ACCUMULATION - A fund that passively invests half of the portfolio in U.S. equities across all capitalization ranges and the other half in the same Funding Agreement issued by TIAA-CREF Life as described above. The fund is expected to track a weighted benchmark of 50% Russell 3000 and 50% 3-month T-Bill.

100% FIXED INCOME - A fund that passively invests in fixed income holdings that tracks the Bloomberg Barclays U.S. Aggregate and two active funds that invest in inflation-linked bonds and high yield securities. The fund is expected to track a weighted benchmark of 70% BB Barclays Aggregate, 20% inflation-linked bond, and 10% high yield.

MONEY MARKET - An active fund that invests in high-quality, short-term money market instruments of both domestic and foreign issuers that tracks the iMoneyNet Average All Taxable benchmark.

MINNESOTA ACHIEVE A BETTER LIFE EXPERIENCE

The Minnesota Achieve a Better Life Experience Plan (ABLE) is a savings plan designed to help individuals save for qualified disability expenses without losing eligibility for certain assistance programs. The plan is administered by the Department of Human Services (DHS).

The SBI and DHS have jointly contracted with Ascensus to provide recordkeeping, administrative, and investment management services for the plan.

RISK BASED ALLOCATIONS

The plan offers seven different allocation investment options: Aggressive, Moderately Aggressive, Growth, Moderate, Moderately Conservative, Conservative, and Checking. Each allocation is based on a fixed risk level.

Quarterly Report

Non-Retirement

September 30, 2019

Quarterly Report

Non-Retirement Funds

The SBI manages funds for trusts and programs created by the Minnesota State Constitution and Legislature.

- The Permanent School Fund is a trust established for the benefit of Minnesota public schools.
- The Environmental Trust Fund is a trust established for the protection and enhancement of Minnesota's environment. It is funded with a portion of the proceeds from the state's lottery.
- The Minnesota Workers Compensation Assigned Risk Plan provides worker compensation insurance for companies unable to obtain coverage through private carriers.
- The Closed Landfill Investment Fund is a trust created by the Legislature to invest money to pay for the long-term costs of maintaining the integrity of landfills in Minnesota once they are closed.
- Other Post-Employment Benefits Accounts (OPEB) are the assets set aside by local units of government for the payment of retiree benefits trusted by the Public Employees Retirement Association.
- Miscellaneous Trust Accounts are other small funds managed by the SBI for a variety of purposes.

All equity, fixed income, and cash assets for these accounts are managed externally by investment management firms retained by the SBI.

Non-Retirement

Assigned Risk Plan

The Assigned Risk plan has two investment objectives: to minimize the mismatch between assets and liabilities and to provide sufficient liquidity for the payment of ongoing claims and operating expenses.

The Assigned Risk Plan is invested in a portfolio of common stocks and bonds

The equity segment is passively managed to track the performance of the S&P 500.

The fixed income benchmark is the Bloomberg Barclays Intermediate Government Index. The total fund benchmark is a combination of the fixed income and equity benchmarks, weighted according to the total fund asset allocation targets of 80% equities and 20% fixed income. The actual asset mix will fluctuate and is shown in the graph below.

	Ending Market Value	Last Qtr	1 Year	3 Year	5 Year	10 Year
Assigned Risk Account	\$288,063,961	1.3%	7.2%	4.3%	3.9%	5.0%
EQUITIES	57,962,401	1.7	4.3	13.3	9.8	12.0
FIXED INCOME	230,101,560	1.2	7.3	1.9	2.2	3.0
ASSIGNED RISK - COMPOSITE INDEX		1.3	7.2	4.2	4.0	4.6
Excess		0.0	0.1	0.1	-0.1	0.4
S&P 500		1.7	4.3	13.4	10.8	13.2
BBG BARC US Gov: Int		1.2	7.5	1.8	2.2	2.3

Note: Since 12/1/2017 the Assigned Risk equity segment has been managed by Mellon. From 1/17/2017-11/30/2017 it was managed internally by SBI staff. Prior to 1/17/2017 the equity segment was managed by SSgA (formerly GE Investment Mgmt.). RBC manages the fixed income segment of the Fund.

Non-Retirement

Permanent School Fund

The investment objective of the Permanent School Fund is to produce a growing level of spendable income, within the constraints of maintaining adequate portfolio quality and liquidity. The income from the portfolio is transferred to the school endowment fund and distributed to Minnesota's public schools.

The Permanent School Fund is invested in a balanced portfolio of common stocks and bonds. Common stocks provide the potential for significant capital appreciation, while bonds provide portfolio diversification and a more stable stream of current income.

The stock segment is passively managed to track the performance of the S&P 500. The bond segment is actively managed to add incremental value through sector, security and yield curve decisions. The fixed income benchmark is the Bloomberg Barclays U.S. Aggregate. The total fund benchmark is a combination of the fixed income and equity benchmarks, weighted according to the total fund asset allocation targets of 2% cash, 50% equity, and 48% fixed income. The actual asset mix will fluctuate and is shown in the graph below.

	<u>Ending Market Value</u>	<u>Last Qtr</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>
PERMANENT SCHOOL FUND	\$1,544,309,975	2.0%	7.5%	8.6%	7.4%	8.8%

EQUITIES	771,756,635	1.7	4.3	13.4	10.8	13.3
FIXED INCOME	743,477,552	2.4	10.8	3.5	3.8	4.2
PERMANENT SCHOOL - COMP INDEX		2.0	7.6	8.2	7.2	8.6
Excess		0.1	-0.0	0.3	0.2	0.2
S&P 500		1.7	4.3	13.4	10.8	13.2
BBG BARC US Agg		2.3	10.3	2.9	3.4	3.7

Note: Since 12/1/2017 the equity segment has been managed by Mellon and the fixed income segment by Prudential. Prior to 12/1/2017 both segments were managed internally by SBI staff. Prior to 7/1/97 the Fund allocation was 100% fixed income.

Non-Retirement

Environmental Trust Fund

The objective of the Environmental Trust Fund is to increase the market value of the Fund over time in order to increase the annual amount made available for spending within the constraints of maintaining adequate portfolio quality and liquidity.

The Environmental Trust Fund is invested in a balanced portfolio of common stocks and bonds. Common stocks provide the potential for significant capital appreciation, while bonds act as a deflation hedge and provide portfolio diversification.

The bond segment is actively managed to add incremental value through sector, security and yield curve decisions. The stock segment is passively managed to track the performance of the S&P 500. The fixed income benchmark is the Bloomberg Barclays U.S. Aggregate. The total fund benchmark is a combination of the fixed income and equity benchmarks, weighted according to the total fund asset allocation targets of 2% cash, 70% equities, and 28% fixed income. The actual asset mix will fluctuate and is shown in the graph below.

	<u>Ending Market Value</u>	<u>Last Qtr</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>
SBI ENVIRONMENTAL TRUST	\$1,231,535,378	1.9%	6.3%	10.5%	8.8%	10.6%
CASH EQUIVALENTS	24,530,585	0.6	2.5	1.6	1.1	0.7
EQUITIES	856,371,501	1.7	4.3	13.4	10.8	13.3
FIXED INCOME	350,633,292	2.4	10.8	3.5	3.8	4.2
Environmental Trust Benchmark		1.9	6.3	10.3	8.7	10.4
Excess		0.0	0.0	0.2	0.1	0.1
S&P 500		1.7	4.3	13.4	10.8	13.2
BBG BARC US Agg		2.3	10.3	2.9	3.4	3.7

Note: Since 12/1/2017 the equity segment has been managed by Mellon and the fixed income segment by Prudential. Prior to 12/1/2017 both segments were managed internally by SBI staff. From 7/1/94 to 7/1/99, the Fund's target allocation and benchmark was 50% fixed income and 50% stock. Prior to 7/1/94 the Fund was invested entirely in short-term instruments as part of the Invested Treasurer's Cash pool.

Non-Retirement

Closed Landfill Investment Fund

The investment objective of the Closed Landfill Investment Fund is to increase the market value of the Fund and to reduce volatility to meet future expenditures. By statute, the assets of the Fund are unavailable for expenditure until after the fiscal year 2020 to pay for long-term costs of maintaining the integrity of landfills in Minnesota once they are closed. In FY 2011, \$48 million was transferred out of the general fund leaving a balance of \$1 million in the account. Legislation was enacted in 2013 to replenish the principal and earnings back into the fund and in FY 2014 a repayment was made in the amount of \$64.2 million. In 2015, legislation was passed which repealed any further repayments.

The bond segment is actively managed to add incremental value through sector, security and yield curve decisions. The stock segment is managed to passively track the performance of the S&P 500. The fixed income benchmark is the Bloomberg Barclays U.S. Aggregate. The total fund benchmark is a combination of the fixed income and equity benchmarks, weighted according to the total fund asset allocation targets of 70% equities and 30% fixed income. The actual asset mix will fluctuate and is shown in the graph below.

	Ending Market Value	Last Qtr	1 Year	3 Year	5 Year	10 Year

Note:

RBC is the manager for the fixed income portion of the assigned risk account. RBC changed its name from Voyageur Asset Management on 1/1/2010. The current benchmark is the Bloomberg Barclays Intermediate Government Index. Prior to 7/1/11 the Voyageur Custom Index was 10% 90 day T-Bill, 25% Merrill 1-3 Government, 15% Merrill 3-5 Government, 25% Merrill 5-10 Government, 25% Merrill Mortgage Master.

Prior to 12/1/17 the Non Retirement Equity Index and Non Retirement Fixed Income accounts were managed internally by SBI staff.

In addition to the Non-Retirement Funds listed on the previous pages, the Non Retirement Equity Index and the Non Retirement Fixed Income accounts also include the assets of various smaller Miscellaneous Trust Accounts and Other Post Employment Benefits.

Quarterly Report

State Cash

September 30, 2019

State Cash Accounts

Invested Treasurer's Cash

The Invested Treasurer's Cash Pool (ITC) represents the balances in more than 400 separate accounts that flow through the Minnesota State Treasury. These accounts vary greatly in size. The ITC contains the cash balances of certain State agencies and non-dedicated cash in the State Treasury.

The investment objectives of the ITC, in order of priority, are as follows:

- Safety of Principal. To preserve capital.
- Liquidity. To meet cash needs without the forced sale of securities at a loss.
- Competitive Rate of Return. To provide a level of current income consistent with the goal of preserving capital.

The SBI seeks to provide safety of principal by investing all cash accounts in high quality, liquid, short term investments. These include U.S. Treasury and Agency issues, repurchase agreements, bankers acceptances, commercial paper, and certificates of deposit.

Beginning in January 2003, the Treasurer's Cash Pool is measured against the iMoneyNet, All Taxable Money Fund Report Average.

	<u>Ending Market Value</u>	<u>Last Qtr</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>
Treasurer's Cash	12,911,324,183	0.5	2.7	1.8	1.3	0.9
iMoneyNet Money Fund Average-All Taxable		0.5	2.0	1.2	0.7	0.4

Other State Cash Accounts

Due to differing investment objectives, strategies, and time horizons, some State agencies' accounts are invested separately. These agencies direct the investments or provide the SBI with investment guidelines and the SBI executes on their behalf. Consequently, returns are shown for informational purposes only and there are no benchmarks for these accounts.

	<u>Ending Market Value</u>	<u>Last Qtr</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>

Addendum

Benchmark Definitions

Active Domestic Equity Benchmark:

A weighted composite each of the individual active domestic equity managers' benchmarks. Effective 3/1/2017 the calculation uses the average weight of the manager relative to the total group of active managers during the month. Prior to 3/1/2017 the beginning of the month weight relative to the total group was used.

Benchmark DM:

Since 6/1/08 the developed markets managers' benchmark, "Benchmark DM," is the Standard (large + mid) MSCI World ex USA (net). From 10/1/07 through 5/31/08 the benchmark was the Provisional Standard MSCI World ex USA (net). From 10/1/03 to 9/30/07 the benchmark was the MSCI World ex USA (net). Prior to that date, it was the MSCI EAFE Free (net), including from 10/1/01 to 5/31/02 when it was the Provisional MSCI EAFE Free (net).

Benchmark EM:

Since 6/1/08 the emerging markets managers' benchmark, "Benchmark EM," is the Standard (large + mid) MSCI Emerging Markets Free (net). From 10/1/07 through 5/31/08 the benchmark was the Provisional Standard MSCI Emerging Markets Free (net). From 1/1/01 to 9/30/07 the benchmark was the MSCI Emerging Markets Free (net), including from 10/1/01 to 5/31/02 when it was the Provisional MSCI Emerging Markets Free (net). Prior to 1/1/01, it was the MSCI Emerging Markets Free (gross).

Combined Funds Composite Index:

The Composite Index performance is calculated by multiplying the beginning of month Composite weights by the monthly returns of the asset class benchmarks. The Combined Funds Composite weight is set as the Strategic Asset Allocation Policy Target with the uninvested portion of Private Markets allocated to Public Equity. Asset class weights for Public Equity and Private Markets are reset at the start of each month. From 1/1/2018-2/28/2019 the Transitional Policy Target was used to reflect the addition of Treasuries to the Fixed Income portfolio. From 7/1/2016-12/31/2016 the composite weights were set to match actual allocation as the portfolio was brought into line with the new Strategic Asset Allocation Policy Target. Prior to 7/1/2016 the uninvested portion of the Private Markets was invested in Fixed Income and the Composite Index was adjusted accordingly. When the Strategic Asset Allocation Policy Target changes, so does the Composite Index.

Domestic Equity Benchmark:

Since 1/1/2019 the benchmark is 90% Russell 1000 and 10% Russell 2000. From 10/1/2003 to 12/31/2018 it was the Russell 3000. From 7/1/1999 to 9/30/2003, it was the Wilshire 5000 Investable Index. From 11/1/1993 to 6/30/1999, the target was the Wilshire 5000 as reported with no adjustments. Prior to 11/1/1993, the Wilshire 5000 was adjusted to reflect SBI mandated restrictions, which included liquor and tobacco, American Home Products and South Africa.

Fixed Income Benchmark:

In 2016, the Barclays Agg was rebranded Bloomberg Barclays Agg to reflect an ownership change. Prior to 9/18/2008 this index was called the Lehman Brothers Aggregate Bond Index. From 7/1/84-6/30/94 the asset class benchmark was the Salomon Brothers Broad Investment Grade Index.

Addendum
